UNI OPEN DAYS

Experience life on campus, talk to faculty staff and meet current students at a uni open day.

Or take advantage of an expanding schedule of online tours and information sessions.

Find all the details for 2020 at uac.edu.au/open-days.
PART 1: YEAR 10 - A YEAR OF DECISIONS

This booklet is for Year 10 students choosing their courses for Years 11 and 12. Its aim is to help you think about the next two years and make the best decision for successful study in senior school and beyond.
INTRODUCTION

In Year 10 you will choose the HSC courses that you will study for the next two years. Although there are many pathways to uni or college, choosing the right courses for your HSC can make it easier to get into university and succeed in your studies.

In this booklet, the universities and colleges that make offers through UAC have listed the courses they plan to offer in 2023; that is, the degrees and diplomas you’ll be able to study when you leave school. For each course they have also set out, where applicable, details of:
- areas of study
- prerequisites
- assumed knowledge
- recommended studies
- additional selection criteria.

It’s particularly important to consider university prerequisites and assumed knowledge when choosing your HSC courses.

Prerequisites are HSC courses you need to have completed in order to be offered a place in a university course (course prerequisites) or a subject within that course (subject prerequisites).

Some institutions assume you have knowledge of specific NSW HSC courses or equivalent when you start your university course. If you haven’t studied the HSC course you can still be selected for the course, but you may have some difficulty coping with your studies.

Most institutions offer bridging courses if you have not studied the HSC courses listed as assumed knowledge, but bridging courses are not equivalent to the two-year HSC course and may add significantly to your workload.

This booklet also provides:
- general information about HSC courses, how the ATAR is calculated and used for university entry, and why your selection rank for a course might be higher than your ATAR
- worksheets to guide you through the steps involved in choosing your courses for Years 11 and 12.

If you’re not sure about the exact career path you want to follow, this booklet can help you choose courses that will keep your options open and give you the best chance of succeeding in the future.

ABOUT UAC

The Universities Admissions Centre (UAC) receives and processes applications for undergraduate and postgraduate courses at most universities – and some colleges – in NSW and the ACT.

In 2020, there are more than 2,000 undergraduate courses listed through UAC.

UAC also:
- calculates and provides the Australian Tertiary Admission Rank (ATAR) to NSW HSC students
- processes applications for some university access schemes and scholarships.
UAC JARGON

Here are definitions of the common terms used by UAC, universities and colleges.

Additional selection criteria
Compulsory requirements, either in addition to or instead of your HSC results or ATAR, which you must meet to be considered for selection into a course. Examples include a personal statement, questionnaire, portfolio of work, audition, interview or test.

You should find out as soon as possible if the course you’re interested in has additional selection criteria as some of these require materials and evidence of experience to be compiled or documented during Years 11 and 12.

Adjustment factors
Factors that universities consider in order to increase your selection rank for a particular course (eg educational disadvantage or high achievement in an HSC course related to your preferred degree). They do not change your ATAR.

Admission criteria
The minimum qualifications (eg HSC) required for you to be considered for entry to a particular university course. If you meet this admission criteria, you then compete against other applicants for a place in the course.

Advanced diploma
An award that usually requires two years of full-time, or equivalent part-time, study. This is the highest of the undergraduate diploma awards.

Areas of study
Areas of study within a university course are generally studied throughout the course as major areas of study, specialisations or sub-majors, or as additional or supporting subjects or units.

Associate degree
An award requiring two years of full-time, or equivalent part-time, study. It is equivalent to the first two years of a three-year degree course.

Assumed knowledge
Some institutions assume you have knowledge of specific NSW HSC courses or equivalent when you start your course. If you haven’t completed the specified HSC course, you can still be selected for the university course, but you may have some difficulty coping with your studies. The university may suggest you enrol in a bridging course to gain basic knowledge of the subject.

ATAR (Australian Tertiary Admission Rank)
A measure of academic achievement in the HSC that helps institutions rank applicants for selection to university courses. The ATAR is a rank, not a percentage or a mark out of 100.

ATAR courses
Courses developed and examined by the NSW Education Standards Authority. Classified as Category A courses or Category B courses, these are the only courses that can be included in the ATAR calculations.

Bachelor degree
An award requiring three or four years of full-time, or equivalent part-time, study.

Bridging courses
Courses that enable you to achieve a basic level of assumed knowledge for a university course. These courses are only taught to an introductory level and are not equivalent to the two-year HSC course.

Category A courses
ATAR courses that have the academic rigour and depth of knowledge to provide an adequate background for university studies. They can all be used in the ATAR calculation.

Category B courses
ATAR courses that don’t provide an adequate background for university studies but can contribute to the ATAR when combined with Category A courses. No more than 2 units of Category B courses can be included in the ATAR calculation.
Combined/double/dual degrees
Allow students to complete two degrees in less time than if the two degrees were studied one after the other.

Deferment
Delaying the commencement of a course, usually for six months or a year. Some institutions only grant deferments in special circumstances.

Diploma
An award usually requiring one year of full-time, or equivalent part-time, undergraduate study. These courses are usually characterised by more emphasis on practical skills than on the theoretical content.

HSC subjects and courses
An HSC subject is a general area of study or a key learning area (eg English).

An HSC course is a branch of study within a subject (eg English Studies, English Standard, English Advanced, English Extension 1, English Extension 2, English as an Additional Language or Dialect).

Institution
A provider of tertiary study, such as a university or a college. UAC’s participating institutions are those you apply to through UAC.

Selection rank
Your selection rank for a uni course takes into account all the criteria you are required to meet in order to gain entry to the course. As a Year 12 student, your selection rank is usually your ATAR plus any adjustment factors for which you are eligible. For example, if you do well in an HSC course related to the degree you want to study, the uni might increase your selection rank for that degree. If you are required to attend an interview or submit a portfolio, your performance in these will also contribute to your selection rank.

The lowest selection rank required to be offered a place in a course is determined by:
- the number of places available in the course
- the number of applicants for the course
- the quality of those applicants.

This means that the lowest selection ranks change from year to year and are impossible to predict before applicants are selected for a particular course in a particular year.

NSW Education Standards Authority (NESA)
Sets the core curriculum for Kindergarten to Year 12, sets guidelines for school assessment tasks, and sets, organises and marks the HSC examinations for government and non-government schools in NSW.

Open days
Scheduled days for prospective students to visit a university or college campus to view the facilities and meet academic staff and students. Usually only happen once or twice a year.

Pathway courses
Non-degree courses – such as foundation studies, preparatory courses and certificates, diplomas or associate degrees – offered by institutions to applicants who don’t meet the entry requirements for their degree or need further support and preparation before studying at degree level. Many institutions offer entry into the degree after successful completion of the corresponding pathway course. Some institutions offer pathway courses through UAC.

Prerequisites (see also Assumed knowledge)
A specified NSW HSC course that you need to have completed, or achieved a specified result in, before you can be considered for a place in the university course (course prerequisites) or a subject within that course (subject prerequisites).

Recommended studies
NSW HSC courses that institutions suggest will help you in your chosen degree. However, if you haven’t studied these HSC courses your chances of selection are not affected.

Undergraduate course
An entry-level course for first-time university students that leads to a first qualification, such as a bachelor degree, an associate diploma or a diploma.
THE HSC AND THE ATAR

Understanding more about the HSC, the ATAR and applying to uni will help you make the best decisions about your courses.
THE NSW HSC

Studying for the NSW HSC begins in Year 11 with preliminary courses and ends with the HSC exams at the end of Year 12. Your Year 12 assessment marks and your HSC exam marks will contribute equally to your final HSC marks.

Eligibility

To be eligible for the HSC you need to meet the following requirements:
- complete at least 12 units of preliminary courses in Year 11
- complete at least 10 units of courses in Year 12.

In both years your studies must include:
- 6 units of Board Developed Courses
- 2 units of a Board Developed Course in English
- 3 courses of 2 or more units (either Board Developed or Board Endorsed Courses)
- 4 subjects.

Being eligible for the HSC doesn’t necessarily mean you will be eligible for an ATAR: read the next section for ATAR eligibility requirements.

HSC courses

There are many HSC courses but not all of them can contribute to an ATAR.

ATAR courses

ATAR courses are developed and formally examined by NESA. These Board Developed courses are the only courses that can be included in ATAR calculations. They are classified as either Category A or Category B courses.

Category A courses have the academic rigour and depth of knowledge to provide a foundation for university studies.

Category B courses on their own don’t prepare you for university studies, but can contribute to the ATAR if the other courses included in the ATAR are the more academically demanding Category A courses.

For this reason, only 2 units of Category B courses can be included in the ATAR calculation.

HSC Board Developed courses that will be examined in 2022 are listed in the tables on pages 44–45.

Other courses

Vocational courses are industry-based, hands-on courses and usually include work skills and work placements. These courses may be delivered at your school, at another school or at TAFE.

TAFE-delivered HSC VET (TVET) courses are developed or endorsed by NESA and include Category B courses.

If the content of a course is endorsed – but not developed – by NESA, it will count towards your HSC but it will not contribute to your ATAR. Content Endorsed courses are listed on page 45.

Distance education

If you live in an area that is isolated, have special circumstances that prevent you from attending school on a regular basis or meet other criteria, you can study through distance education.
There are more than 100 HSC courses and UAC’s participating institutions are aware that not every school offers all courses. If your school does not offer a course recommended as preparation for university study, ask the institution about supplementary studies you may need to undertake.

**THE ATAR**

The first thing to understand is that the ATAR is a rank, not a mark out of 100 or a percentage. It’s a number between 0.00 and 99.95 with increments of 0.05. It tells you about your position overall in the HSC in relation to your peers.

Think of it like a running race: your HSC marks indicate your time, while your ATAR indicates your place (first, second, third, and so on). Your position in the race depends not only on your time but on the times of the students you are competing with.

The median (or middle) ATAR is usually just below 70.00, while median HSC marks are often above 80.

You can access your ATAR on UAC’s website in December of the year you complete your HSC.

**Eligibility**

To be eligible for an ATAR, NSW students must satisfactorily complete at least 10 units of ATAR courses.

These ATAR courses must include:

- 8 units of Category A courses
- 2 units of English
- three Board Developed courses of 2 units or greater
- four subjects.

The last point is easy to overlook. A subject is an HSC area of study (eg mathematics). Within that subject there may be a number of courses (eg Mathematics Standard 1 or 2, Mathematics Advanced, Mathematics Extension 1, Mathematics Extension 2).

Let’s say a student studies the following courses:

- Mathematics Extension 1 and Extension 2
- English Advanced
- English Extension 1 and Extension 2
- Biology.

This student will not meet the four subjects requirement because they have only studied three subjects:

1. Mathematics
2. English

When you choose your program of study for the HSC, make sure you will be eligible for an ATAR if you want to study at university.

**Satisfactorily completing a course**

You will be considered to have satisfactorily completed a course if, in your principal’s view, there is sufficient evidence that you have:

- followed the course developed or endorsed by NESA
- applied yourself with diligence and sustained effort to the set tasks and experiences provided in the course by the school
- achieved some or all of the course outcomes
- made a genuine attempt at assessment tasks that total more than 50 per cent of the school assessment marks for that course.

You will also need to make a serious attempt at the examination for the course.

Failure to satisfactorily complete a course will result in that course not contributing to the eligibility requirements. If the course is a 2-unit course for which there is an associated extension course, neither course will contribute towards your ATAR.

**How the ATAR is calculated**

The ATAR is based on an aggregate of scaled marks in 10 units of ATAR courses comprising your:

- best 2 units of English
- best 8 of the remaining units, which can include up to 2 units of Category B courses.
You are the generation of change. The ones who will master uncertainty like no other. To prepare you for what’s next, Notre Dame University embeds the fundamentals of critical thinking into every degree. Critical thinking is a timeless art, used for centuries to solve humankind’s most pressing issues. And now, in a time of exponential change, it is more crucial than ever. It is why we are ranked No.1 for Learner Engagement and Skills Development in NSW*. Contact us today for the education of a lifetime.

Natural critical thinkers

*2018 Student Experience Survey (qilt.edu.au)
HSC students study roughly 27,000 different combinations of courses. Scaling allows us to compare them.

**ATAR myths**

It's a myth that choosing certain courses will automatically increase your ATAR. There is no magic formula for getting a good ATAR; it all depends on how well you've done in all your courses in comparison to other students.

Your HSC mark will be scaled according to the course's scaled mean. The scaled mean indicates the academic ability of students taking the course, not the perceived difficulty of the course:

- If a course has a high scaled mean it tells us that, on average, the ability of the students in that course is high: in general, they did well in their other courses.
- If a course has a low scaled mean it tells us that the ability of the students in that course ranges from high to low. It **doesn't** mean that you can't get a high ATAR if you study that course.

The following table illustrates these points using data from selected 2019 HSC courses.

<table>
<thead>
<tr>
<th>Category A course</th>

</tr>
</tbody>
</table>

- This student’s ATAR is very high even though it was calculated using their results in a course with a low scaled mean.
- High scaled means for these courses indicate that the students are generally high achievers in all other courses.
- A student taking a Category B VET course can still receive a high ATAR.

This all means that you shouldn’t choose courses based on what you believe are the likely effects of scaling on your ATAR. Your course choices should be based on your interests, demonstrated abilities and future career plans.

Studying courses that you are not good at or happy with may mean you won’t do your best or achieve good marks. Choosing courses you are good at and do well in will give you the best chance of maximising your ATAR.

Lots of students get HSC marks between 70 and 80, so their rankings are really spread out. Getting closer to 80 will make a big difference to your ATAR.
The ATAR in the ACT

The ATAR calculated in the ACT is directly comparable to the ATAR calculated in NSW and other states.

The ACT operates a system of school-based curriculum and assessment through the ACT Board of Senior Secondary Studies (BSSS). Each college determines the courses (and units) that they offer to students. There are no compulsory courses or units and no examinations set by a central authority for any subject.

If you’re an ACT Year 12 student and want to apply for university, you must sit the ACT Scaling Test (AST). The AST is used to calculate your ATAR.

The calculation of the ATAR in the ACT is based on your best three major scaled course scores plus 0.6 of the next best scaled course score (major or minor). The scaled course scores are added to form an aggregate score. Students are then ranked based on their aggregate score, which is converted to an ATAR.

As your ATAR is calculated from your performance in the AST, if you drop a course it may not affect your ATAR directly. However, you need to take into account prerequisites for university courses outlined in this booklet.

If you are a college or school student in the ACT and you are thinking about studying at a UAC participating institution, you may need to check how your ACT Senior Secondary Certificate courses compare to NSW HSC courses.

The following table shows indicative course comparisons for key subjects for admissions. For a full listing of the most recent course-comparison information, visit the UAC website.

INTERNATIONAL BACCALAUREATE

If you’re an IB student, you won’t receive an ATAR. Instead, when you apply through UAC, or any other university admissions centre in Australia, your IB score will be converted to a rank. This will allow you to be compared to applicants with an ATAR.

Go to uac.edu.au/ib to view:
- the IB score/UAC rank conversion table
- the IB courses that are equivalent to NSW HSC courses.

REQUIREMENTS FOR TEACHING

For registration as a teacher in NSW schools, graduates will need to have met the following requirements set by the NSW Education Standards Authority (NESA):
- Students entering all teaching programs are expected to have achieved a minimum of three HSC Band 5s, one of which must be in English.
- Students entering primary teaching programs need to have achieved at least an HSC Band 4 in mathematics.
- Before graduation, all teaching students need to pass national literacy and numeracy tests.

There are other comparable measures and pathways approved by NESA for students who do not meet the HSC requirements.

For full details, check with the individual institutions.
**APPLYING TO UNI**

Every year, around 50,000 Year 12 students apply through UAC for admission to courses offered by UAC’s participating institutions. For the majority of courses there are more applicants than places, so applicants are ranked for selection.

For most courses, your selection rank is your ATAR, but an institution may increase your selection rank for certain courses in recognition of, for example, your performance in related HSC courses or equity considerations. Therefore, your selection rank may be higher than your ATAR for certain institutions or courses.

**Admission criteria**

In addition to the ATAR, many institutions may specify other admission criteria such as:

– prerequisites
– additional selection criteria.

**Prerequisites**

For example, an advanced computing degree might specify Mathematics Advanced as a course prerequisite. If you haven't studied Mathematics Advanced, you haven’t met this prerequisite and you won’t be considered for the course, regardless of your ATAR. Another course might specify Mathematics Advanced as a subject prerequisite. If you haven’t studied Mathematics Advanced, you can still be considered for the course but you won’t be able to study certain subjects within that course.

**Additional selection criteria**

Many courses have additional selection criteria. For example, visual arts courses may ask you to supply a portfolio and this will contribute to your selection for the course. Music-based courses may require an audition and others may require you to attend an interview, write a personal statement or sit a test.

**Assumed knowledge**

Institutions can also indicate the HSC courses that they either assume you have studied before you start a particular university course, or suggest you study to prepare for your chosen university course. These are listed as:

– assumed knowledge
– recommended studies.

If you don't have the assumed level of knowledge or haven’t completed the recommended studies you can still be selected for the course but you may have difficulty coping with your studies or just not be as prepared as other students.

When you're choosing your Year 11 and 12 courses, use this booklet to find out if there are any admission criteria, assumed knowledge or recommended studies for the course you're interested in. Then, when you apply for university at the end of Year 12, you’ll be able to meet any entry requirements to the course and have the foundations for success. There is more information about admission criteria on page 39.

**How the lowest selection rank for a course is determined**

The lowest selection rank required to be offered a place in a course is determined by three factors:

1. the number of places available in the course
2. the number of applicants for the course
3. the quality of those applicants.

These three factors mean that the lowest selection rank for a course can change from year to year and is not known until applicants are selected for that course each year.

The lowest selection rank does not represent the average ability of the students accepted for the course and does not reflect the difficulty or quality of the course.

**Selection rank adjustments**

Many applicants receive an offer to a course even though they have an ATAR below the published lowest selection rank. Often this is because other factors have been taken into consideration in combination with their ATAR and their selection rank for that course has been adjusted, making it higher than their ATAR.

These adjustments are due to factors such as:

– strong performance in HSC courses
– living or attending school in a certain area
– recognition of educational disadvantage.

Selection rank adjustments are applied differently from institution to institution and from course to course within the same institution. Visit each institution’s website for details.
It’s good to understand how your selection rank might be adjusted, but don’t be swayed into choosing certain courses based on this knowledge. By the time you apply for university, schemes may have changed and it’s more important to focus on doing well.

**Educational Access Schemes**
Most institutions that participate through UAC have a scheme for applicants who have experienced long-term educational disadvantage (due to circumstances beyond their control or choosing) which has seriously affected their educational performance. A long-term educational disadvantage usually means a disadvantage that has lasted for at least six months.

To have your educational disadvantage considered, you can apply for Educational Access Schemes (EAS) through UAC. If an institution considers you eligible, it may increase your selection rank.

---

*Keep an eye out for uni information evenings – they’ll help you navigate your HSC course selection.*
FREQUENTLY ASKED QUESTIONS

How many courses should I take in Years 11 and 12?
The number of courses you study depends on how many courses you can realistically manage and succeed in. Generally, courses are 2 units and to be eligible for the HSC you must successfully complete at least 12 units of study in Year 11 and at least 10 units in Year 12.

You must also study at least four subjects. Mathematics is a subject; within that subject there are a number of courses – Mathematics Standard 1, Mathematics Standard 2, Mathematics Advanced, Mathematics Extension 1 and Mathematics Extension 2.

Around 47% of HSC students do only 10 units in Year 12. The next most common pattern is 11 units (around 17%).

Is there anything I need to do if I change schools?
Not all schools offer the same HSC courses, so check that you’ll be able to continue with the courses you have already been studying.

Can I drop a course at the end of Year 11?
Yes, but before you drop an HSC course, ask yourself the following questions:
- Will you still be eligible for an ATAR?
- Is it a prerequisite for a university course you might want to study?
- Is it assumed knowledge for a university course you might want to study?

How do I know if the course I’m dropping is a prerequisite for a course or subject I’d like to study at uni?
There are a few places you can check course and subject prerequisites:
- the institution entries in Part 2 of this booklet
- the undergraduate course descriptions on UAC’s website
- institution websites.

Can I accelerate my HSC studies?
Yes, you can take a Year 12 course while in Year 11. The advantages of this can be:
- studying fewer courses in Year 12, meaning you can focus more on those units
- studying a broader range of subjects
- having extra units from which to draw your best 10 scaled marks for inclusion in your ATAR calculation.

However, accelerating your studies is no guarantee that you will improve your results.

If I complete an accelerated course in Year 11, who am I ranked with?
The course will be scaled in the year you complete it and contribute to your ATAR the following year.

How many units of maths can I do?
Up to 4 units of maths can be included in the ATAR calculation. If you study Mathematics Extension 1, it will have a different weighting (in terms of units) depending on whether you take Mathematics Advanced or Mathematics Extension 2.

If you study Mathematics Advanced (2 units), then Mathematics Extension 1 accounts for 1 unit.

If you study Mathematics Extension 2 (2 units), then Mathematics Extension 1 accounts for 2 units. This is calculated by doubling the mark received for the 1-unit course.

If you complete Mathematics Advanced and then go on to satisfactorily complete Mathematics Extension 1 and Mathematics Extension 2, your results in Mathematics Advanced will not be included in the ATAR calculation, even if you excel in it.

Will I get a better ATAR if I do a lower level of maths?
Not necessarily. You might have a higher position in a lower level course, but this will be offset by a lower scaled mean for that course, and possibly a lower scaled mark for you. Choose the level of maths that gives you the best foundation for further study. Also remember that institutions are more likely to adjust your selection rank in recognition of your performance in the higher level maths courses.
Can a Category B course completed in Year 11 be included in my ATAR calculation?
Yes. Any course completed in Year 11 will be available for inclusion in the ATAR calculation. Whether it is actually included will depend on whether it is among your best 8 scaled units (after English). English Studies, which is a Category B course, will always be included because 2 units of English must be used in the calculation of your ATAR.

Remember also that for a Category B course to be included in the ATAR calculation, the examination must be completed. Therefore, schools must ensure that students studying Category B courses are enrolled with NESA for the course and the exam.

Why do some courses scale better than others?
Courses have to be scaled so that marks in different courses can be compared with each other. Courses are scaled using the mean scores and distribution of marks, which indicate the ability of the students taking the course (not the perceived difficulty of the course). Courses such as Mathematics Extension 2 and Physics traditionally scale well because students who take these courses generally perform well in all their courses. The purpose of scaling is to rank students according to their overall achievement. Therefore, to get a high ATAR, students must achieve high HSC marks and high positions in all their courses.

Can I get a better ATAR by studying more units?
No. You cannot assume that simply by studying more units your ATAR will be increased. While students who study more units tend to gain higher ATARs, there are a number of reasons why, such as each student’s interest, motivation, effort and time management.

Can I get a high ATAR studying courses such as Visual Arts, Business Studies and Hospitality?
Yes. It is possible to achieve a high ATAR regardless of courses studied. However, it is important to note that students who achieve very high ATARs are usually placed in the top group of students in all of their courses.

Can I get a higher ATAR by studying certain courses?
No. Your ATAR indicates your overall position; that is, how well you have performed compared to other students. It is a myth that choosing certain courses increases your ATAR. You can only maximise your ATAR by choosing courses you enjoy and do well in. Students who achieve high ATARs are generally placed near the top in all of their courses.

When is the ATAR released?
ATARs for NSW students are released in December each year on UAC’s website.

How do ACT students receive their ATAR?
In the ACT, the ATAR is calculated by the ACT Board of Senior Secondary Studies, in consultation with UAC, and released by ACT schools.

Your ATAR is a rank (not a mark) based on your position compared to other students in the state.
Your HSC mark for each course is based on your performance in your exam and assessments.

If a uni increases my selection rank, does this mean my ATAR increases?
No. Institutions will only adjust your selection rank for a particular course; your ATAR will not change.

What is meant by the 'lowest selection rank' for a course?
This is the lowest selection rank (combination of ATAR and adjustment factors) required to be offered a place in the course. It is not the lowest ATAR of an applicant who received an offer to the course.

The lowest selection ranks for courses in a particular year are only known after offers are made. Therefore, UAC publishes the previous year’s selection ranks as a guide to selection ranks for the coming year.

Does UAC have an ATAR calculator?
No. UAC only advises students of their official ATARs on ATAR release day in December each year. UAC does not endorse the use of ATAR calculators. ATAR calculators do not use current data so can only be a general indication of a student’s possible ATAR.

What happens if a course is repeated?
Courses can be repeated over a period of up to five years. A student is considered to be repeating an HSC course if they:
- repeat the same course
- study a different course in the same subject area, apart from an extension course.

If a student repeats a course, only the marks for the latest satisfactory attempt will be available for inclusion in the calculation of their ATAR, even if they are lower than the earlier attempt.
STEP 1: CONSIDER

Year 10 is a good time to start thinking about your future – not just what you’d like to do for the next two years, but what you’d like to do beyond that. Are you thinking of further study, getting a job or doing an apprenticeship? The following pages will help you consider your options.
Being unsure of what you want to do next is quite common. You may already know that you would like to go on to further study but not be sure of the type of course you'd enjoy.

If you're looking at a specific career path you may already know what university course you need to do. It's important that you understand all the requirements for this course when you choose your Year 11 and 12 courses.

Maybe the thought of more years of study after school isn't right for you just now. Perhaps you want to get straight into the workforce, or take up a traineeship or apprenticeship.

If you enter the workforce, consider how workplaces change over time and the importance of continuing to learn as your career develops. If you decide to come back to study in the future, there are other pathways to entry. Choosing courses at school that give you the broadest range of future options will make this easier for you later.

Think about your future, consider your abilities, investigate your options and make a plan.

You might want to start with the following questions.

**WHO INSPIRES YOU?**

When thinking about your future, a good place to start is by looking around at who and what inspires you.

This could be a person, such as a family member or friend, or someone prominent in public life.

Or it could be something you’ve seen or heard:  
- a book, television show, movie or documentary  
- a podcast or something you’ve seen online.

Think about why these people or things inspire you. Is it what they do, the way they relate to others, their community spirit, the story they tell or the message they give?

The things that inspire you can shape your future goals and dreams.
Fred and Laura are in Year 10. At the moment the end of school seems a long way away, but they have started to consider their futures. They're not sure what they want to do after school but their parents and teachers are encouraging them to consider going on to further study after Year 12.

Fred goes to school in the city and enjoys hanging out with his friends. He’s inspired by sports players and is the captain of his local basketball team.

Laura goes to school in the country and grew up on her family’s farm. She loves it when her friends come to stay and they go horseriding, and she enjoys working with her dad and brother on local Landcare projects.

Fred also enjoys playing on his computer; he particularly likes a stock market game that he plays with his friends. Fred’s dad is in business for himself and he's been helping Fred beat his mates. Fred also likes photography and a couple of his basketball photos have been in the local paper.

So far in high school Fred has done well in geography, history and economics and he really likes these subjects, which makes it easy for him to stay focused.

Laura’s best marks are in science subjects and her teachers have encouraged her to continue with them in Years 11 and 12. She also really enjoys history and art classes.

Throughout this booklet we'll use Fred and Laura's story to show how you can navigate your way to university.
WHAT DO YOU LIKE TO DO?
Think about the type of person you are and your interests.

Do you like:
− doing things outside or inside?
− helping others?
− working with technology?
− organising things?
− talking to people?
− finding out how things work?
− being original and creative?
− working on your own?
− working with others?

When planning your future career, consider your natural inclinations and abilities. For example, you may not be happy and successful as a park ranger if you don’t enjoy the outdoors!

WHAT ARE YOU GOOD AT?
Think about your academic skills and interests. What subjects are you good at? What do you enjoy studying? Often these are the same because you do well at subjects you enjoy and are interested in.

Investigate the types of jobs that use these subjects as key parts of what they do. For example, being good at geography could lead you to a job as a town planner, tour guide, cartographer or civil engineer. Being good at languages could lead you to a job as a customs officer, foreign affairs and trade officer, language teacher or translator, or you could work in an importing and exporting business.

Also consider what you’re good at outside school. What extracurricular activities do you do? If you’re good with pets, find out about jobs involving animals.

The table on pages 28–34 will help link your interests to possible careers and subject choices.

There are lots of ways to reach your goal, so also think about your Plan B.

WHO CAN YOU TALK TO?
Talk to those around you about your options for the future. They may have some good suggestions and new ideas.
− Talk with your parents and family about their career choices.
− Organise your own work experience – volunteer to work somewhere for a week to see if you enjoy it.
− Get a part-time job – it will give you a taste of what it’s like to be in the workforce.
− Visit careers expos and uni open days.
− Use the undergraduate course search on UAC’s website, where you only need a keyword, like ‘music’ or ‘chemistry’, to search more than 2,000 university or college courses.
− Contact the institutions you’re interested in and talk to them about your options. You can start by looking at their websites.

Many universities and colleges have school visit days so you can attend the campus, talk to lecturers and students, and get a feel for what it would be like to study there. Ask your teacher about these days or attend a public open day with your parents or friends. Check the dates and locations at uac.edu.au/open-days.

BRAINSTORMING
Now that you’ve considered the questions in this section, use the worksheets that follow to organise your ideas and discover the areas of study that would suit you best. This will help you work out the courses that will help you achieve your goals. Fred and Laura did this exercise and the results are shown on the facing page.
Fred and Laura's teachers have told them it's time to choose their subjects for Years 11 and 12, so they're exploring their options by doing some research.

Fred is keen to take his interest in sport further. His father has suggested he also look at business-related careers and his school careers adviser has suggested social sciences because his best marks are in these areas.

The table 'What are my options?' on pages 28–34 shows some options for Fred. Looking down the left column, which lists various interests, qualities and skills, there are several areas that could suit him. Fred is drawn to the following areas:

**Human Movement and Sport Sciences**
Fred is interested in – and good at – sport and fitness. If his skills include being a good communicator, leader and motivator, and he's patient and enthusiastic, the second column shows that he could be a sport scientist, sports coach or trainer.

The third column shows that for these careers he could study sports coaching, sports management, anatomy and physiology or psychology. The table also shows which institutions offer these courses.

The most relevant subjects for him to study for the HSC are shown in the fourth column: Biology, Chemistry, Mathematics Advanced, Personal Development, Health and Physical Education (PDHPE), Physics and Modern History.

**Business, Commerce, Economics, Marketing and Management**
Fred is interested in the stock market and business. His skills include being organised and independent, and he's good at leading, solving problems and critical thinking. Therefore, he could be a stockbroker, business analyst, accountant, banker or economist.

For these careers he could study banking, e-commerce or financial advising.

In addition to English and Mathematics Advanced, he would be wise to include any of Business Studies, Economics, Society and Culture, Business Services (Cat. B course), Human Services (Cat. B) or Retail Services (Cat. B) in his HSC courses. However, to be eligible for an ATAR he can only include 2 units of Category B courses.

Laura's school took her class to an open day at the local university and she has spoken to her family about her ideas. Her teachers think she should develop her strengths in science-related subjects but she's also keen on looking at careers in art-related areas.

The table 'What are my options?' on pages 28–34 shows some options for Laura in the following areas:

**Earth and Environmental Sciences**
Laura is interested in being outdoors, the environment, nature and animals. Her skills include being observant and resourceful, and she's good at design, science, working outdoors, critical thinking and solving problems. The second column shows that these interests and skills are useful to an environmental scientist, a conservationist, a forestry worker, an environmental officer, and an environmental or urban planner.

The third column shows that for these careers she could study climate change, conservation studies, environmental management or sustainability. The table also shows which institutions offer these courses.

The fourth column shows that the relevant HSC subjects she could study are Biology, Chemistry, Design and Technology, Earth and Environmental Science, Mathematics Advanced, Physics and Society and Culture.

**Creative and Performing Arts**
Laura's skills include being creative, imaginative, organised and an independent worker, and she's good at drawing, art, making things, writing and solving problems. She could be an artist, animator or photographer, or she could use these professions as a stepping stone to becoming an art teacher.

For these careers, she could study animation, fine arts, graphic design, illustration, photography or visual arts.

In addition to English, for her HSC she could study Dance, Design and Technology, Drama, Music, Software Design and Development, Textiles and Design, Visual Arts and Entertainment Industry (Cat. B).

From their research it's clear that there are many exciting options for Fred and Laura's futures.
Worksheet 1

The first step is to think about who you are: your interests, qualities and skills. Write these in the boxes below.

Then turn to the table ‘What are my options?’ on pages 28–34 and match your interests, qualities and skills with those in the left-hand column of the table. These are divided into study areas and you may find you match one particular area of study, or several.

## WHO AM I?

<table>
<thead>
<tr>
<th>What am I interested in?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>My personal qualities are...</th>
</tr>
</thead>
<tbody>
<tr>
<td>eg creative, organised, happy to work alone</td>

</thead>
<tbody>
<tr>
<td>eg writing, listening, drawing, solving problems</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Who inspires me? Why?</th>
<th>Who can I talk to?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Three people I could talk to about my choices:</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Worksheet 2

The next step is to use the ‘What are my options?’ table on pages 28–34 to match your answers in Worksheet 1 with areas of study. Work your way across the sheet below, filling in each column from the information in the table.

In the final column you will end up with a list of subjects that best match your abilities and future plans.

<table>
<thead>
<tr>
<th>Areas of study that match my interests, qualities and skills</th>
<th>What careers use those skills?</th>
<th>What tertiary courses could I study?</th>
<th>What HSC courses could I choose?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>

STEP 2: EXPLORE

Now that you’re thinking about your interests, qualities and skills, it’s time to explore the careers these could lead to, the courses you could study at uni and the HSC courses you could choose to begin your journey.
WHAT ARE MY OPTIONS?

Using the worksheets on pages 24–25, the following table will help you map your interests, qualities and skills to careers, areas of university study and HSC courses. Category B courses are identified as (Cat. B).

These lists are not meant to be exhaustive; they are only a summary of what’s available. A full list of university courses available each year is published on UAC’s website.

### Agriculture, Rural Studies and Animal Science

**I'm interested in**... the land, the environment, crop growing, farming, plants, animal health/welfare, horse training

*I'm...* observant, confident with animals, organised, good with detail, patient 

*I'm good at...* making things, planning, problem solving, maths, technical drawing, manual work, working with animals

**I could be an**... animal handler, animal welfare officer, conservation manager, farmer, grazer, horticulturist, land manager, produce manager, stud manager/trainer, veterinarian, winemaker, wool classer

**I could study**... agribusiness, agricultural science, animal production science, crop production, cyber security, equine science and horse management, farm and land management, horticulture, plant pathology, post-harvest technology, veterinary science/technology, viticulture and wine science, wool science, zoology

**... and I could choose these HSC courses**... Agriculture, Biology, Chemistry, Earth and Environmental Science, Geography, Investigating Science, Mathematics Advanced, Physics, Primary Industries (Cat. B)

Where can I study? CQU, CSU, LTU, UNE, USYD, WS

### Architecture, Building, Design and Planning

**I'm interested in**... how things work, cityscapes, buildings, building design, architecture, gardens, landscapes

*I'm...* artistic, imaginative, organised, good with detail, creative, orderly, conscientious 

*I'm good at...* making things, coming up with original ideas, drawing, designing, solving problems

**I could be an**... architect, building manager, construction manager, environmental planner, estimator, industrial designer, interior designer, landscape architect, property valuer, surveyor

**I could study**... architecture, construction economics, construction/project management, construction technology, fashion design, industrial design, interior design, landscape architecture, property management, quantity surveying

**... and I could choose these HSC courses**... Design and Technology, Engineering Studies, Industrial Technology, Mathematics Advanced, Physics, Visual Arts, Construction (Cat. B)

Where can I study? CDU, CQU, GU, ICMS, MQ, SCU, TUA, UC, UNE, UNSW, UON, UOW, USYD, UTS, WS

### Arts and Humanities

**I'm interested in**... current affairs, social issues, politics, world events, languages, writing and literature, religions and cultures, history

*I'm...* artistic, creative, adventurous, conscientious, efficient, industrious, resourceful, imaginative 

*I'm good at...* creative writing, debating, languages, solving problems, thinking critically, using technology

**I could be an**... analyst, anthropologist, archaeologist, archivist, foreign affairs officer, gallery curator, government policy officer, historian, journalist, language specialist, marketing manager, media officer, producer, researcher, social researcher, translator or interpreter

**I could study**... Aboriginal studies, archaeology, Asian studies, cinema studies, communications, English, international studies, languages, linguistics, literature, media, modern/ancient history, philosophy, photography, political science, psychology, publishing, religious studies, social science, sociology, theology, women's studies

**... and I could choose these HSC courses**... Aboriginal Studies, English Advanced, Geography, History, languages, Religion, Society and Culture, Textiles and Design, Visual Arts

Where can I study? ACAP, ACU, ANU, CDU, CQU, CSU, GU, LTU, MC, MQ, SAE, SCU, SIBT, TUA, UC, UNE, UNSW, UNSW-ADFA, UON, UOW, USYD, UTS, WS

Total (for ATAR) 10 units
Non-ATAR subjects excluded
Remember that you need to complete at least 12 units in Year 11.

Category A 8 units
Category B 2 units

Then share your Subject Compass results with you careers adviser and parents/guardian.

HSC subject selection made easy.
Get started at uac.edu.au/subjectcompass
STEP 3: DECIDE

In the previous section you explored how your interests, qualities and skills may lead to certain careers and uni courses. Now it’s time to decide on your HSC courses.
HSC SUBJECTS AND COURSES

At this stage, don’t focus on the ATAR you need for entry to a specific course as this could change once you are ready to apply. Think more about the courses or subject areas you are interested in and what will work best to help you get there. Open your mind to the multitude of possibilities.

This booklet discusses both HSC subjects and HSC courses. A subject is the general name given to an area of study. A course is a branch of study within a subject. A subject may have several courses. For example, the subject of English has the courses of English as an Additional Language or Dialect, English Studies (Cat. B), English Standard, English Advanced, English Extension 1 and English Extension 2. HSC subjects and HSC courses are listed in the table on pages 44–45.

If you want to study at uni but don’t have a particular degree in mind, choose HSC courses that make you eligible for an ATAR but also give you flexibility. For example, if you like both science and history you could pick from the science and history subjects in Years 11 and 12 (eg Biology, Chemistry, Physics, Investigating Science, Ancient History and Modern History). You would then be prepared for further study in either subject. Keep your options open so that when you are more sure about what you want to do, you’re already on the way to getting there.

If you’re sure you don’t want to go to university then your choice of courses for Years 11 and 12 will not be based on ATAR eligibility. But you may change your mind in the next couple of years, so it could still be a good idea to choose courses that make you eligible for an ATAR.

We know that Fred is interested in both sports-based and business degrees. These areas of study have the subject of Mathematics Advanced in common, so Fred’s first HSC course choice is Mathematics Advanced. He’s also decided to choose Business Studies and a science, Biology, to cover his interests. English is compulsory so Fred needs to choose two more subjects. He chooses Modern History and Visual Arts to make up his 12 units.

We know Laura is interested in degrees involving agriculture and the environment. Common subjects in these areas of study are Biology and Mathematics Advanced. Laura has also done well in science so these are good HSC course choices for her. She then chooses Visual Arts, which covers her artistic interests, along with English, which is compulsory. Laura also chooses Modern History, which she thinks will be interesting, and Business Studies, which her mother thinks may be useful in managing the farm.

With the HSC courses they’ve chosen, both Fred and Laura will have a good background knowledge of key subjects in these degree areas if they decide to study them.

Fred and Laura have therefore decided on the same courses for the HSC: Biology, Business Studies, English Advanced, Mathematics Advanced, Modern History and Visual Arts.
FRED AND LAURA

With his main areas of interest being sport and business, Fred has looked at a couple of courses in these areas at some of the universities in his city and checked to see if there are prerequisites, assumed knowledge, recommended studies or any additional selection criteria. Fred has found that if he were to apply for a degree in sport or exercise management he would need to have Mathematics Advanced and any 2 units of English as assumed knowledge. Luckily, he has chosen Mathematics Advanced, and English is on his list because it’s compulsory.

Laura has checked with the institution in her area about a degree in agriculture. It advises Biology and/or Chemistry as recommended studies with Mathematics Advanced as assumed knowledge. Laura has chosen both Biology and Mathematics Advanced so she is well prepared if she goes on to study this course.
Admission criteria
Some university courses require you to have studied certain HSC courses, or their equivalent, or to have achieved a specific standard before you’ll be offered a place in the course.

If you’re sure about what you want to study at uni, check you can answer the following questions about your course:
− Are there any prerequisites?
− Is there any assumed knowledge?
− Are there recommended studies?
− Are there any additional selection criteria?

These requirements can be found in the institution entries in Part 2 of this booklet. Part 2 is divided into main areas of study at each institution, so it’s a good idea to check a couple of different institutions you’re interested in for their requirements. Institutions can describe their admission criteria in different ways because they have different policies.

English Standard and Mathematics Standard 2 are the most popular HSC courses.

CHOOSING COURSES
There are many different types of HSC courses, but only Category A and B courses can be included in the calculation of your ATAR. All HSC courses are listed in the table on pages 44–45.

Category A courses
This is a general guide to HSC Category A subjects and courses accepted by institutions in NSW and the ACT for entrance purposes. Always check with the relevant institution to confirm the information.

English
In NSW, studying English is compulsory and 2 units of English must be included in the calculation of your ATAR. In addition, some institutions require English as a subject prerequisite or course prerequisite. If you are considering studying English at university, English Advanced or English Extension 1 is usually recommended.

Agriculture, Biology, Chemistry, Earth and Environmental Science, Engineering Studies, Investigating Science, Physics, Science Extension
If you wish to study a university course based on science – for example, agriculture, engineering, natural resources, computing, medical or rural science – you are advised to study as much science and mathematics as you can at school. You can do this by taking as many science-based courses as you are able to handle within the HSC rules.

Mathematics
A knowledge of mathematics is desirable for some university courses. It is also recommended, along with physics, for all degree courses requiring a study of physics.

Ideally you should select either Mathematics Extension 1 or Mathematics Extension 2 if you wish to continue studying mathematics, mathematical statistics, actuarial studies or computer science beyond your first year at uni. These courses are the best preparation for the study of all branches of engineering and physics after the first year.

Mathematics Advanced (not Mathematics Standard 2) is recommended by most institutions as the minimum requirement for further study in a variety of subjects, including architecture, agricultural economics, biological sciences, business, chemistry, commerce, economics, geology, psychology, social sciences, statistics, and urban and regional planning.

Mathematics Extension 1 – the unit value of this course changes depending on whether the course is taken in combination with Mathematics Advanced or Mathematics Extension 2, as follows:
− Mathematics Advanced (2 units) + Mathematics Extension 1 (1 unit)
− Mathematics Extension 1 (2 units) + Mathematics Extension 2 (2 units).
Languages (other than English)
Most institutions offer courses in languages for first-year students who have no previous knowledge of the particular language.

If you are considering further study in a language, however, including the language in your HSC program is to your advantage. This may be essential if you intend to proceed to fourth-year honours in that language.

Also ask the relevant institution whether specific requirements have been set for the study of a language.

HSC Beginners courses are accepted by all institutions for entrance purposes but are not recommended as preparation for study in that subject.

Ancient History, Economics, Geography, Modern History
Any of these HSC courses may be included in your HSC program to satisfy university entrance criteria. At university, however, they are taught on the assumption that students have not studied them previously.

Music
Music can be included in your HSC program by studying Music 1, Music 2 or Music Extension. If you are considering further study in music, find out the minimum entry standard required. Some courses require an audition.

Visual Arts
If you are considering further study in visual arts, find out the minimum entry standard required. Most courses require presentation of a portfolio of work. This is indicated under additional selection criteria in the areas of study for the institution.

Aboriginal Studies; Business Studies; Community and Family Studies; Dance; Design and Technology; Drama; Food Technology; Industrial Technology; Information Processes and Technology; Legal Studies; Personal Development, Health and Physical Education (PDHPE); Society and Culture; Software Design and Development; Studies of Religion; Textiles and Design
These HSC courses are accepted by all institutions for entrance purposes.

Category B courses
Remember that only the best 2 units from your Category B courses are available for inclusion in the calculation of your ATAR.

Courses that don’t contribute to the ATAR
Board Endorsed courses (eg Photography, Video and Digital Imaging) are developed by schools or universities, rather than NESA. They do not count towards the calculation of the ATAR but may provide valuable experience and knowledge in a specific subject area.

Life Skills courses, which are studied by students with special education needs, and HSC–University Pathways programs, for high-achieving students, are also not ATAR courses.

Subject and course choice examples
Following are examples of possible subject combinations chosen by students for Years 11 and 12. Remember that you must have at least 2 units of English.

Fred and Laura
Course Units Category
Biology 2 A
Business Studies 2 A
English Advanced 2 A
Mathematics Advanced 2 A
Modern History 2 A
Visual Arts 2 A

Fred and Laura are eligible for an ATAR because they meet all the ATAR eligibility rules (read page 7). They are also undertaking 12 units. To be eligible for an ATAR you need to have 10 units of ATAR courses, so even if they drop a course (other than English) for Year 12 they will both still be eligible.
Emily is not eligible for an ATAR because she is studying 6 units of Category A courses and 6 units of Category B courses. No more than 2 units of Category B courses can be used in the calculation of the ATAR. She therefore only has 8 units of courses that can be used to calculate the ATAR. To be eligible for an ATAR you need to have 10 units of ATAR courses.

Joshua – Year 11

At the end of Year 11, Joshua decided to drop Chemistry and Biology and take on Mathematics Extension 2 and English Extension 2. Joshua’s new pattern of study now looks like this:

Joshua – Year 12

Even though Joshua is studying all Category A courses, he is not eligible for an ATAR.

To be eligible for an ATAR you must have completed four subjects. Joshua has only completed three subjects: English, Mathematics and Ancient History.

Joshua also needs to be aware that only 4 units of maths can be included in the ATAR calculation. So taking Mathematics Advanced, Mathematics Extension 1 and Mathematics Extension 2 means that 2-unit Mathematics Advanced will not be available for Joshua’s ATAR calculation, even if he excels in it.

Jessica

If Jessica keeps all her courses she will be eligible for an ATAR. But if Jessica drops a course this may change depending on which course she drops.

For example, if Jessica drops Business Services or Hospitality she will still be eligible for an ATAR as she still meets the ATAR eligibility rules of 8 units of Category A courses and 2 units of Category B courses.

But if Jessica decides to drop Legal Studies she will no longer be eligible for an ATAR as she will only have 6 units of Category A courses.
TOP TIPS FOR CHOOSING HSC COURSES

− Make the link between your choices now and where you want to go after Year 12.
− If you want to get an ATAR, make sure you will be eligible. NSW Year 12 students must complete at least 10 units of ATAR courses. These ATAR courses must include at least:
  • 8 units of Category A courses
  • 2 units of English
  • three Board Developed courses of 2 units or greater
  • four subjects.
  You can include up to 2 units of Category B courses.
− Choose HSC courses that you’re good at and interested in, and that will lay a foundation for your future plans. In particular, choose courses that will prepare you well for the areas of university study you’re planning to pursue.
− If you’re not sure what level maths and English to take, choose the level that suits your ability and future plans, rather than trying to take advantage of how courses are scaled: you will not necessarily get a higher ATAR just by studying a lower level course. And be aware that while unis often increase your selection rank in recognition of your performance in particular HSC courses (usually for Bands 5 and 6), they don’t always reward your performance in the lower level courses, no matter how well you do.
− Just about any combination of courses can lead to a good ATAR; it all depends on how well you do in all your courses in comparison to other students. The table below addresses a number of scaling ‘myths’.
− Check if the uni you want to go to, or the course you want to do, has prerequisites (these can include a high-level maths or English course) and assumed knowledge. Details are published in Part 2 of this booklet.
− To make good choices about what to study, work to the best of your ability and focus on your goals for life after school.

### MYTH

- Some courses are always ‘scaled up’, therefore I should study those.
- Some courses are always ‘scaled down’, therefore I should avoid those.

### FACT

- The way a course is scaled depends entirely on the average academic performance of all the students doing that course that year – and it can change from year to year. For most courses, your scaled mark will be lower than your HSC mark. To get the best possible position and maximise your scaled marks, select the courses you’ll do best in.

### SCALING MYTHS

- I need to study ‘hard’ subjects to get high scaled marks.
- I should study Mathematics Standard 2 rather than Mathematics Advanced to get a better ATAR.

- ‘Hard’ is a subjective term. Everyone has different strengths and interests. Students who achieve an ATAR of 99.95 study a large variety of subjects.
- It’s very difficult to predict which course will lead to a higher scaled mark. Your scaled mark depends on the average academic ability of the students studying that course and your position in the course. When considering which maths course to study, remember that some university courses have prerequisites or assumed knowledge of Mathematics Advanced. It’s important to choose the level of maths that best suits your plans for further study.
## Category A courses

Note: Some course names may change as a result of the Stronger HSC Standards reforms. For further information and updates, visit the NESA website at educationstandards.nsw.edu.au.

### NOTES

1. You can study both Ancient History and Modern History, but there is only one History Extension course. It is considered a course within the subject of either Modern History or Ancient History.

2. The unit value of this course changes depending on whether the course is taken in combination with Mathematics or Mathematics Extension 2. (See page 39.)

3. You must study Music 2 if you wish to study Music Extension.

4. You may study either Studies of Religion I or Studies of Religion II, but not both.

5. You may study only one of the following languages: Croatian continuers, Macedonian continuers, Serbian continuers.

6. An optional HSC written examination in these courses is offered to eligible students. Subject to ATAR rules, you must undertake the optional written examination to have the results from this course available for inclusion in the calculation of your ATAR. Check with your school or the NESA website at educationstandards.nsw.edu.au for more information.
PART 2: INSTITUTION CRITERIA

In this section, UAC’s participating institutions have listed the courses they plan to offer in 2023.
Under each course listed on the following pages, institutions have provided, where relevant, details of the following:
- areas of study within the course
- additional selection criteria
- prerequisites
- assumed knowledge
- recommended studies.

If these details are not provided under the course heading, there is no specific information you need to keep in mind when choosing your HSC courses.

If the institution does not require you to have studied a specific level in your HSC, it is stated as ‘any 2 units of’. For example, where you read ‘any 2 units of English’, this means that any 2-unit English course is acceptable. Institutions that ask for ‘any 2 units of science’ indicate what courses this includes at the beginning of their entry.

**PREREQUISITES**

Prerequisites are HSC courses (or equivalent) you must have studied in order to be considered for admission to certain university courses. There are course prerequisites and subject prerequisites. There are also a small number of courses that require applicants to have completed post-Year 12 studies (e.g., a Diploma of Nursing).

**Course prerequisites**

Some university courses require you to have successfully completed, or achieved a specified standard in, an HSC course or equivalent before you’ll be offered a place in the course. If you do not have the required course prerequisites, you cannot be selected for the course even though you may have met the other admission criteria.

Not all institutions have course prerequisites. Of those that do, some specify a performance band you must have achieved in your HSC course.
Subject prerequisites
Some subjects in a university course require you to have successfully completed, or achieved a specified standard in, an HSC course or equivalent before you are able to enrol in those particular subjects.

If you do not have the required subject prerequisites but have met the admission criteria for the course, you can still be selected for the course, but you may be unable to take the particular subject within the course.

Contact the relevant institution for details of any specified levels of achievement that are required and bridging or introductory courses that can help you achieve the required standard.

ASSUMED KNOWLEDGE
Some institutions assume you have a knowledge of specific HSC courses or equivalent before you begin the course. If you don’t have the assumed level of knowledge but do have a suitable ATAR, you can still be selected for the course but you may have difficulty coping with your studies.

Some institutions offer bridging or introductory courses to help you achieve the required level of assumed knowledge – contact the relevant institution for details.

RECOMMENDED STUDIES
These are HSC or equivalent courses that the institutions suggest will help you in your chosen university course. If you have not studied these HSC courses, your chances of selection are not affected, but you may be offered a bridging course.
ACCOUNTING AND FINANCE

Course prerequisites: Any 2 units of English.

ARTS

Areas of study: Business studies, communications, computing, creative writing, criminology, drama, economics, education studies, English, geography, graphic design, history, international development studies, mathematics, philosophy, politics and international relations, psychology, sociology, study of religions, theological studies, visual arts.

Assumed knowledge: Any 2 units of English. For mathematics: Any 2 units of mathematics (other than Mathematics Standard 2).

BIOMEDICAL SCIENCE

Areas of study: Biomedical sciences.

Course prerequisites: Any 2 units of English, any 2 units of mathematics.

BUSINESS ADMINISTRATION

Areas of study: Business law, economics, human resource management, international business, managing entrepreneurship and innovation, managing organisational change, marketing, organisational behaviour, strategic management.

Course prerequisites: Any 2 units of English.

BUSINESS/COMMERCE AND MANAGEMENT

Areas of study: Accounting; business law; entrepreneurship; event management; finance; human resource management; Indigenous business studies; international business; management; marketing; occupational health, safety and environmental management.

Course prerequisites: Any 2 units of English.
STEPS TO UNI FOR YEAR 10 STUDENTS

**Education (Secondary)**
Strathfield/North Sydney

**Assumed knowledge:** Three Band 5 HSC results, including English and any 2 units of mathematics. *For mathematics:* any 2 units of mathematics (other than Mathematics Standard 2).

**Inclusive Education and Disability Studies**

**Areas of study:** Community services, disability studies and school education.

**Education (Secondary and Special Education)**
Strathfield/North Sydney

**Assumed knowledge:** Three Band 5 HSC results, including English and any 2 units of mathematics. *For mathematics:* any 2 units of mathematics (other than Mathematics Standard 2).

**Education (Secondary) – Exercise Science**
Strathfield

**Areas of study:** Business studies, computing, economics, geography, history, literature, mathematics, modern languages, music, study of religions, visual arts.

**Assumed knowledge:** Three Band 5 HSC results, including English, any 2 units of mathematics.

**Education (Secondary) – Humanities**
Strathfield

**Areas of study:** Computing, drama, economics, English, geography, history, mathematics, sociology, study of religions, visual arts.

**Assumed knowledge:** Three Band 5 HSC results, including English and any 2 units of mathematics. *For mathematics:* Any 2 units of mathematics (other than Mathematics Standard 2).

**Education (Secondary) – Mathematics**
Strathfield

**Areas of study:** Computing, drama, economics, English, geography, history, mathematics, study of religions, visual arts.

**Assumed knowledge:** Three Band 5 HSC results, including English and any 2 units of mathematics. *For mathematics:* Any 2 units of mathematics (other than Mathematics Standard 2).

**Education (Secondary) – Technology**
Strathfield

**Areas of study:** Computing, design and technology (common), food technology, industrial technology, textiles and design.

**Assumed knowledge:** Three Band 5 HSC results, including English and any 2 units of mathematics. *For mathematics:* Any 2 units of mathematics (other than Mathematics Standard 2).

**Education (Secondary) – Visual Arts**
Strathfield

**Areas of study:** Business studies, computing, drama, economics, English, geography, history, mathematics, study of religions, visual arts.

**Assumed knowledge:** Three Band 5 HSC results, including English and any 2 units of mathematics. *For mathematics:* Any 2 units of mathematics (other than Mathematics Standard 2).

**EXERCISE AND SPORTS SCIENCE**

**EXERCISE SCIENCE**

**Areas of study:** Exercise, sports science.

**Recommended studies:** Any 2 units of English, any 2 units of mathematics, Personal Development, Health and Physical Education (PDHPE), plus one of Biology, Chemistry or Physics.

*Only available as a combined degree option – refer to Combined degrees at the end of the ACU entry.*

**GLOBAL STUDIES**

*Only available as a combined degree option – refer to Combined degrees at the end of the ACU entry.*

**HIGH PERFORMANCE SPORT**

**Areas of study:** Coaching, exercise, sports science.

**Course prerequisites:** Any 2 units of English.

**Recommended studies:** Personal Development, Health and Physical Education (PDHPE), any 2 units of mathematics, Biology, Chemistry or Physics.

**LAWS**

**Course prerequisites:** Any 2 units of English.

**MIDWIFERY**

**Areas of study:** Midwifery.

**Course prerequisites:** Any 2 units of English.

**NURSING**

**Areas of study:** Nursing.

**NUTRITION SCIENCE**

**Course prerequisites:** Any 2 units of English.

**OCCUPATIONAL THERAPY**

**Areas of study:** Occupational therapy.

**Course prerequisites:** Any 2 units of English plus at least one of Biology, Chemistry, Physics or Personal Development, Health and Physical Education (PDHPE).

**PARAMEDICINE**

**Areas of study:** Paramedicine.

**PHILOSOPHY**

**Areas of study:** Philosophy.

**PHYSIOTHERAPY**

**Areas of study:** Physiotherapy.

**Course prerequisites:** Any 2 units of English plus at least one of Biology, Chemistry or Physics.

**PSYCHOLOGICAL SCIENCE**

**Areas of study:** Psychology.

**Course prerequisites:** Any 2 units of English.

**PSYCHOLOGY (HONOURS)**

**Areas of study:** Psychology.

**Course prerequisites:** Any 2 units of English.

**SOCIAL WORK**

**Areas of study:** Human rights, social and behavioural sciences, social policy, social work.

**Course prerequisites:** ACT: English (T) (Major) NSW: Any 2 units of English.
SPEECH PATHOLOGY

Areas of study: Speech pathology.
Course prerequisites: Any 2 units of English plus at least one of Biology, Chemistry, Physics, or Personal Development, Health and Physical Education (PDHPE).

THEOLOGY

Areas of study: Ancient languages, biblical studies, early Christian studies, interreligious dialogue, liturgy and sacraments, ministry, moral theology, philosophy and liberal arts, systematic theology/contemporary Christian thought, world religions.

VISUAL ARTS AND DESIGN

Areas of study: 3D/4D object design, art and design history and theory, drawing, graphic design, painting, photography, printmaking, sculpture plus areas of study within Arts (business studies, communication, computing, drama, economics, education studies, geography, history, literature, mathematics, philosophy, politics and international relations, psychology, sociology, study of religions, theological studies, visual arts).
Assumed knowledge: Any 2 units of English.
Recommended studies: Visual Arts.

COMBINED DEGREES

If you intend to undertake combined degrees, check the prerequisites, assumed knowledge and recommended studies for both degrees. Contact the University for further details.

- Arts/Commerce
- Biomedical Science/Business Administration
- Commerce/Business Administration
- Exercise and Sports Science/Nutrition Science
- Exercise Science/Business Administration
- Information Technology/Business Administration
- Nursing/Business Administration
- Nursing/Paramedicine
- Nutrition Science/Business Administration
- Psychological Science/Arts
- Psychological Science/Commerce
- Psychological Science/Exercise and Sports Science
- Theology/Philosophy.

Global Studies

- Arts/Global Studies
- Business Administration/Global Studies
- Commerce/Global Studies
- Laws/Global Studies
- Theology/Global Studies.

Course prerequisites: Refer to the relevant entry for the other area of study.

Laws

- Arts/Laws
- Business Administration/Laws
- Biomedical Science/Laws
- Commerce/Laws
- Laws/Global Studies
- Philosophy/Laws
- Psychological Science/Laws
- Theology/Laws.

Course prerequisites: Refer to the relevant entry for the other area of study.
Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

**CASE MANAGEMENT (DIP)**
- **Areas of study:** Assessment and analysis, child protection framework, community case management facilitation, mental health.
- **Recommended studies:** Any 2 units of English.

**COUNSELLING**
- **Areas of study:** Addictive behaviours counselling, counselling and neuroscience, crisis counselling, mental health and wellness, positive psychology.
- **Recommended studies:** Any 2 units of English.

**PSYCHOLOGICAL SCIENCE**
- **Areas of study:** Intercultural diversity and Indigenous psychology, learning and memory, perception and cognition, psychopathology, research methods, social psychology, statistics.
- **Recommended studies:** Mathematics Advanced, any 2 units of English.

**SOCIAL WORK**
- **Areas of study:** Contemporary society; government, public policy and civil society; human services, psychology.
- **Recommended studies:** Any 2 units of English.
READ THIS FIRST

Where a course is offered at the Canberra campus, both the NSW and ACT prerequisite subject requirements are listed. In addition to meeting the academic requirements for your preferred course, applicants to ANU will be required to meet the:

− Mathematics and English requirement. Literacy and numeracy skills better equip you to excel at ANU and beyond. You’ll meet this requirement if you can demonstrate that during Year 11 or Year 12 you enrolled in and passed one English subject taught over at least one semester, and one mathematics subject taught over at least one semester
− Co-curricular or service requirement. The skills and knowledge you gain outside of the classroom is invaluable and lead to better graduate outcomes. During your application to ANU you’ll provide information on the co-curricular or service activities you have completed during Years 10, 11 or 12.

To learn more about these requirements, visit: anu.edu.au/study/apply.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.
ASIAN STUDIES
Areas of study: Anthropology; Arabic; archaeology; Asian and Pacific culture, media and gender; Asian and Pacific linguistics; Asian history; Asia-Pacific politics; Asia-Pacific security studies; Burmese language; Chinese language; Chinese studies; French language and culture; Hindi language; historical international security; India studies; Indonesian language; Japanese language; Japanese linguistics; Japanese studies; Korean language; Korean studies; Mongolian language; Northeast Asian studies; Pacific studies; peace and conflict studies; Sanskrit language; South Asian studies; Southeast Asian studies; Spanish language; Tetum language; Thai language; Vietnamese language.

FINANCE
Areas of study: Asian capital markets, capital markets, quantitative finance.
Assumed knowledge: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced

FINANCE, ECONOMICS AND STATISTICS
Areas of study: Economics, finance, statistics.
Course prerequisites: ACT: Specialist Mathematics (Major/Minor) (160+) Specialist Methods (Major/Minor) (160+) NSW: Mathematics Extension 1 (Band E3).
Recommended studies: ACT: Specialist Mathematics (Double Major) NSW: Mathematics Extension 2.

GENETICS
Areas of study: Genetics, including the traditional areas of evolutionary, Mendelian, and population genetics; more recent developments in medical and molecular genetics and bioinformatics.
Course prerequisites: ACT: Chemistry (Major) NSW: Chemistry.

HEALTH SCIENCE
Areas of study: Biology, health science, Indigenous health, medical science, population health, science communication.
Assumed knowledge: ACT: Chemistry (Major) NSW: Chemistry.

INFORMATION TECHNOLOGY
Areas of study: Artificial intelligence, cyber security, data science, information systems, IT in new media, software development.
Course prerequisites: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced.

INTERNATIONAL BUSINESS
Areas of study: Asian languages (Chinese, Hindi, Indonesian, Japanese, Korean, Sanskrit, Thai, Vietnamese), European languages (French, German, Italian, Spanish), Middle Eastern languages (Arabic, Persian, Turkish, Urdu), a Latin American language (Spanish), cultural studies and institutions, international business and management.
Assumed knowledge: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced.

INTERNATIONAL SECURITY STUDIES
Areas of study: International security studies plus Arabic, Asia-Pacific security, Burmese language, Chinese language, French language and culture, German language and culture, Hindi language, historical international security, Indonesian language, international relations, Italian language and culture, Japanese language, Korean language, Mongolian language, peace and conflict studies, Persian language, Russian language, Spanish language, Tetum language, Thai language, Vietnamese language, war studies.
Study of security and foreign policy issues is also possible in the Arts and Asian Studies degrees.

LANGUAGES
Areas of study: Ancient Greek, Arabic, Burmese, Chinese, French language and culture, German language and culture, Hindi, Indonesian, Italian language and culture, Japanese, Korean, Latin, Mongolian, Persian, Russian, Sanskrit, Spanish, Tetum, Thai, Vietnamese.

LAW
Areas of study: Law.

ASIAN STUDIES
Areas of study: Anthropology; Arabic; archaeology; Asian and Pacific culture, media and gender; Asian and Pacific linguistics; Asian history; Asia-Pacific politics; Asia-Pacific security studies; Burmese language; Chinese language; Chinese studies; French language and culture; Hindi language; historical international security; India studies; Indonesian language; Japanese language; Japanese linguistics; Japanese studies; Korean language; Korean studies; Mongolian language; Northeast Asian studies; Pacific studies; peace and conflict studies; Sanskrit language; South Asian studies; Southeast Asian studies; Spanish language; Tetum language; Thai language; Vietnamese language.

FINANCE
Areas of study: Asian capital markets, capital markets, quantitative finance.
Assumed knowledge: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced

FINANCE, ECONOMICS AND STATISTICS
Areas of study: Economics, finance, statistics.
Course prerequisites: ACT: Specialist Mathematics (Major/Minor) (160+) Specialist Methods (Major/Minor) (160+) NSW: Mathematics Extension 1 (Band E3).
Recommended studies: ACT: Specialist Mathematics (Double Major) NSW: Mathematics Extension 2.

GENETICS
Areas of study: Genetics, including the traditional areas of evolutionary, Mendelian, and population genetics; more recent developments in medical and molecular genetics and bioinformatics.
Course prerequisites: ACT: Chemistry (Major) NSW: Chemistry.

HEALTH SCIENCE
Areas of study: Biology, health science, Indigenous health, medical science, population health, science communication.
Assumed knowledge: ACT: Chemistry (Major) NSW: Chemistry.

INFORMATION TECHNOLOGY
Areas of study: Artificial intelligence, cyber security, data science, information systems, IT in new media, software development.
Course prerequisites: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced.

INTERNATIONAL BUSINESS
Areas of study: Asian languages (Chinese, Hindi, Indonesian, Japanese, Korean, Sanskrit, Thai, Vietnamese), European languages (French, German, Italian, Spanish), Middle Eastern languages (Arabic, Persian, Turkish, Urdu), a Latin American language (Spanish), cultural studies and institutions, international business and management.
Assumed knowledge: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced.

INTERNATIONAL SECURITY STUDIES
Areas of study: International security studies plus Arabic, Asia-Pacific security, Burmese language, Chinese language, French language and culture, German language and culture, Hindi language, historical international security, Indonesian language, international relations, Italian language and culture, Japanese language, Korean language, Mongolian language, peace and conflict studies, Persian language, Russian language, Spanish language, Tetum language, Thai language, Vietnamese language, war studies.
Study of security and foreign policy issues is also possible in the Arts and Asian Studies degrees.

FINANCE, ECONOMICS AND STATISTICS
Areas of study: Economics, finance, statistics.
Course prerequisites: ACT: Specialist Mathematics (Major/Minor) (160+) Specialist Methods (Major/Minor) (160+) NSW: Mathematics Extension 1 (Band E3).
Recommended studies: ACT: Specialist Mathematics (Double Major) NSW: Mathematics Extension 2.

GENETICS
Areas of study: Genetics, including the traditional areas of evolutionary, Mendelian, and population genetics; more recent developments in medical and molecular genetics and bioinformatics.
Course prerequisites: ACT: Chemistry (Major) NSW: Chemistry.

HEALTH SCIENCE
Areas of study: Biology, health science, Indigenous health, medical science, population health, science communication.
Assumed knowledge: ACT: Chemistry (Major) NSW: Chemistry.

INFORMATION TECHNOLOGY
Areas of study: Artificial intelligence, cyber security, data science, information systems, IT in new media, software development.
Course prerequisites: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced.

INTERNATIONAL BUSINESS
Areas of study: Asian languages (Chinese, Hindi, Indonesian, Japanese, Korean, Sanskrit, Thai, Vietnamese), European languages (French, German, Italian, Spanish), Middle Eastern languages (Arabic, Persian, Turkish, Urdu), a Latin American language (Spanish), cultural studies and institutions, international business and management.
Assumed knowledge: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced.

INTERNATIONAL SECURITY STUDIES
Areas of study: International security studies plus Arabic, Asia-Pacific security, Burmese language, Chinese language, French language and culture, German language and culture, Hindi language, historical international security, Indonesian language, international relations, Italian language and culture, Japanese language, Korean language, Mongolian language, peace and conflict studies, Persian language, Russian language, Spanish language, Tetum language, Thai language, Vietnamese language, war studies.
Study of security and foreign policy issues is also possible in the Arts and Asian Studies degrees.

LANGUAGES
Areas of study: Ancient Greek, Arabic, Burmese, Chinese, French language and culture, German language and culture, Hindi, Indonesian, Italian language and culture, Japanese, Korean, Latin, Mongolian, Persian, Russian, Sanskrit, Spanish, Tetum, Thai, Vietnamese.

LAW
Areas of study: Law.
Mathematical Sciences

Areas of study: Computer science, mathematics, statistics.

Medical Science

Areas of study: Anatomy, biochemistry, ethics, genetics, immunology, microbiology, molecular biology, neuroscience, nutrition, physiology, psychology.
Course prerequisites: ACT: Chemistry (Major) NSW: Chemistry.

Music

Areas of study: Composition, composition for film and video games, music technology, musicology, performance.
Additional selection criteria: Some music courses require an audition.

Pacific Studies

Areas of study: Anthropology; archaeology; biodiversity conversation and management; Chinese language, development studies; environmental studies; French language and culture; gender, sexuality and culture; geography; German language and culture; Hindi language; history; Indonesian language; international relations; Pacific Studies; philosophy; Spanish language; visual arts practice.

Science

Areas of study: Astronomy and astrophysics, biochemistry, biological anthropology, cell and molecular biology, chemistry, computer science, earth science, environmental science, evolution, ecology and organismal biology, geography, marine science, mathematical economics, mathematical finance, mathematical modelling, mathematics, physics, psychology, quantitative environmental modelling, quantitative biology, resource and environmental management, science communication, statistics, sustainability studies and water science.
Subject prerequisites and assumed knowledge: Some science courses have subject prerequisites or assumed knowledge of Mathematics Advanced, Physics or Chemistry. For further information, visit programsandcourses.anu.edu.au.

Environment and Sustainability

Areas of study: Environmental science, quantitative environmental modelling, resource and environmental management, sustainability science.

Psychology

Areas of study: Psychology.

Social Science (Actuarial Studies and Economics)

Areas of study: Actuarial studies, economics, statistics.
Course prerequisites: ACT: Specialist Mathematics (Major/Minor) (160+)/Specialist Methods (Major/Minor) (160+) NSW: Mathematics Extension 1 (Band E3).
Recommended studies: ACT: Specialist Mathematics (Double Major) NSW: Mathematics Extension 2.

Software Engineering (Hons)

Areas of study: Artificial intelligence, cyber security, programming, project management, software development, system design and analysis.
Course prerequisites: ACT: Mathematical Methods (Major)/Further Mathematics (Major)/Specialist Mathematics (Major)/Specialist Methods (Major) NSW: Mathematics Advanced.
Recommended studies: ACT: Specialist Mathematics (Major/Minor) NSW: Mathematics Extension 1.

Statistics

Areas of study: Applied statistics, probability and stochastic processes, statistical data analysis, theoretical statistics.
Course prerequisites: ACT: Specialist Mathematics (Major/Minor) (160+)/Specialist Methods (Major/Minor) (160+) NSW: Mathematics Extension 1 (Band E3).
Recommended studies: ACT: Specialist Mathematics (Double Major) NSW: Mathematics Extension 2.

Visual Arts

Areas of study: Animation and video, ceramics, furniture, glass, gold and silversmithing, painting, photomedia, print media and drawing, sculpture, textiles.
Additional selection criteria: Interview, portfolio.

Flexible Double Degrees

The Australian National University offers flexible double degrees, which allow you to choose from hundreds of possible combinations across three groups:

- Arts, Social Sciences, Business and Science (4 years)
- Engineering or Advanced Computing (5 years)
- Law (5 years).

You can combine any two courses (for which you meet the selection rank) from the group.

Flexible Double Arts, Social Sciences, Business and Science

By selecting this group as a preference, you can choose any two of the following bachelor degrees at the time of accepting your offer:

- Accounting
- Actuarial Studies*
- Applied Data Analytics
- Archaeological Practice
- Art History and Curatorship
- Arts
- Asian Studies
- Biotechnology* (cannot be combined with Genetics or Medical Science)
- Business Administration
- Classical Studies
- Commerce
- Criminology
- Design*
- Development Studies
- Economics
- Environment and Sustainability
- European Studies
- Finance
- Genetics* (cannot be combined with Biotechnology or Medical Science)
- Information Technology*
- International Relations
- International Security Studies
- Languages
- Mathematical Sciences*
- Medical Science* (cannot be combined with Biotechnology or Genetics)
- Middle Eastern and Central Asian Studies
- Music*
- Pacific Studies
- Public Policy
- Political Science
- Politics, Philosophy and Economics
- Science
- Science (Psychology)
- Statistics*
- Visual Arts*
Flexible Double Engineering or Advanced Computing

By selecting this group as a preference, you can choose any one of the following bachelor degrees:
- Advanced Computing (Hons)*
- Advanced Computing [Research and Development] (Hons)*
- Engineering (Hons)*
- Engineering [Research and Development] (Hons)*
- Software Engineering (Hons)*

plus any one of the following bachelor degrees at the time of accepting your offer:
- Accounting*
- Actuarial Studies*
- Applied Data Analytics
- Archaeological Practice^*
- Art History and Curatorship^*
- Arts
- Asian Studies*
- Biotechnology*
- Business Administration
- Classical Studies*
- Commerce
- Criminology^*
- Design^*
- Development Studies^*
- Economics
- Environment and Sustainability
- European Studies*
- Finance
- Genetics* ^
- Information Technology* (cannot be combined with Software Engineering or Advanced Computing)
- International Relations*
- International Security Studies
- Languages*
- Mathematical Sciences*
- Medical Science*
- Middle Eastern and Central Asian Studies
- Music*
- Pacific Studies
- Public Policy
- Political Science
- Politics, Philosophy and Economics
- Science
- Science (Psychology)
- Statistics*
- Visual Arts*

Flexible Double Law

By selecting this group as a preference, you choose Law plus any one of the following bachelor degrees at the time of accepting your offer:
- Accounting
- Actuarial Studies*
- Applied Data Analytics
- Archaeological Practice
- Art History and Curatorship
- Arts
- Asian Studies
- Biotechnology*
- Business Administration
- Classical Studies
- Commerce
- Criminology
- Design*
- Development Studies
- Economics
- Environment and Sustainability
- European Studies
- Finance
- Genetics*
- Information Technology*
- International Relations
- International Security Studies
- Languages
- Mathematical Sciences*
- Medical Science*
- Middle Eastern and Central Asian Studies
- Music*
- Pacific Studies
- Public Policy
- Political Science
- Politics, Philosophy and Economics
- Science
- Science (Psychology)
- Statistics*
- Visual Arts*

VERTICAL DEGREES

The Australian National University offers a range of vertical (Bachelor/Master) options. For details, search for ‘study options’ at anu.edu.au then select ‘Flexible Vertical Double Degrees’; or visit programsandcourses.anu.edu.au to create your own program. Refer to the single bachelor degree entry for course prerequisites, major studies and other requirements.

UNDERGRADUATE RESEARCH DEGREES

The Australian National University offers the following undergraduate research degrees:
- B Advanced Computing [Research and Development] (Hons)
- B Engineering [Research and Development] (Hons)
- B Finance, Economics and Statistics (Hons)
- B Science (Advanced) (Hons)
- B Philosophy (Hons) Science*
- B Philosophy (Hons) Asia and the Pacific*

B Philosophy courses are also available as joint degrees with the National University of Singapore. Contact the Australian National University for more information about these courses. For more information, search for ‘study options’ at anu.edu.au.

* Courses marked with an asterisk include prerequisites and/or additional selection criteria – see main area of study for requirements.

* Engineering (Research and Development) (Honours) cannot be combined with these programs
Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

INFORMATION AND COMMUNICATIONS TECHNOLOGY (ASSOCDEG)
Areas of study: Computing and information technology.

INFORMATION TECHNOLOGY
Areas of study: Computing and information technology.

LAWS
LAWS (DIP)
Areas of study: Law, legal studies.

LAWS (COMBINED)
Areas of study: Business, finance, law, legal studies.

LEGAL STUDIES (ASSOCDEG)
Areas of study: Law, legal studies.

MEDICAL LABORATORY SCIENCE
Areas of study: Health, medical laboratory science.
Assumed knowledge: Chemistry.

MIDWIFERY
Areas of study: Antenatal care, care of the newborn baby, labour and birthing care, postnatal care.

NETWORK ENGINEERING (ASSOCDEG)
NETWORK ENGINEERING (DIP)
Areas of study: Computing, information technology.

NURSING
Areas of study: Health, medicine, nursing.

PUBLIC HEALTH
Areas of study: Epidemiology, cultural safety, global and environmental health.

PSYCHOLOGICAL SCIENCE
Areas of study: Abnormal psychology, cognitive psychology, learning and motivation, psychology, research methods, social–cultural psychology.

PSYCHOLOGY (DIP)
Areas of study: Psychology.

SCIENCE
SCIENCE (DIP)
Areas of study: Biology, biomedical science, chemistry, ecology, geographic information science, health and physical education, mathematics and physics, science.

SOCIAL CARE (DIP)
Areas of study: Humanities, social sciences.

SOCIAL WORK
Areas of study: Humanities, social sciences.

SOFTWARE ENGINEERING (HONS)
Areas of study: Computing and information technology, engineering.
Assumed knowledge: Mathematics Advanced.

COMBINED AND DOUBLE DEGREES
- Computer Science/Master of Information Technology
- Engineering Science (Civil and Structural)/Master of Engineering
- Engineering Science (Electrical and Electronics)/Master of Engineering
- Engineering Science (Mechanical)/Master of Engineering
- Health Science/Master of Nutrition
- Health Science/Master of Occupational Therapy
- Health Science/Master of Speech and Language Therapy
READ THIS FIRST

When you read ‘any 2 units of science’ this can include Biology, Chemistry, Physics, Earth and Environmental Science or Investigating Science.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

AGRICULTURAL BUSINESS MANAGEMENT

**Areas of study:** Agricultural business management (farm, horticultural, land, viticultural).

AGRICULTURE

**Areas of study:** Agribusiness, agronomy, livestock production.

**Assumed knowledge:** Mathematics Standard 2, Investigating Science.

**Recommended studies:** Biology and/or Chemistry, Mathematics Advanced.

ANIMAL SCIENCE

**Animal Science**

**Areas of study:** Animal production and management, biomedical science, equine science and management, wildlife conservation and management.

**Assumed knowledge:** Chemistry, Mathematics Advanced.

**Equine Science**

**Areas of study:** Equine breeding and management, equine business management, equine exercise physiology, equine health and welfare, equine nutrition, equine science.

**Assumed knowledge:** Biology, Chemistry, Mathematics Advanced.

APPLIED SCIENCE

**Outdoor Recreation and Ecotourism**

**Parks, Recreation and Heritage**

**Areas of study:** Indigenous and cultural heritage, outdoor recreation, visitor services and open space management, wildlife and conservation.

ARTS

**Areas of study:** Business, education, English, environmental studies, history, human services, justice studies, philosophy, politics, sociology, writing and publishing.

**Recommended studies:** Any 2 units of English.

BUSINESS

**Accounting**

**Business Studies**

**Finance**

**Human Resource Management**

**Management**

**Marketing**

**Assumed knowledge:** Mathematics Advanced.

COMMUNICATION AND CREATIVE INDUSTRIES

**Acting and Performance**

**Theatre Media**

**Areas of study:** For Acting and Performance: Acting for stage and screen and emergent media, performance design and production. For Theatre Media: Non-traditional performance, scriptwriting, behind the scenes.

**Recommended studies:** Drama, English Standard or English Advanced, Design and Technology or Visual Arts or VET Entertainment.

**Additional selection criteria:** Audition, course consultation.

**Advertising**

**Public Relations**

**Radio**

**Areas of study:** For Advertising: Managing national campaigns for TV, radio and the internet. For Public Relations: Shaping public opinion. For Radio: Broadcasting, sales and multimedia.

**Recommended studies:** English Standard or English Advanced.
Digital Media Production
Visual Art and Design
Screen and Media
Visualisation and Interactivity
Interdisciplinary Innovation

Areas of study: For Digital Media Production: Documentaries, voice assistants and websites. For Visual Art and Design: Designer in user experience/interface, graphic design, photography. For Screen and Media: Film, television, online producing, multiplatform, sound design. For Visualisation and Interactivity: 2D and 3D animation, visual effects production, games design, virtual reality.

Recommended studies: Design and Technology or Visual Arts or Drama or History.

Journalism
Journalism and International Studies

Areas of study: For Journalism: Reporting for broadcast and the web. For Journalism and International Studies: Reporting from abroad.

Recommended studies: English Advanced.

EDUCATION

Early Childhood and Primary

Areas of study: Teaching (early childhood), teaching (primary).

Assumed knowledge: Entry standards for initial teacher education courses are three Band 5 results, including English, in the NSW HSC or equivalent, plus Band 4 in mathematics for primary teacher courses. Charles Sturt University courses are designed for and accredited with alternative entry, as all students undertake core discipline studies in the first two years of study equivalent to three Band 5 results, including English and Mathematics Advanced, before undertaking curriculum and professional studies.

Recommended studies: Any 2 units of English, any 2 units of mathematics.

Outdoor Education

Areas of study: Teaching (outdoor education) and Teaching (secondary) in HSIE/geography, biology or Earth and environmental science.

Assumed knowledge: Entry standards for initial teacher education courses are three Band 5 results, including English, in the NSW HSC or equivalent. Charles Sturt University courses are designed for and accredited with alternative entry, as all students undertake core discipline studies in the first two years of study equivalent to three Band 5 results, including English and Mathematics Advanced, before undertaking curriculum and professional studies.

Recommended studies: Any 2 units of English, any 2 units of mathematics.

K-12

Areas of study: Teaching (primary) and teaching (secondary) in human society and its environment/business studies, English, mathematics, human society and its environment/modern history, science (biology, chemistry, physics), human society and its environment/geography, human society and its environment/legal studies, visual arts, drama or Personal Development, Health and Physical Education (PDHPE). Majors are dependent on campus offerings and study may be mixed mode (online and on-campus).

Assumed knowledge: Entry standards for initial teacher education courses are three Band 5 results, including English, in the NSW HSC or equivalent, plus Band 4 in mathematics for primary teacher courses. Charles Sturt University courses are designed for and accredited with alternative entry as all students undertake core discipline studies in the first two years of study equivalent to three Band 5 results, including English and Mathematics Advanced, before undertaking curriculum and professional studies.

Recommended studies: Any 2 units of mathematics.

Technology and Applied Studies

Areas of study: Teaching (secondary school) design and technology and one of the following: agriculture, food technology, industrial technology and information technology (software design, information systems). Food and industrial technology specialists can also choose an additional teaching area in graphics and multimedia or textiles.

Assumed knowledge: Entry standards for initial teacher education courses are three Band 5 results, including English, in the NSW HSC or equivalent. Charles Sturt University courses are designed for and accredited with alternative entry, as all students undertake core discipline studies in the first two years of study equivalent to three Band 5 results, including English and mathematics, before undertaking curriculum and professional studies.

Recommended studies: Any 2 units of English, any 2 units of mathematics, Design and Technology and/or any of the following: Agriculture, Food Technology, Industrial Technology, Information Processes and Technology, Software Design and Development, Textiles and Design For agriculture and food technology: Chemistry.

ENGINEERING

Areas of study: Entrepreneurship, structures, transport and infrastructure, water resources.

Assumed knowledge: Any 2 units of English, any 2 units of mathematics

Recommended studies: Chemistry, Physics.

Additional selection criteria: Supplementary application form, interview.

High-achieving students without an extensive mathematics background can still be accommodated in this program. A minimum level of familiarity with calculus is necessary.

ENVIRONMENTAL SCIENCE AND MANAGEMENT

Recommended studies: Geography or any 2 units of science.

EXERCISE SCIENCE

Areas of study: Exercise science, sports management, sports media, sports science, teaching.

Assumed knowledge: Any 2 units of English, any 2 units of mathematics.

Recommended studies: Any 2 units of science.

HEALTH SCIENCE

Clinical Practice (Paramedic)

Assumed knowledge: Biology, Mathematics Advanced, any 2 units of English.

Recommended studies: Investigating Science, first-aid training, medical terminology.

Clinical Science

Assumed knowledge: Chemistry, Mathematics Advanced.

Dental Science

Assumed knowledge: Chemistry, Mathematics Advanced, Physics.

Recommended studies: English Standard.

Additional selection criteria: Refer to csu.edu.au/courses/dental-science.

Health and Rehabilitation Science

Assumed knowledge: English Standard.

Recommended studies: Biology.

Occupational Therapy

Assumed knowledge: English Standard.

Recommended studies: Biology.

### INFORMATION TECHNOLOGY

**Computer Science**
- **Areas of study:** Computer science, games programming
- **Assumed knowledge:** Mathematics Advanced.

**Information Technology**
- **Areas of study:** Business analysis, network engineering, software design and development, systems administration.

### LAW
- **Areas of study:** Law.
- **Assumed knowledge:** English Advanced, Legal Studies.

### MEDICAL RADIATION SCIENCE
- **Areas of study:** Medical imaging, nuclear medicine, radiation therapy.
- **Assumed knowledge:** Mathematics Advanced, Physics.

### MEDICAL SCIENCE
- **Areas of study:** Biotechnology, clinical physiology, medical science, pathology.
- **Assumed knowledge:** Chemistry, Mathematics Advanced.

### NURSING
- **Assumed knowledge:** English Standard, Mathematics Advanced, Biology, Chemistry.
- **Recommended studies:** Personal Development, Health and Physical Education (PDHPE), first-aid certificate, mental health first-aid certificate.

### PHARMACY
- **Assumed knowledge:** Chemistry, Mathematics Advanced.
- **Recommended studies:** Biology.

### PSYCHOLOGY
- **Areas of study:** Psychology, social science, sociology. Students also complete a minor study in another discipline (e.g., biology, business, English, history and politics, justice studies, law, social welfare).

### SCIENCE
- **Areas of study:** Analytical chemistry, conservation biology, mathematics, microbiology and immunology, physics, plant science, spatial science
- **Assumed knowledge:** Mathematics Advanced, any 2 units of science
- **Recommended studies:** Biology, Chemistry and/or Physics.

### General Studies (Science)
- **Recommended studies:** Any 2 units of science.

### SOCIAL SCIENCE
- **Areas of study:** Criminal justice, psychology.

### SOCIAL WORK
- **Areas of study:** Human rights, psychology, social work, sociology.
- **Recommended studies:** Society and Culture.

### THEOLOGY
- **Areas of study:** Biblical studies, church history, systematic and practical theology.

### VETERINARY SCIENCE
- **Veterinary Biology/Veterinary Science**
  - **Assumed knowledge:** Biology, Chemistry, Mathematics Advanced.
  - **Additional selection criteria:** Supplementary application form, interview.
- **Veterinary Technology**
  - **Areas of study:** Clinical technology, large animal technology, practice management.
  - **Assumed knowledge:** Chemistry, Mathematics Advanced.

### COMBINED DEGREES
If you intend to undertake combined degrees, check the additional selection criteria, assumed knowledge and recommended studies for both degrees. Contact the University for further details.

- Advertising/Marketing
- Nursing/Clinical Practice (Paramedic)
- Public Relations/Business Studies
READ THIS FIRST

When you read ‘any 2 units of science’ this can include Biology, Chemistry, Physics, Earth and Environmental Science or Investigating Science.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

**ACCIDENT FORENSICS**
Areas of study: Accident analysis, accident phenomenology, forensic engineering, human factors investigation, investigation methods, occupational health and safety.
Course prerequisites: English Standard.
Recommended studies: Any 2 units of science.

**ACCOUNTING**
Areas of study: Accounting, business computing, contract law, human resource management, marketing, organisational behaviour, property, public relations.
Recommended studies: English Standard, Mathematics Advanced.

**AGRICULTURE**
Areas of study: Agricultural business, cropping, livestock, horticulture, landcare.
Course prerequisites: English Standard.
Recommended studies: Biology, Mathematics Advanced.

**ALLIED HEALTH**
Areas of study: Human body systems, the role of allied health practitioners and healthcare in contemporary society.
Course prerequisites: English Standard.
Recommended studies: Biology, Chemistry, Physics.

**ARTS**
**ARTS (DIP)**
Areas of study: Business, creative writing, digital media, English and cultural studies, geography and environmental studies, history, journalism, languages, liberal arts, psychology, social enquiry.
Course prerequisites: English Standard.

**AVIATION FLIGHT OPERATIONS**
**AVIATION FLIGHT OPERATIONS (ASSOC DEG)**
Areas of study: Aerodynamics, air service operations, air traffic control, aircraft systems, airspace classifications, flight service and handling emergencies, meteorology, navigation, pilot licences and ratings.
Recommended studies: English Standard, Mathematics Advanced, Physics.

**BUILDING DESIGN**
**BUILDING DESIGN (ASSOC DEG)**
Areas of study: Contract administration, design of residential and commercial buildings.
Recommended studies: English Standard, Mathematics Advanced.
ENGINEERING

ENGINEERING (ASSOC DEG)
Areas of study: For Engineering: Civil, electrical, mechanical, mechatronics, mining. For Engineering (Assoc Deg): Civil, electrical, geology, mechanical, mining.
Recommended studies: For Engineering: Mathematics Extension 1, Physics. For Engineering (Assoc Deg): English Standard, Mathematics Advanced, any 2 units of science.

ENGINEERING TECHNOLOGY
Areas of study: Engineering: civil, electrical, mechanical.
Course prerequisites: English Standard, Mathematics Advanced.
Recommended studies: Mathematics Extension 1, Physics.

ENVIRONMENTAL SCIENCE
Areas of study: Environmental geography, land management, water management.
Course prerequisites: English Standard.
Recommended studies: Biology, Chemistry, Earth and Environmental Science.

EXERCISE AND SPORTS SCIENCE
Areas of study: Anatomy, biomechanics, motor control, physiology, psychology, sports management.
Course prerequisites: English Standard.

INFORMATION AND COMMUNICATIONS TECHNOLOGY (DIP)
Areas of study: Application development, business analysis, network security.
Course prerequisites: English Standard.

INFORMATION TECHNOLOGY
INFORMATION TECHNOLOGY CO-OP
INFORMATION TECHNOLOGY (ASSOC DEG)
Areas of study: Application development, business analysis, cyber-security.
Course prerequisites: English Standard.
Recommended studies: Information Processes and Technology, Software Design and Development.

LAWS
Areas of study: Administrative law, commercial law, constitutional law, contracts, corporations law, criminal law, family law, jurisprudence, legal drafting, property law, torts, trusts.
Course prerequisites: English Standard.

MEDICAL LABORATORY SCIENCE (HONOURS)
Areas of study: Medical laboratory science.
Course prerequisites: English Standard.
Recommended Study: Mathematics Advanced, Biology, Chemistry.

MEDICAL SCIENCE
Areas of study: Biotechnology, clinical investigation, nutrition.
Course prerequisites: English Standard.
Recommended studies: Biology, Chemistry, Mathematics Advanced.

MEDICAL SONOGRAPHY
Areas of study: Abdominal sonography, musculoskeletal sonography, paediatric sonography, superficial structures in ultrasound, ultrasound obstetrics and gynaecology, vascular sonography.
Course prerequisites: English Standard and one of Chemistry, Biology or Physics.
Recommended studies: Chemistry, Biology, Mathematics Advanced, Physics.

MUSIC
MUSIC (DIP)
Areas of study: Classical, jazz or contemporary popular music; music history and music technology; music studies; western music.
Recommended studies: Music 2.

NURSING
Areas of study: Nursing.
Recommended studies: English Standard, Biology, Chemistry, Mathematics Advanced.

OCCUPATIONAL HEALTH AND SAFETY
OCCUPATIONAL HEALTH AND SAFETY (ASSOC DEG)
Areas of study: Environmental studies, human factors, liberal studies, occupational health and safety, public health, safety science.
Course prerequisites: English Standard.
Recommended studies: Mathematics Advanced, Biology, Chemistry, or Physics.

PODIATRY
Areas of study: Anatomy, biomechanics, pharmacology, physiology, podiatry, psychology.
Course prerequisites: English Standard and one of Chemistry, Biology or Physics.
Recommended studies: Mathematics Advanced.

PROPERTY
Areas of study: Asset management, facility management, property finance, property management, property valuation.
Recommended studies: English Standard, Mathematics Advanced.

PSYCHOLOGICAL SCIENCE
Areas of study: Data analysis, human development, psychology, research methods.
Course prerequisites: English Standard.
Recommended studies: Mathematics Advanced, any 2 units of science.

PUBLIC HEALTH
PUBLIC HEALTH (ASSOC DEG)
Areas of study: Environmental health, environmental science, exercise science, health promotion, Indigenous studies, management and human resources, nutrition science, occupational health and safety.
Recommended studies: Biology, Chemistry, English Standard, Physics.

SCIENCE
Areas of study: Applied biology, applied chemistry.
Course prerequisites: English Standard.
Recommended studies: Biology, Chemistry, Mathematics Advanced.
SELECTING YOUR HSC SUBJECTS?

UAC’s FREE ONLINE TOOL – SUBJECT COMPASS – can help you find your way to the HSC courses that are right for you. Tell us about your interests, skills and goals and we’ll make some suggestions.

My Interests
I know what I’m interested in

My Skills
I know what I’m good at

My Personality
I know the environment I’d like to work in

My Uni Course
I know what I want to study at uni

My Career
I know my intended career path

HSC subject selection made easy.
Get started at

uac.edu.au/subjectcompass

SCIENCE (CHIROPRACTIC)
Areas of study: Chemistry fundamentals, foundations of biochemistry, foundations of chiropractic.
Course prerequisites: English Standard.
Recommended studies: Biology, Chemistry, Physics.

SCIENCE (CRIMINOLOGY AND PSYCHOLOGY)
Areas of study: Criminal justice, criminology, psychology, human development.
Course prerequisites: English Standard.
Recommended studies: Mathematics Advanced, any 2 units of science.

SOCIAL WORK
Areas of study: Advocacy, counselling, crisis intervention, social justice.
Course prerequisites: English Standard.

COMBINED DEGREES
If you intend to undertake combined degrees, check the prerequisites, assumed knowledge and recommended studies for both degrees. Contact the University for further details.

STEPS TO UNI FOR YEAR 10 STUDENTS

EDUCATION
Areas of study: Primary education, secondary education.
Course prerequisites: Any 2 units of English (Band 3) plus one of Mathematics Standard 2, Mathematics Advanced, Mathematics Extension 1 or Mathematics Extension 2 (Band 3), plus non-academic entry requirements.
For Primary (selected in second year): Any 2 units of science (Band 3).
For Secondary (selected in second year): Students select teaching areas that they have successfully studied (at Band 3) in their senior schooling.
For the mathematics teaching area: Mathematics Advanced or Mathematics Extension 1 or Mathematics Extension 2.
For biology, chemistry or physics teaching areas: Biology, Chemistry or Physics respectively.

This program meets registration requirements for the Queensland College of Teachers. Applicants wishing to obtain registration in NSW will need to ensure that they meet the NSW Education Standards Authority registration requirements. For further information, visit educationstandards.nsw.edu.au.

ENGINEERING (HONOURS)
Areas of study: Civil, electrical and electronic, mechanical, software.
Course prerequisites: Any 2 units of English (Band 3), Mathematics Advanced.
Recommended studies: One of Physics, Chemistry, Mathematics Extension 1 or Mathematics Extension 2.

ENVIRONMENTAL SCIENCE
Areas of study: Ecology and conservation, environmental management, soil and water science, urban environments.
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Standard 2 or Mathematics Advanced.
Recommended studies: One of Biology, Chemistry or Physics.

EXERCISE SCIENCE
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: One of Biology, Chemistry, Physics or Mathematics Advanced.

GOVERNMENT AND INTERNATIONAL RELATIONS
Areas of study: Asian business, Chinese language, economics, Indonesian international business, international relations, Islam-West relations, Italian language, Japanese language, politics and public policy, Spanish language.
Course prerequisites: Any 2 units of English (Band 3).

HEALTH SCIENCE
Areas of study: Communications and media, environmental health, environmental toxicology, information technology, non-major options also available.
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: One of Biology, Chemistry, Physics or Mathematics Advanced.

HUMAN SERVICES
Course prerequisites: Any 2 units of English (Band 3).

INDUSTRIAL DESIGN
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Standard 2 or Mathematics Advanced.

INFORMATION TECHNOLOGY
Areas of study: Information systems, networks and security, software development.
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Standard 2 or Mathematics Advanced.

INTELLIGENT DIGITAL TECHNOLOGIES
Areas of study: Internet of Things (IoTs) and robotics, programming for visualisation and entertainment.
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Advanced.

INTERNATIONAL TOURISM AND HOTEL MANAGEMENT
Areas of study: Hospitality, tourism management. Second majors: Event management, human resource management, management, marketing, real estate and property development, sport management.
Course prerequisites: Any 2 units of English (Band 3).

LANGUAGES AND LINGUISTICS
Areas of study: Chinese, Italian, Japanese, linguistics, Modern Greek, Spanish. Students can study languages at other campuses where program structure allows. Modern Greek can be taken via cross-institutional study online through Flinders University.
Course prerequisites: Any 2 units of English (Band 3).

LAWS (HONS)
Course prerequisites: Any 2 units of English (Band 3).

LAWS (HONS) (COMBINED)
The following combined Laws courses are available:
− Laws (Hons)/Arts
− Laws (Hons)/Business
− Laws (Hons)/Criminology and Criminal Justice
− Laws (Hons)/Environmental Science
− Laws (Hons)/Government and International Relations
− Laws (Hons)/Psychological Science.
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: For Environmental Science/Laws: Mathematics Standard 2 or Mathematics Advanced.
Recommended studies: For Environmental Science/Laws: One of Biology, Chemistry or Physics.

MARINE SCIENCE
Areas of study: Coastal management, coastal oceanography, marine chemistry, marine ecology.
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Standard 2 or Mathematics Advanced.
Recommended studies: At least one of Biology, Chemistry or Physics.

MEDICAL LABORATORY SCIENCE
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Advanced plus one of Biology, Chemistry or Physics.

MEDICAL SCIENCE
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Advanced plus one of Biology, Chemistry or Physics.
NURSING
Course prerequisites: Any 2 units of English (Band 3).

NUTRITION AND DIETETICS
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Biology, Chemistry, Mathematics Advanced.

OCCUPATIONAL THERAPY
Course prerequisites: Any 2 units of English (Band 3) plus one of Biology, Chemistry or Physics (Band 3).

PARAMEDICINE
Course prerequisites: Any 2 units of English (Band 3) plus one of Biology, Chemistry, Physics or Mathematics Advanced (Band 3).

PHARMACOLOGY AND TOXICOLOGY
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Advanced or Mathematics Extension 1 or Mathematics Extension 2 plus one of Biology, Chemistry or Physics.

PHARMACY
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Advanced plus one of Biology, Chemistry or Physics.

PHYSIOTHERAPY
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Advanced or Mathematics Extension 1 or Mathematics Extension 2 plus one of Biology, Chemistry or Physics.

PSYCHOLOGICAL SCIENCE
Course prerequisites: Any 2 units of English (Band 3).

PSYCHOLOGY (HONS)
Course prerequisites: Any 2 units of English (Band 3).

PUBLIC HEALTH
Course prerequisites: Any 2 units of English (Band 3).

SCIENCE
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: Mathematics Standard 2 or Mathematics Advanced.
Recommended studies: One of Biology, Chemistry or Physics.

SOCIAL SCIENCE
Areas of study: Communication and social change, economics, environmental sustainability, global security threats, media, politics in Asia, social justice.
Course prerequisites: Any 2 units of English (Band 3).

SOCIAL WORK
Course prerequisites: Any 2 units of English (Band 3).

SPORT DEVELOPMENT
Course prerequisites: Any 2 units of English (Band 3).
Assumed knowledge: One of Biology, Chemistry, Physics, Mathematics Standard 2 or Mathematics Advanced.

URBAN AND ENVIRONMENTAL PLANNING
Course prerequisites: Any 2 units of English (Band 3).
Recommended studies: Mathematics Standard 2 or Mathematics Advanced.

COMBINED DEGREES
If you intend to undertake combined degrees, check the prerequisites, assumed knowledge and recommended studies for both degrees. Contact the University for further details.
- Arts/Business
- Business/Data Science
- Business/Government and International Relations
- Business/International Business
- Creative and Interactive Media/Business
- Criminology and Criminal Justice/Information Technology
- Dental Technology/Dental Prosthetics
- Design/Business
- Engineering (Honours)/Business
- Engineering (Honours)/Computer Science
- Engineering (Honours)/Environmental Science
- Engineering (Honours)/Industrial Design
- Engineering (Honours)/Information Technology
- Engineering (Honours)/Science
- Environmental Science/Business
- Environmental Science/Data Science
- Exercise Science/Business
- Exercise Science/Psychological Science
- Government and International Relations/Criminology and Criminal Justice
- Human Services/Criminology and Criminal Justice
- Information Technology/Business
- International Tourism and Hotel Management/Business
- Pharmacology and Toxicology/Business
- Psychological Science/Criminology and Criminal Justice
- Psychological Science/M Mental Health Practice
- Psychological Science/M Rehabilitation Counselling
- Science/Arts
- Science/Business
- Science/Data Science
- Science/Information Technology
- Sport Development/Business
- Urban and Environmental Planning/Science
Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations of elective subjects within the course.

BUSINESS

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

BUSINESS (ENTREPRENEURSHIP)

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

BUSINESS (INTERNATIONAL TOURISM)

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

BUSINESS (MARKETING)

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

BUSINESS (SPORTS MANAGEMENT)

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

BUSINESS MANAGEMENT (ACCOUNTING)

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

BUSINESS MANAGEMENT (FASHION & GLOBAL BRAND MANAGEMENT)

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

EVENT MANAGEMENT

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

HOSPITALITY MANAGEMENT

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

PROPERTY (DEVELOPMENT, INVESTMENT AND VALUATION)

**Recommended studies:** Completion of NSW HSC (or equivalent) with a minimum Band 2 in English Standard or English EAL/D and Mathematics Standard 2.

**Additional selection criteria:** Interview.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

### ACCOUNTING

**Areas of study:** Accounting, auditing, economics, financial management, taxation.

**Course prerequisites:** Any 2 units of English (min. standard required).

### AGribusiness

**Areas of study:** Accounting, agribusiness, business, economics, management, marketing.

**Course prerequisites:** Any 2 units of English (min. standard required).

### AGRICULTURAL SCIENCES

**Areas of study:** Agribusiness, agricultural marketing, agricultural science, agriculture, agronomy, animal and plant biology, plant and animal production, soil science.

**Course prerequisites:** Any 2 units of English, plus any 2 units of mathematics (min. standards required).

### ANIMAL AND VETERINARY BIOSCIENCES

**Areas of study:** Animal and plant biology, animal biotechnology, animal breeding, animal health, animal science, animal welfare, biochemistry, biology, genetics, microbiology, molecular and cell biology, nutrition and feed production, plant and animal production, veterinary science, zoology.

**Course prerequisites:** Any 2 units of English (min. standard required).

### ARTS

**Areas of study:** Aboriginal studies, ancient societies and human origins, anthropology, Asian studies, languages, classics and ancient history, creative and professional writing, crime, justice and legal studies, English, environmental humanities, gender, history, international studies, linguistics, philosophy, politics, screen media performance, sexuality and diversity, sociology, sustainability and development, visual cultures.

**Course prerequisites:** Any 2 units of English (min. standard required).

### BIOLOGICAL SCIENCES

**Areas of study:** Animal and plant biology, biochemistry, biosciences, biotechnology, botany, ecology, environmental management, genetics, human biology, microbiology, molecular biology, physiology, zoology.

**Course prerequisites:** Any 2 units of English (min. standard required).

### BIOMEDICAL SCIENCE

**Areas of study:** Biochemistry, biomedical science, biosciences, cell and molecular biology, chemistry, health, medical science, pharmacology.

**Course prerequisites:** Any 2 units of English (min. standard required).

### BIOMEDICAL SCIENCE (MEDICAL)

**Areas of study:** Biochemistry, biomedical science, biosciences, cell and molecular biology, chemistry, health, medical science, pharmacology, pre-medicine.

**Course prerequisites:** Any 2 units of English (min. standard required).

### BUSINESS

**Areas of study:** Accounting, economics, finance, management, marketing.

**Course prerequisites:** Any 2 units of English (min. standard required).

### BUSINESS/ARTS

**Areas of study:** Accounting, economics, English, finance, history, management, marketing, sociology.

**Course prerequisites:** Any 2 units of English (min. standard required).

### CIVIL ENGINEERING (HONS)

**Areas of study:** Civil engineering.

**Course prerequisites:** Any 2 units of English plus Mathematics Advanced or Mathematics Extension 1 or Mathematics Extension 2 (min. standards required).
**COMMERCED**

**Areas of study:** Accounting, economics, financial management, management, marketing.

**Course prerequisites:** Any 2 units of English (min. standard required).

**CREATIVE ARTS**

**Areas of study:** Visual arts.

**Course prerequisites:** Any 2 units of English (min. standard required).

**CRIMINOLOGY/LAWS**

**Areas of study:** Criminology, law.

**Course prerequisites:** Any 2 units of English (min. standard required).

**EDUCATION**

**Areas of study:** Primary education, secondary education.

**Course prerequisites:** Any 2 units of English, any 2 units of mathematics (min. standards required).

**EDUCATIONAL STUDIES**

**Areas of study:** Business, curriculum studies, humanities, psychology, special education and student welfare.

**Course prerequisites:** Any 2 units of English (min. standard required).

**ENGINEERING HONOURS (INDUSTRIAL)**

**Areas of study:** Engineering (industrial).

**Course prerequisites:** Any 2 units of English plus Mathematics Advanced or Mathematics Extension 1 or Mathematics Extension 2 (min. standards required).

**HEALTH SCIENCES**

**Areas of study:** Health and medical sciences, health and sustainability, health promotion, public health, rehabilitation counselling, sports counselling and athlete welfare.

**Course prerequisites:** Any 2 units of English plus one of Biology, Chemistry, Mathematics Advanced, Physics or Personal Development, Health and Physical Education (PDHPE) (min. standards required).

**HEALTH SCIENCES (MEDICAL CLASSIFICATION)/HEALTH INFORMATION MANAGEMENT**

**Areas of study:** Digital health.

**Course prerequisites:** Any 2 units of English plus one of Biology, Chemistry, Mathematics Advanced, Physics or Personal Development, Health and Physical Education (PDHPE) (min. standards required).

**INFORMATION TECHNOLOGY**

**Areas of study:** Documentation and report evaluation, estimation, IT systems analysis, programming and networking, project management, systems design and development, website and software development.

**Course prerequisites:** Any 2 units of English (min. standard required).

**INTERNATIONAL BUSINESS**

**Areas of study:** Accounting, financial management, human resource management, management, marketing.

**Course prerequisites:** Any 2 units of English (min. standard required).

**LAW**

**Areas of study:** Law.

**Course prerequisites:** Any 2 units of English (min. standard required).

**MEDIA AND COMMUNICATION**

**Areas of study:** Journalism, media industries, public relations, sport journalism.

**Course prerequisites:** Any 2 units of English (min. standard required).

**NURSING (PRE-REGISTRATION)**

**Areas of study:** Nursing.

**Course prerequisites:** Any 2 units of English (min. standard required).

**OCCUPATIONAL THERAPY (HONS)**

**Areas of study:** Anatomy and physiology, health sciences, mental health, occupational therapy.

**Course prerequisites:** Any 2 units of English (min. standard required).

**PARAMEDIC PRACTICE WITH HONOURS**

**Areas of study:** Health promotion, paramedic practice, paramedicine, public health.

**Course prerequisites:** Any 2 units of English plus two of Biology, Chemistry, Mathematics Advanced, Personal Development, Health and Physical Education (PDHPE) or Physics (min. standards required).

**PHYSIOTHERAPY (HONS)**

**Areas of study:** Anatomy, health sciences, physiology, physiotherapy.

**Course prerequisites:** Any 2 units of English plus two of Biology, Chemistry, Mathematics Advanced, Personal Development, Health and Physical Education (PDHPE) or Physics (min. standards required).

**PSYCHOLOGICAL SCIENCE**

**Areas of study:** Behavioural science, neuroscience, psychological science, psychology.

**Course prerequisites:** Any 2 units of English (min. standard required).

**PSYCHOLOGY (HONS)**

**Areas of study:** Behavioural science, neuroscience, psychological science, psychology.

**Course prerequisites:** Any 2 units of English (min. standard required).

**SCIENCE**

**Areas of study:** Biochemistry, biomedical science, botany, chemistry, data science, environmental geoscience, genetics, mathematics, molecular biology, microbiology, nanotechnology, pharmaceutical chemistry, physics, statistics, zoology.

**Course prerequisites:** Any 2 units of English, plus any 2 units of mathematics (min. standards required).

**SCIENCE (WILDLIFE AND CONSERVATION BIOLOGY)**

**Areas of study:** Animal and plant biology, biology, botany, conservation biology and ecology, ecological studies, ecology (sustainability), environment and sustainability, environmental geoscience, environmental management, environmental studies, genetics, wildlife and conservation biology, wildlife management, zoology.

**Course prerequisites:** Any 2 units of English (min. standard required).

**SOCIAL WORK (HONS)**

**Areas of study:** Human services, social work.

**Course prerequisites:** Any 2 units of English (min. standard required).

**SPEECH PATHOLOGY (HONS)**

**Areas of study:** Anatomy, health sciences, physiology, speech pathology.

**Course prerequisites:** Any 2 units of English plus one of Biology, Chemistry, Mathematics Advanced, Personal Development, Health and Physical Education (PDHPE) or Physics (min. standards required).
Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

**ADVERTISING & MEDIA**

**ADVERTISING & MEDIA (DIP)**
Areas of study: Campaign thinking, copywriting, creative process, digital design, foundations of marketing, media landscape, positive psychology, research and insight, social media strategy, the business of advertising, video production.

**BUSINESS**
Areas of study: Business accounting, business finance, business fundamentals, business law, digital business communications, entrepreneurship, foundations of marketing, leadership and change management, positive psychology, project management, research and insight.
Recommended studies: Any 2 units of English, Mathematics Advanced.

**Entrepreneurship**
**Event Management**
**Marketing**
**Public Relations**
**Sports Business**
**Travel and Tourism**
Recommended studies: Any 2 units of English, Mathematics Advanced.

**BUSINESS (ACCOUNTING)**

**ACCOUNTING (DIP)**
Areas of study: Accounting, accounting information systems, business communications, business fundamentals, business law, economics for business, foundations of marketing.
Recommended studies: Mathematics Advanced, Legal Studies, Business Studies, any 2 units of English.

**BUSINESS MANAGEMENT (DIP)**
Areas of study: Business accounting, business fundamentals, business law, digital business communications, entrepreneurship, foundations of marketing, positive psychology, research and insight.
Recommended studies: Any 2 units of English, Mathematics Advanced.
Additional selection criteria: Interview.

**Entrepreneurship**
**Event Management**
**Public Relations**
**Sports Business**
**Travel and Tourism**
Recommended studies: Any 2 units of English, Mathematics Advanced.

**DIGITAL AND SOCIAL MEDIA MARKETING (DIP)**
Areas of study: Creative process, digital design, digital marketing strategy, foundations of marketing, introduction to digital and social media marketing, social media strategy, written communications.
Recommended studies: Visual Arts, Design and Technology, Business Studies, any 2 units of English.

**DIGITAL MEDIA**

**DIGITAL MEDIA (DIP)**
Areas of study: Design thinking, digital design, digital visualisation, ICT, interaction design, story and narrative, positive psychology, research and insight, social media strategy with specialisation options in digital marketing, visual content creation and interactive design, video production.

**JOURNALISM**

**JOURNALISM (DIP)**
Areas of study: Data journalism, feature writing, foundations of news, media history and ethics, media law, news research, professional news practice, radio, reporting government, video and mobile journalism (mojo).
Recommended studies: Any 2 units of English.

**Business**
**Fashion**
**Food, Lifestyle & Travel**
**Investigative Reporting**
**Music**
**Sports**
**Photo**
Recommended studies: Any 2 units of English.
Additional selection criteria: Interview.

**MARKETING (DIP)**
Areas of study: Consumer behaviour, digital business communications, entrepreneurship, foundations of marketing, research and insight, positive psychology, sales and negotiation.
Recommended studies: Mathematics Advanced, any 2 units of English.
ACTUARIAL STUDIES

Areas of study: Actuarial modelling, actuarial science, data analysis, economics, finance, financial management, financial reporting, insurance, mathematical methods, probability, risk management, statistical analysis.

Assumed knowledge: Mathematics Extension 1 (Band E4).

Recommended studies: Mathematics Extension 2. For the Actuarial Studies Co-op program: Mathematics Extension 2 (Band E4).

ANCIENT HISTORY

Areas of study: Languages and cultures of Ancient Egypt and the Near East; languages and cultures of Ancient Greece, Rome and late antiquity; languages of the Ancient Mediterranean.

Recommended studies: Ancient history.

APPLIED FINANCE

Areas of study: Corporate finance, derivative pricing, financial economics, financial management, financial modelling, investments, portfolio management, probability, quantitative analysis, risk management, statistics.

Assumed knowledge: Mathematics Advanced.

Recommended studies: Mathematics Extension 1.

ARCHAEOLOGY

Areas of study: Cultural anthropology; cultures of Ancient Egypt and the Near East; cultures of Ancient Greece, Rome and late antiquity; landscape processes for archaeologists; studies in human biology; studies in palaeobiology.

Recommended studies: Ancient history. For human biology and palaeobiology: refer to ‘Science’.

ARTS

Areas of study: Ancient Egypt and the Near East; Ancient Greece, Rome and late antiquity; ancient languages; anthropology; archaeology; Chinese studies; Chinese-English translation and interpreting; creative writing; criminology; Croatian studies; cultural studies; education; English; environment, society and law; French and Francophone studies; games and interactivity; gender studies; geography; German studies; global health; Hellenic studies; human geography; Indigenous studies; interactive design; international communications; international relations; Italian studies; Japanese studies; journalism and non-fiction writing; linguistics; media studies; media, culture and communications; media, technology and the law; modern Greek studies; modern history; moving image and sound studies; music studies; performing arts industries: dance, theatre and creativity; philosophy; Polish studies; political economy; politics; psychological science*; public relations and social media; radio and podcasting; refugee studies; religion and society; Russian studies; screen practice and production; social justice; sociology; Spanish and Latin American studies; urban studies.

* The study of psychological science does not lead to registration as a psychologist or to professional postgraduate training in psychology.

Recommended studies: For psychological science: Mathematics Advanced.

BIODIVERSITY AND CONSERVATION

Areas of study: Biodiversity and conservation animal sciences, biodiversity and conservation biology, cell and molecular biology, environmental biology, evolution and ecology, genetics, microbiology, physiology, plant sciences.

Recommended studies: Mathematics Advanced, and one of Biology or Chemistry or Investigating Science.

BUSINESS ADMINISTRATION

Areas of study: Business and corporations law; business forecasting, economics, human resource management, international business, leadership in management, management communication, marketing, negotiation, organisational behaviour, strategic management.

Assumed knowledge: Mathematics Standard 2.
BUSINESS ANALYTICS

Areas of study: Business forecasting, computer science, data analytics, data science, data visualisation, information systems for management, risk management, social networks, statistics.
Assumed knowledge: Mathematics Advanced.
Recommended studies: Mathematics Extension 1.

CHIROPRACTIC SCIENCE

Areas of study: Advanced anatomy and physiology, ageing, clinical chiropractic studies, community health, health promotion, physiology/exercise physiology, public health and research, rehabilitation, research methodology, sports medicine.
Recommended studies: Biology, Chemistry, Mathematics Advanced, Physics.

CLINICAL SCIENCE

Areas of study: Anatomy, biochemistry, biology (human), embryology, genetics and genomics, histology, immunology, medical microbiology, neuroscience, pathology, pharmacology, physics, physiology, professional skills and knowledge for working in healthcare and medical research settings.
Assumed knowledge: Mathematics Advanced, Chemistry.
Recommended studies: Biology, Physics, English Advanced.
Find out more about bridging courses on the Faculty of Science and Engineering section of the Macquarie University website.

COGNITIVE AND BRAIN SCIENCES

Areas of study: Attention, cognitive disorders and delusions, cognitive neuroscience, computational neuroscience, hearing and brain, human neuroimaging, memory, neuroscience, reading, research and experiment design, social robotics, statistics.
Recommended studies: Mathematics Advanced.

COMMERCE

Areas of study: Accounting, business analytics, business information systems, business statistics, cyber security governance, economics, entrepreneurship, finance, human resource management, international business, management, marketing and consumer insights, marketing management.
Recommended studies: For accounting, business information systems, marketing and consumer insights: Mathematics Advanced. For business analytics and finance: Mathematics Extension 1.

CYBER SECURITY

Area of study: Applied cryptography, cybercrime, data privacy and information security, databases, digital forensics, ethical hacking, machine learning, networking, programming, secure application development, security management in practice and web technologies.
Recommended studies: Mathematics Extension 1 or Mathematics Extension 2, plus Information Process and Technology and/or Software Design and Development.

EDUCATION

Early Childhood Education
Recommended studies: Any 2 units of mathematics.
Primary Education
Recommended studies: Any 2 units of mathematics.
Secondary Education
Areas of study: Business studies, economics, English, geography, history, languages, mathematics, science.
Recommended studies: Successful completion of HSC study in the chosen teaching areas. For mathematics teaching: Mathematics Advanced, Mathematics Extension 1 or Mathematics Extension 2.

ENGINEERING (HONOURS)

Areas of study: Civil engineering, electrical engineering, electronics engineering, mechanical engineering, mechatronic engineering, software engineering.
Assumed knowledge: Mathematics Advanced (Band 4). If you don't have the assumed knowledge, you'll be required to undertake additional units, which may extend the time taken to complete this degree.
Recommended studies: Physics, plus Mathematics Extension 1 or Mathematics Extension 2.

ENVIRONMENT

Areas of study: Applied environmental science, atmospheric environments, biology, climate science, environmental biology, environmental earth science, environmental geoscience, environmental management, spatial information science.
Recommended studies: Earth and Environmental Science, Biology, Geography, Chemistry, Mathematics Advanced.

GAMES DESIGN AND DEVELOPMENT

Areas of study: Computer games technology; computer graphics; computer networks; computer programming; critical games studies; game design; game development; digital media production; modelling and animation; screenwriting; software engineering; sound, image and interactive media; videogames; web design; web technology.
Recommended studies: Mathematics Extension 1 or Mathematics Extension 2, plus Information Process and Technology and/or Software Design and Development.

HUMAN SCIENCES

Areas of study: Cognitive and brain sciences; community services; counselling theory and principles; education; human movement; professional, organisational and workplace communication; public health, policy and promotion.
Recommended studies: Personal Development, Health and Physical Education (PDHPE), Mathematics Advanced.

INFORMATION TECHNOLOGY

Areas of study: Cybersecurity, data analytics, data science, enterprise applications, information systems and business analysis, network security, software technology, web design and development.
Recommended studies: Mathematics Extension 1 or Mathematics Extension 2, plus Information Process and Technology and/or Software Design and Development.

INTERNATIONAL STUDIES

Areas of study: Chinese international studies, Croatian international studies, French and Francophone international studies, German international studies, Italian international studies, Japanese international studies, Modern Greek international studies, Polish international studies, Russian international Studies, Spanish and Latin American international studies.
LAW
Areas of study: Administrative law, animal law, civil procedure, company law, competition and consumer law, contracts, criminal law and procedure, environmental law, equity (including trusts), ethics and professional responsibility, evidence, family law, federal and state constitutional law, human rights, Indigenous peoples and the law, international dispute settlement, media law, property, torts.

LINGUISTICS AND LANGUAGE SCIENCES
Areas of study: Applied linguistics, child language acquisition, theoretical and descriptive linguistics.

MARINE SCIENCE
Areas of study: Animal behaviour, biodiversity and conservation, climate change, ecology, geographic information systems, geoscience, palaeontology.
Recommended studies: Biology, Earth and Environmental Science, Mathematics Advanced, plus Chemistry or Physics.

MARKETING AND MEDIA
Areas of study: Advanced issues in marketing and management, consumer behaviour, integrated marketing communications, marketing research, marketing strategy, media and communications, media and marketing technologies, multimodal storytelling, PR and social media, services marketing.
Assumed knowledge: Mathematics Standard 2.
Recommended studies: Mathematics Advanced.

MATHEMATICAL SCIENCES
Areas of study: Applied mathematics, pure mathematics, statistics.
Assumed knowledge: Mathematics Extension 1 or Mathematics Extension 2. If you don’t have the assumed knowledge, you’ll be required to undertake additional units, which may extend the time taken to complete this degree.
Recommended studies: Mathematics Extension 2.

MEDIA AND COMMUNICATIONS
Areas of study: Interactive design, international communications, journalism and non-fiction writing, media studies, moving image and sound studies, public relations and social media, radio and podcasting, screen practice and production.

MEDICAL SCIENCES
Areas of study: Anatomy and physiology, analytical bioaience, genomics and medical informatics, health and science communication, infectious disease and biosecurity, medicinal chemistry, neuroscience.
Recommended studies: Mathematics Advanced, Chemistry.

MUSIC
Areas of study: DJ performance and remixing, interactive sound and image, music business, music in a global context, music production, music theatre, musical experimentation and innovation, popular music, song writing, sound cultures, vocal studies.

PLANNING
Areas of study: Demographics and social science, environmental science and management, geographical information systems, international development, planning law and governance, planning policy, social impact assessment, spatial science, tourism and heritage, urban design.

PROFESSIONAL ACCOUNTING
Areas of study: Accounting and governance, auditing and assurance services, blockchain for business, business and corporations law, business statistics, corporate accounting and business advisory, economic principles, financial accounting and reporting, financial management, information systems and business processes, management accounting, organisational planning and control, performance measurement practices, taxation, taxation law and practice.
Assumed knowledge: Mathematics Standard 2.
Recommended studies: For the Accounting Co-op program: Mathematics Advanced.

PSYCHOLOGY
Areas of study: Biopsychology and learning, cognition and perception, counselling and social relationships, developmental psychology, emotion, health psychology, motivation, neuroscience, personality, principles of psychological assessment, psychopathology, research design and statistics, social psychology.
Recommended studies: Mathematics Advanced.

SCIENCE
Areas of study: Applied statistics, astronomy and astrophysics, biology, chemical and biomolecular sciences, chemistry, climate science, cognitive neuroscience, computing, ecology and evolutionary biology, environmental earth science, environmental management and spatial science, geology, geography studies, geophysics, human biology, human geography studies, mathematics, palaeobiology, palaeontology and the earth system, physics, psychological studies.
Subject prerequisites: For astronomy and astrophysics, mathematics, statistics and physics specialisations: Mathematics Advanced (Band 4).
If you don’t have the assumed knowledge, you’ll be required to undertake additional units, which may extend the time taken to complete this degree.
Recommended studies: Mathematics Advanced, at least 2 units of science. For astronomy and astrophysics, mathematics, statistics and physics specialisations: Mathematics Advanced.

SCIENCE ADVANCED
Areas of study: Advanced astronomy and astrophysics, advanced biology, advanced biomolecular sciences, advanced chemistry, advanced ecology and evolutionary biology, advanced environmental sciences, advanced geology, advanced geophysics, advanced human biology, advanced mathematics, advanced palaeobiology, advanced palaeontology and the earth system, advanced physics.
Subject prerequisites: For advanced astronomy and astrophysics, advanced physics specialisations: Mathematics Advanced (Band 4).
For advanced mathematics specialisations: Mathematics Extension 1 (Band E3) or Mathematics Extension 2.
Recommended studies: For advanced astronomy and astrophysics, advanced biology, advanced biomolecular sciences, advanced chemistry, advanced ecology and evolutionary biology, and advanced human biology specialisations: Biology or Chemistry or Investigating Science plus Mathematics Advanced. For advanced environmental sciences, advanced geophysics, advanced geology, advanced palaeontology and the earth system: Earth and Environmental Science or Investigating Science plus Mathematics Advanced. For advanced mathematics: Mathematics Extension 1 (Band E3) or Mathematics Extension 2.

SECURITY STUDIES
Areas of study: Australian, regional and global strategy and security, counterterrorism, cybercrime and security, emerging security challenges, ethical practice, intelligence and counter intelligence, modern warfare, security policy analysis.
SOCIAL SCIENCE

Areas of study: Anthropology; criminology; environment, society and law; geography; global health; human geography; Indigenous studies; international relations; political economy; politics; psychological science*; race, gender and diversity; refugee studies; social justice; sociology; urban studies.

* The study of psychological science does not lead to registration as a psychologist or to professional postgraduate training in psychology.

Recommended studies: For psychological science: Mathematics Advanced.

SPEECH AND HEARING SCIENCES

Areas of study: Commonalities and differences between the world’s languages; hearing and its disorders; how children and adults learn a second or other language; how language develops in children; how language is represented in the brain; how spoken language is produced, perceived and understood; the relationship between language and society; speech and language disorders.

DOUBLE DEGREES

Double bachelor degrees involve studying two complementary or different degrees. Students can undertake a single bachelor degree, double bachelor degree or combined bachelor + master degree*. Macquarie offers more than 50 single bachelor degrees. For more information, search for 'double degrees' at mq.edu.au.

* Some double degree exclusions apply.
Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

**BUSINESS**

- **Areas of study:** Accounting, management, marketing and digital marketing.

**INFORMATION TECHNOLOGY**

**Networking**

- **Areas of study:** Computer networks, including specialisation in cloud networks and software engineering, and major in cyber security.
SELECTING YOUR HSC SUBJECTS?

UAC’s FREE ONLINE TOOL – SUBJECT COMPASS – can help you find your way to the HSC courses that are right for you. Tell us about your interests, skills and goals and we’ll make some suggestions.

My Interests
I know what I’m interested in

My Skills
I know what I’m good at

My Personality
I know the environment I’d like to work in

My Uni Course
I know what I want to study at uni

My Career
I know my intended career path

HSC subject selection made easy. Get started at

uac.edu.au/subjectcompass

READ THIS FIRST

In addition to completion of the HSC (or equivalent), admission criteria for B Fine Art include interview and portfolio evaluation. For further information regarding portfolio requirements, visit nas.edu.au.

The National Art School offers portfolio development with its short course program and also offers the NESA-endorsed HSC Intensive Studio Practice course for Year 11 Visual Arts students throughout NSW.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

FINE ARTS

Areas of study: Art history and theory, ceramics, drawing, painting, photography, printmaking, sculpture.
Assumed knowledge: Visual Arts.
Additional selection criteria: Portfolio, interview.
ANIMATION

Additional selection criteria: Interview.

3D Modelling

3D Modelling (Assoc Deg)
Areas of study: Advanced 3D modelling, development and implementation of 3D production pipelines, digital environments and technical art pipelines, lighting and rendering, modelling terminology and methods, texturing and shading.

Character Animation

Character Animation (Assoc Deg)
Areas of study: Advanced 2D animation, development of user-friendly animation rigs, principles of character animation: body mechanics and facial animation, motion studies, posing.

Visual Effects

Visual Effects (Assoc Deg)
Areas of study: Computer modelling, dynamic simulations and colour grading lighting, intermediate and advanced compositing, match moving, particle systems, rendering, texturing.

3D Animation (Dip)

Areas of study: 3D digital model creation, character rigging, design animation and digital visual effects, interpreting and responding to a design brief, production of 3D assets, staging and drawing, storyboards, visual design.

AUDIO

Additional selection criteria: Interview.

Post-production

Post-production (Assoc Deg)
Areas of study: Advanced sound for picture techniques, audio post-production team dynamics, creation and manipulation of the sonic environment of multimedia.

Studio Production

Studio Production (Assoc Deg)
Areas of study: Advanced studio production techniques, mastery of tracks from recording through to production, sound aesthetics, studio production team dynamics.

Audio Production (Dip)

Areas of study: Assembly of small-scale digital recording system, digital technology, microphones, mixing and application of signal processors, music theory, musical forms and structure, operation of Digital Audio Workstation (DAW), sound recording.

Music Production (Dip)

Areas of study: Blending sounds, conducting a location recording, Digital Audio Workstation (DAW) transcription and operation, music genres and styles, music theory, technical language, understanding and recognition of key features of music, working to a brief, writing a production brief.

CREATIVE INDUSTRIES

Additional selection criteria: Interview.

Screen and Media (Dip)

Areas of study: 3D modelling, animation concept development, audio recording, audio editing, poster design, web design, screenwriting, video editing, title sequences, game design, game concept development and music production.

DESIGN

Additional selection criteria: Interview.

Graphic Design

Graphic Design (Assoc Deg) Graphic Design (Dip)
Areas of study: Critical and creative thinking, design and layout, design for print media, fundamentals of drawing, pre-press, principles of design, typography.

Web Design

Web Design (Assoc Deg)
Areas of study: Critical and creative thinking, design and layout, design for content management systems, dynamic development, interaction design, interface design, principles of design.

FILM

Additional selection criteria: Interview.

Post-production

Post-production (Assoc Deg)
Areas of study: Colour grading, compositing, editing, film fundamentals, operation of film equipment, storytelling, understanding the roles and responsibilities of film production crews.

Production

Production (Assoc Deg)
Areas of study: Directing, film fundamentals, operation of film equipment, producing, storytelling, understanding the roles and responsibilities of film production crews.
Film (Dip)
Areas of study: Film fundamentals, operation of film equipment, storytelling, understanding the roles and responsibilities of film production crews.

GAMES DEVELOPMENT
Additional selection criteria: Interview.
Games Design
Games Design (Assoc Deg)
Areas of study: Advanced game design, foundations of 3D graphics, game audio, games as media, level development, psychology of play.
Games Programming
Games Programming (Assoc Deg)
Areas of study: Applied mathematics, game engine architecture, games technology, programming, tools development.

Augmented and Virtual Reality (Dip)
Areas of study: Augmented reality (AR) technology use, creative problem solving, critical reflection, haptic technologies, human-computer interaction (HCI), mixed reality (MR) technology use, rapid prototyping, scripting, virtual reality (VR) technology use.

Game Development (Dip)
Areas of study: Differences between digital and analogue games, game construction, game functionality, instructional design, methods for construction of functional games, principles of spatial layout, programmatic solutions, visual communication techniques, writing Technical Design Documents (TDD).
### STEPS TO UNI FOR YEAR 10 STUDENTS

**ARTS (DIP)**
- **Areas of study:** Arts, criminology and criminal justice, international studies, interpreting and translation.

**BUSINESS ADMINISTRATION (DIP)**
- **Areas of study:** Hospitality management, international business, management, marketing.

**COMMERCE (DIP)**
- **Areas of study:** Accounting, economics, finance, management, marketing, statistics.

**ENGINEERING (DIP)**
- **Areas of study:** Computing, electrical engineering, material science, mathematics, mechanical engineering, physics.
- **Assumed knowledge:** Mathematics Extension 1. If not, students can enrol in equivalent units to acquire this knowledge.

**INFORMATION TECHNOLOGY (DIP)**
- **Areas of study:** Business information systems, data management, digital media, programming, software design, systems design.

**MEDIA AND COMMUNICATION (DIP)**
- **Areas of study:** Advertising, cross cultural communication, digital media, international communication, journalism, national and global media, public relations.

- SIBT will only consider academic subjects when determining a student’s average performance.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.
ARTh AND DESIGN
 Areas of study: 3D studies, art theory, curating, digital art and design, drawing, painting, printmaking, sculpture.
 Recommended studies: Visual Arts.
 Additional selection criteria: Interview, portfolio.

ARTS
 Areas of study: Creative writing, cultural studies, digital media, history, politics and international relations.
 Assumed knowledge: English Advanced.

BIOMEDICAL SCIENCE
 Areas of study: Anatomy, biochemistry, human physiology, immunology, microbiology, neuroscience.
 Recommended studies: Mathematics Advanced plus at least one of Biology, Chemistry or Physics.

BUSINESS AND ENTERPRISE
 Areas of study: Accounting, aviation management, business analytics, entrepreneurship and innovation, financial services.
 Assumed knowledge: Mathematics Advanced, any 2 units of English.
 Recommended studies: One or more of Business Studies, Economics, Information Processes and Technology or Legal Studies.

BUSINESS (DIP)
 Recommended studies: Business Studies or Economics.

CIVIL CONSTRUCTION ENGINEERING (ASSOC DEG, DIP)
 Areas of study: Computer-aided design and drafting, construction materials, site safety.
 Recommended studies: Mathematics Advanced plus Chemistry and/or Physics.

CLINICAL SCIENCES (OSTEOPATHIC STUDIES)
 Areas of study: Human anatomy and physiology, structure and function of the muscular and nervous systems.
 Recommended studies: Biology plus Chemistry or Mathematics Advanced.

COMMUNITY WELFARE
 Areas of study: Children and young people, health and disability, Indigenous studies.
 Assumed knowledge: Any 2 units of English.

CONTEMPORARY MUSIC
 Areas of study: Music education, new media arts, performance (audition), performance (non-audition), screen, songwriting/composition (audition), songwriting/composition (non-audition), sound production (audition), sound production (non-audition).
 Assumed knowledge: Competency on a musical instrument, particularly for the performance stream; basic music theory.
 Recommended studies: Music 1 or Music 2 or Music Extension.
 Additional selection criteria: For the performance, songwriting/composition and sound production audition streams: Audition/interview.

CREATIVE WRITING (ASSOC DEG)
 Areas of study: Experimental writing, journalism, life writing, poetry, writing for stage and screen, writing for young adults.
 Assumed knowledge: English Advanced.
 Recommended studies: English Extension 1 or English Extension 2.

DIGITAL MEDIA
 Areas of study: Creative writing, digital design, digital marketing, journalism, music and technology, screen media, visual culture.
 Assumed knowledge: English Advanced.
 Recommended studies: English Extension 1 or English Extension 2.

EDUCATION/TEACHING
 Early Childhood
 Primary (K–6)
 Secondary
 Technology Education
 There are no prerequisites or assumed knowledge, but see NESA requirements on page 11. Only available as a combined degree option – refer to Education/Teaching (Combined degrees) below.
 Additional selection criteria: Non-academic requirements.

ENGINEERING
 Areas of study: Civil engineering, coastal systems engineering, mechanical engineering.
 Recommended studies: Mathematics Advanced plus Chemistry and/or Physics.
STEPS TO UNI FOR YEAR 10 STUDENTS

ENVIRONMENTAL SCIENCE
Areas of study: Environmental stewardship, fauna and flora conservation, land and water management, regenerative agriculture.
Recommended studies: Biology, Chemistry, Earth and Environmental Science, Geography, Mathematics Advanced.

FOREST SCIENCE AND MANAGEMENT
Areas of study: Biology, ecology, environmental studies, forestry studies, plant physiology, soil processes, wood science.
Recommended studies: Biology and/or Chemistry, Earth and Environmental Science, Mathematics Advanced.

HEALTH (DIP)
Recommended studies: Biology and/or Chemistry.

HOTEL MANAGEMENT
Areas of study: Accommodation operations, food and beverage, management, professional practice.
Recommended studies: Business Studies and/or Hospitality, any 2 units of English.
Additional selection criteria: Interview.

HOTEL MANAGEMENT (DIP)
Recommended studies: Business Studies and/or Hospitality, any 2 units of English.
Additional selection criteria: Interview.

INDIGENOUS KNOWLEDGE
Areas of study: Aboriginal health care, community and land management, Indigenous knowledge and research.
Recommended studies: Any 2 units of English.

INFORMATION TECHNOLOGY
Areas of study: Networks and cyber security, software development, user experience.
Assumed knowledge: Mathematics Advanced.
Recommended studies: Information Processes and Technology, any 2 units of English.

INFORMATION TECHNOLOGY (ASSOC DEG)
Areas of study: Applications development, database systems, digital media, programming, systems analysis and design, web development.
Recommended studies: Information Processes and Technology, any 2 units of English.

LAW (ASSOC DEG)
Areas of study: Conveyancing, paralegal studies.

LAWS
LAWS (DOUBLE DEGREES)
- Arts/Laws
- Business and Enterprise/Laws
- Laws and Creative Writing
- Legal and Justice Studies/Laws
- Psychological Science/Laws
- Social Science/Laws
- Sport and Exercise Science/Laws
Recommended studies: For Laws: English Advanced, Legal Studies.
For the other area of study: Refer to the relevant entry.

LEGAL AND JUSTICE STUDIES
Areas of study: Australian politics, conveyancing, legal systems and processes.

MARINE SCIENCE AND MANAGEMENT
Areas of study: Biology, chemistry, coastal marine ecosystems, ecology, environmental issues.
Recommended studies: Biology and/or Chemistry, Mathematics Advanced.

MIDWIFERY
Areas of study: Anatomy and physiology, midwifery theory and practice, primary health care, psychosocial sciences, women’s health.
Assumed knowledge: Any 2 units of English, Mathematics Advanced plus Chemistry or Biology.
Recommended studies: English Extension 1 or English Extension 2.

NURSING
Areas of study: Biological sciences, professional areas, social sciences.
Assumed knowledge: Any 2 units of English, any 2 units of mathematics.
Recommended studies: One or more of Chemistry, Biology or Physics.

OCCUPATIONAL THERAPY
Areas of study: Biomedical science, professional areas, social sciences.

PODIATRY
Areas of study: Allied health studies, anatomy and physiology, gait biomechanics, lower limb medicine.
Recommended studies: Biology, Chemistry, Mathematics Advanced.

PSYCHOLOGICAL SCIENCE
Areas of study: Analytical problem-solving, applied skills, interpreting research findings, scientific principles, statistical methods, testing and assessment.
Recommended studies: Mathematics Advanced, Biology.

SCIENCE (DIP)
Recommended studies: Biology, Chemistry, Mathematics Advanced.

SOCIAL SCIENCE
Areas of study: Politics and government, sociology.
Assumed knowledge: Any 2 units of English.
Recommended studies: Society and Culture.

SOCIAL WORK
Areas of study: Child protection, cross-cultural work, mental health practice, social sciences, social work practice.
Assumed knowledge: Any 2 units of English.
SOUTHERN CROSS UNIVERSITY | 85

SPEECH PATHOLOGY

Areas of study: Audiology, cultural competency, multi-modal communication neurology, phonetics and linguistics, principles of evidence-based practice.
Assumed knowledge: English Advanced.
Recommended studies: Biology.

SPORT AND EXERCISE SCIENCE

Areas of study: Education, exercise science, nutrition.
Recommended studies: Mathematics Advanced, any 2 units of English, one or more of Biology, Chemistry, Physics, Personal Development, Health and Physical Education (PDHPE).

TOURISM MANAGEMENT

Areas of study: Sustainable tourism management, sustainable convention and events management, sustainable hospitality management.
Recommended studies: Any 2 units of English plus Business Studies and/or Hospitality.

DOUBLE DEGREES

Refer to the assumed knowledge and recommended studies for both components of the double degrees.
– Arts/Laws
– Business and Enterprise/Arts^*
– Business and Enterprise/Laws^*
– Environmental Science/Marine Science and Management*
– Exercise Science and Psychological Science*
– Laws and Creative Writing*
– Legal and Justice Studies/Laws
– Podiatry/Pedorthics
– Psychological Science/Laws
– Social Science/Laws
– Sport and Exercise Science/Laws.

* Subject to University approval
^ Combined degree

EDUCATION/TEACHING (COMBINED DEGREES)

– Arts/Education (Primary)
– Arts/Education (Primary/Early Childhood)
– Arts/Education (Primary/Secondary)
– Arts/Education (Secondary)
– Technology/Education (Secondary)
READ THIS FIRST
− When you read ‘any 2 units of science’ this can include Biology, Chemistry, Physics, Earth and Environmental Science or Investigating Science.
− Torrens University Australia (TUA) offers a range of career programs in Business, Hospitality, Design, Health, Nursing and Sports Management for study on-campus, online or a hybrid of both. Torrens University Australia was founded through partnership with some of Australia’s most well-regarded education providers who share its purpose-driven orientation and passionate approach, to bring a powerful combined offering to this market.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

BUSINESS COURSES

BUSINESS
Entrepreneurship
Event Management
Marketing
Sports Management

Areas of study: Accounting, business and law, business fundamentals, customer experience management, digital marketing trends, economics, ethics and sustainability, events policy and strategy, identifying consumer behaviour, international business strategy, organisational creativity and innovation, public relations management, sports tourism, strategic marketing planning, understanding people and organisations.

COMMERCE

Areas of study: Accounting, business communications, business law, economic, finance, leadership and professional practice, management, quantitative analysis.

BUSINESS

Areas of study: Business fundamentals, customer experience management, ethics and sustainability, identifying consumer behaviour, understanding people and organisations.

BUSINESS INFORMATION SYSTEMS

Areas of study: App web design and development, principles of programming, professional ethics, system analysis and design.

BUSINESS INFORMATION SYSTEMS (DIP)

Areas of study: Business communications, data and networking, project management and planning.

EVENT MANAGEMENT (DIP)

Areas of study: Business fundamentals, customer experience management, event planning and management, events policy and strategy, organisational creativity and innovation, understanding people and organisations.

MARKETING (DIP)

Areas of study: Business fundamentals, customer experience management, digital marketing trends and development, identifying consumer behaviour, organisational creativity and innovation, strategic marketing planning, understanding people and organisations.
HEALTH COURSES

APPLIED PUBLIC HEALTH
Areas of study: Health monitoring and screening at a population level; health policy; health promotion campaigns and advocacy; planning, implementing and evaluating health programs.
Recommended studies: Any 2 units of science.

APPLIED SOCIAL SCIENCE (COUNSELLING)
Areas of study: Applied counselling, case management and program development, community development, community services, counselling, counselling for grief and loss, health and wellbeing, ethics and professional practice, interpersonal communication, human development, human rights and social advocacy, mediation and conflict management, protection of children, social policy, relationship counselling, social research methods.
Recommended studies: Personal Development, Health and Physical Education (PDHPE).

BEAUTY AND SPA PRACTICE (DIP)
Areas of study: Aesthetic electrotherapy, aesthetic practice with technology, beauty and spa practice, foundations of aesthetics, manual aesthetic techniques.
Additional selection criteria: Applicants must be 18 years or older at the course commencement date. Applicants must also be able to demonstrate the ability to undertake study at the required level.

COUNSELLING & COMMUNICATION SKILLS (DIP)
Areas of study: Digital fluency, health and wellbeing, human development across the lifespan, interpersonal communication, introduction to ageing, introduction to disability, introduction to human services.

HEALTH SCIENCE
Aesthetics
Areas of study: Aesthetic electrotherapy, aesthetic practice with technology, aesthetics, cosmetic chemistry, digital fluency, foundations of aesthetics, human anatomy and physiology, human biology, manual aesthetic techniques.
Recommended studies: Any 2 units of science.

Naturopathy
Nutritional Medicine
Western Herbal Medicine
Areas of study: Biochemistry, biological foundations, botany, clinical assessment, complementary medicine foundations, evidence-based practice, herbal therapeutics, human structure & function, human systems & pathophysiology, nutrition, nutritional therapeutics pre-clinical studies, pharmacology.
Recommended studies: Any 2 units of science.

HEALTH SCIENCE (DIP)
Areas of study: Biological foundations, clinical assessment, human structure & function, human systems & pathophysiology, pre-clinical studies.
Recommended studies: Any 2 units of science.

NUTRITION
Areas of study: Analyse and develop health programs, nutritional needs of the human body, understanding nutrition needs on a global scale.

SPORT DEVELOPMENT (DIP)
Areas of study: Athlete health and wellbeing; coaching practices; developing sports participation; drugs in sport; essentials of sports marketing; event management; high performance training and injury management principles; risk, law and work health and safety; staff recruitment.
Recommended studies: Personal Development, Health and Physical Education (PDHPE).

HEALTH & WELLBEING (DIP)
Areas of study: Active lifestyle promotion, body systems and disease, corporate health, disease prevention, health promotion, human nutrition, leisure, social and emotional wellbeing, sport and fulfilling lives for older people, understanding health.
Recommended studies: Personal Development, Health and Physical Education (PDHPE).

HOSPITALITY COURSES

BUSINESS
BUSINESS (ASSOC DEG)
BUSINESS (DIP)
Hospitality Management
Tourism Management
Recommended studies: Hospitality (Kitchen Operations and Cookery (Examination) or Hospitality (Food and Beverage) (Examination) plus any 2 units of a language.

CULINARY MANAGEMENT
CULINARY MANAGEMENT (ASSOC DEG)
Areas of study: Food health and safety, kitchen operations, menu planning, professional cookery, restaurant management.
Recommended studies: Hospitality (Kitchen Operations and Cookery (Examination) or Hospitality (Food and Beverage) (Examination) plus Food Technology

NURSING COURSES

NURSING
Areas of study: Administer and monitor medications, analyse health-related information, develop effective communication skills, implement basic nursing care, legal and ethical parameters in nursing, work as an enrolled nurse (RN).
Recommended studies: Biology.
BILLY BLUE COLLEGE OF DESIGN
AT TORRENS UNIVERSITY

BRANDED FASHION DESIGN
Areas of study: Colour and material theory, design development and costing, fashion buying and merchandise planning, fashion illustration and technical drawing, fashion production, print design and theory.
Recommended studies: Textiles and Design, Visual Arts.

BRANDED FASHION DESIGN (DIP)
Areas of study: Design context, fashion illustration, introduction to branded fashion technical drawing, introduction to shape and form, fashion studio practice, fashion versus clothing.
Recommended studies: Design and Technology, Visual Arts.

COMMUNICATION DESIGN
Areas of study: Design and typographic fundamentals, moving image and 3D design and production, packaging and branding.
Recommended studies: Visual Arts, Design and Technology.

DESIGN (DIP)
Areas of study: 3D design and production, branded fashion, communication design, design fundamentals, digital media, interior design, moving image.
Recommended studies: Visual Arts.

DIGITAL MEDIA DESIGN
Interaction Design
Film and Video Design
3D Design and Animation
Areas of study: 3D design, character design, cinematography, compositing, content production, editing, lighting, interaction, motion graphics, user behaviour.
Recommended studies: Information Processes and Technology, Visual Arts, Design and Technology.

DIGITAL MEDIA DESIGN (DIP)
Areas of study: 3D design and animation, concept development, design fundamentals, interactive design, motion design.
Recommended studies: Visual Arts plus Information Processes and Technology or Design and Technology.

GAME DESIGN AND DEVELOPMENT
Areas of study: Animation, asset creation, game principles, game studies.
Recommended studies: Design and Technology, Visual Arts.

GAME DESIGN AND DEVELOPMENT (DIP)
Areas of study: 2D & 3D asset creation, design process, game principles, game production.
Recommended studies: Design and Technology, Visual Arts.

GRAPHIC DESIGN (DIP)
Areas of study: Design history and principles, ideas generation, brand identity, typography, design research, user experience, how to use industry standard graphic design software.
Recommended studies: Design and Technology, Visual Arts.

INTERIOR DESIGN
Commercial
Residential
Recommended studies: Visual Arts, Design and Technology.

INTERIOR DESIGN AND DECORATION (DIP)
Recommended studies: Visual Arts, Design and Technology.

PHOTO IMAGING (DIP)
Areas of study: Digital photography, history, photo imagery.
Recommended studies: Visual Arts.

SOFTWARE ENGINEERING (ARTIFICIAL INTELLIGENCE)
Areas of study: Animation, asset creation, game principles, game studies.
Recommended studies: Design and Technology, Information Processes and Technology, Visual Arts.

SOFTWARE ENGINEERING (CLOUD COMPUTING)
Areas of study: Animation, asset creation, game principles, game studies.
Recommended studies: Design and Technology, Information Processes and Technology, Visual Arts.

SOFTWARE ENGINEERING (GAME PROGRAMMING)
Areas of study: 3D graphic programming, computer graphics, mathematics, software engineering.

SOFTWARE ENGINEERING (GAME PROGRAMMING) (DIP)
Areas of study: Computer graphics, game programming, mathematics, software engineering.

BLUE MOUNTAINS INTERNATIONAL HOTEL MANAGEMENT SCHOOL AT TORRENS UNIVERSITY

BUSINESS
International Hotel and Resort Management
International Event Management
Areas of study: Business, conferences, event management, hospitality management, hotel operations, leadership, management, resort management.
Recommended studies: Hospitality (Kitchen Operations and Cookery (Examination) or Hospitality (Food and Beverage) (Examination) plus any 2 units of a language and Business Studies.
Additional selection criteria: Students are required to attend an interview either in person or via Skype.

88 |
ACCOUNTING
Areas of study: Auditing, corporate law, information systems, finance, financial and management accounting, tax law.
Recommended studies: Mathematics T/Mathematic Applications (ACT) or Mathematics Advanced (NSW) and English (major) (ACT) or English Advanced (NSW), or their equivalents.

ARTS
Creative Writing
Areas of study: Creative writing, literature studies, narrative non-fiction, poetry, screenwriting, writing for various media, writing for young people.

Culture and Heritage
Areas of study: Conservation, cultural heritage practice, heritage studies, Indigenous studies, museum studies.

Digital Media
Areas of study: 3D, animation and motion capture, augmented reality, digital photography, game art, sound design, virtual reality, visual effects.

Film Production
Areas of study: Cinematography, directing, documentary, editing, film making, lighting, videography.

Global Studies
Areas of study: Activism, environmental policy, global ethics, international development, international studies, philosophy, world culture.

BUILDING AND CONSTRUCTION MANAGEMENT
Areas of study: Building and construction management, building materials, building processes, built design, management, negotiation, supervision techniques, quantity surveying.

THE BUILT ENVIRONMENT
Architecture
Areas of study: Architecture design, architecture history and theory, built design, digital production, technology and sustainability, urban built environment.

Interior Architecture
Areas of study: Architecture design, digital design, human interaction with interior spaces, interior architecture, interior environments, urban built environment.

Landscape Design
Areas of study: Architecture design, landscape architecture, public and private outdoor design, urban and regional spaces, urban built environment.

BUSINESS
Entrepreneurship and Innovation
Areas of study: Business start-ups, entrepreneurial management, human resources management, Indigenous entrepreneurship, innovation, marketing.

Human Resources Management
Areas of study: Human resource management, organisational behaviour, workplace law.

International Business
Areas of study: Economic development, global e-business, international business, international marketing.

Management
Areas of study: Entrepreneurial management, human resources, public sector management, sustainable business futures, workplace law.

Marketing
Areas of study: Consumer behaviour, digital marketing, international marketing, marketing management, relationship marketing, services management.

Services Management
Areas of study: Business models and value creation, consumer behaviour, service management, service systems and wellbeing.

Sport Management
Areas of study: High performance sport, sport stakeholder engagement and leadership, Innovation, sponsorship, and marketing; sport competitions and events; sport law, governance, and policy.

BUSINESS (DIP)
Areas of study: Accounting, business, finance, law, management, marketing.
BUSINESS INFORMATICS

Areas of study: Business intelligence systems, cloud computing, corporate strategy and IT governance, cyber security, data science, enterprise systems, information security, Internet of Things, social informatics.

Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: English Advanced, Mathematics Advanced.

COMMERCE

Accounting

Areas of study: Auditing, corporate law, finance, financial and management accounting, information systems, tax law.

Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: English Advanced, Mathematics Advanced.

Accounting and Finance

Areas of study: Auditing, finance, financial and management accounting, law, systems theory.

Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: English Advanced, Mathematics Advanced.

Business Economics

Areas of study: Professional economics.

Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: English Advanced, Mathematics Advanced.

Finance and Banking

Areas of study: Business finance, financial institutions and markets, investments, risk management.

Recommended studies: ACT: Mathematics T/Mathematic Applications, English (major) NSW: Mathematics Advanced, English Advanced.

Financial Planning

Areas of study: Business law, investments, personal financing, retirement planning.

Recommended studies: ACT: Mathematics T/Mathematic Applications, English (major) NSW: Mathematics Advanced, English Advanced.

COMMUNICATION AND MEDIA

Corporate and Public Communication

Areas of study: Campaign development, communication, communication studies, crisis and issues management, graphic design basics, media and public affairs, media studies, multimedia production, public relations and strategic, social and digital media management, stakeholder management.

Journalism

Areas of study: Audio, broadcast and print media, communication studies, content creation, digital communication, digital curation, journalism, media studies, multiphase platform journalism, online and social media, reporting, video, visual and audio studies.

Marketing Communication

Areas of study: Communication studies, cross-platform digital communication, marketing communication, media engagement, media studies, strategic and brand development.

Sports Media

Areas of study: Audio, communication studies, digital communication, match and event reporting, media studies, multiphase sport journalism, online and social media production, public relations, radio and TV studio presenting, sports broadcasting, video, visual and audio studies.

COMMUNICATION (DIP)

Areas of study: Communication studies, corporate and public communication, journalism, marketing communication, sports media.

CREATIVE INDUSTRIES - TAFE QUEENSLAND

Applied Fashion

Areas of study: Brand contextualisation, design, fashion globalisation, manufacturing and pattern cutting, sustainable and ethical practices.

Additional selection criteria: Additional to the normal admission requirements, students must also have a successful portfolio application. If you have completed a qualification from TAFE Queensland you may be eligible for direct entry into this course without a portfolio application.

Acting and Performance

Areas of study: Advanced acting and performance.

Additional selection criteria: Additional to the normal admission requirements, students must also have a successful interview and portfolio.

Contemporary Music Practice

Areas of study: Commercial music performance, contemporary musicianship, screen music, song writing, stylistic techniques and production, synthesis and sampling.

Additional selection criteria: Additional to the normal admission requirements, students must also have a successful audition. If you have completed a qualification from TAFE Queensland or Music Industry College, you may be eligible for direct entry into this course without an audition.

Drama and Performance

Areas of study: Animating, musical skills, performance making, production, theatre directing.

Visual Arts

Areas of study: 2D rendering; 3D forms; art history; contemporary art culture; digital visuals; portrait and landscape environment.

Additional selection criteria: Additional to the normal admission requirements, students must also have a successful portfolio application. If you have completed a qualification from TAFE Queensland you may be eligible for direct entry into this course without a portfolio.

DESIGN

Industrial Design

Areas of study: Communication skills, design, design manufacturing, digital manipulation, digital techniques, fabrication, industrial design, materials and production processes, product development.

Recommended studies: ACT: Mathematical Methods T (Major)/Specialist Mathematics T (Major), English T (Major) NSW: Mathematics Advanced, English Advanced.

Additional selection criteria: Students may be considered for entry based on portfolio submission and/or interview.

Interactive Design

Areas of study: Building human-centric interaction systems, design, digital environments, digital product design, digital products, digital systems, media platforms, technology, web development.

Recommended studies: ACT: Mathematical Methods T (Major)/Specialist Mathematics T (Major), English T (Major) NSW: Mathematics Advanced, English Advanced.

Additional selection criteria: Students may be considered for entry based on portfolio submission and/or interview.

Visual Communication Design

Areas of study: Communication studies, design, environmental graphics, information organisation, layout design, logotype design, new technologies, packaging and digital design, print based design, publication design, typography, visual communication design, web based design.

Recommended studies: ACT: Mathematical Methods T (Major)/Specialist Mathematics T (Major), English T (Major) NSW: Mathematics Advanced, English Advanced.

Additional selection criteria: Students may be considered for entry based on portfolio submission and/or interview.
DIGITAL DESIGN - TAFE QUEENSLAND

**Digital Media**
Areas of study: 3D animation and motion capture, augmented reality, digital photography, game art, sound design, virtual reality, visual effects.

**Game Design**
Areas of study: 3D graphics, animation, games production, virtual environments.

**Visual Communication Design**
Areas of study: Communication studies, design, environmental graphics, information organisation, layout design, logotype design, new technologies, packaging and digital design, print based design, publication design, typography, visual communication design, web based design.

**Recommended studies:** ACT: Mathematical Methods T (Major)/Specialist Mathematics T (Major), English T (Major) NSW: Mathematics Advanced, English Advanced.

**EDUCATION**

**Early Childhood and Primary**
Areas of study: Early childhood education (0–8 years), early learning education (philosophies, practices and applications), key learning areas, literacy and numeracy, primary curriculum and pedagogy, teacher professional practice.
Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced, English Advanced.

**Primary**
Areas of study: Key learning areas, primary curriculum and pedagogy, primary education, teacher professional practice.
Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced, English Advanced.

**Primary (Creative Arts)**
Areas of study: Creative arts education (including dance, drama, media arts, music, visual arts), key learning areas, literacy and numeracy, primary curriculum and pedagogy, teacher professional practice.
Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced, English Advanced.

**Primary (Health and Physical Education)**
Areas of study: Health and physical education, key learning areas, literacy and numeracy, primary curriculum and pedagogy, teacher professional practice.
Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced, English Advanced.

**Primary (STEM)**
Areas of study: Disciplines involved in science, technology and mathematics (STEM) education, key learning areas, literacy and numeracy, primary curriculum and pedagogy, teacher professional practice.
Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced, English Advanced.

**Secondary (Arts)**
Areas of study: Key learning areas, secondary curriculum and pedagogy, secondary education, teacher professional practice.
Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced.

**Secondary (Health and Physical Education)**
Areas of study: Key learning areas, secondary curriculum and pedagogy, secondary education, teacher professional practice.
Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced.

**Secondary (Science)**
Areas of study: Key learning areas, secondary curriculum and pedagogy, secondary education, teacher professional practice.
Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced.

**ENGINEERING**

**Engineering**
Areas of study: Network and software engineering, robotics and artificial intelligence.
Recommended studies: ACT: Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced, English Advanced.

**Network and Software Engineering**
Areas of study: Electronic, information technology, network engineering, software engineering.
Recommended studies: ACT: Specialist Maths (Recommended) (T) or Mathematical Methods (T) NSW: Mathematics Advanced, English Advanced.

**Software Engineering**
Areas of study: Cloud computing and Internet of Things, cyber security, data science, mobile technologies, robotics and artificial intelligence, software engineering, system software, technology and engineering management.
Recommended studies: ACT: Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Mathematics Advanced, English Advanced.

**EVENT AND TOURISM MANAGEMENT**
Areas of study: Event and tourism management.

**EXERCISE PHYSIOLOGY AND REHABILITATION**
Areas of study: Exercise physiology, exercise prescription, exercise science.
Recommended studies: ACT: Biology T (Major), or Human Biology T (Major) or Exercise Science T (Major), Mathematical Methods T (Major) NSW: Biology, Mathematics Advanced.

**HEALTH SCIENCE**

**Human Movement**
Areas of study: Biomechanics, exercise and sport performance, exercise physiology, exercise programming, health science, motor control.

**Nutrition Studies**
Areas of study: Health science, nutrition practice and food science, physiology.
Recommended studies: ACT: Biology T (Major), Chemistry T (Major), Mathematical Methods T (Major), Physics T (Major) NSW: Biology, Chemistry, Mathematics Advanced, Physics.
STEPS TO UNI FOR YEAR 10 STUDENTS

HEALTH (DIP)

Areas of study: Health science, human movement, human nutrition, nutrition studies, psychology.

HUMAN NUTRITION

Areas of study: Human nutrition.
Recommended studies: ACT: Chemistry T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major), English T (Major) NSW: Mathematics Advanced, English Advanced.

INFORMATION TECHNOLOGY AND SYSTEMS

Business Informatics
Areas of study: Business intelligence systems, cloud computing, corporate strategy and IT governance, cyber security, data science, enterprise systems, information security, Internet of Things, social informatics.
Recommended studies: ACT: Mathematical Methods T (Major)/Specialist Mathematics T (Major), English T (Major) NSW: Mathematics Advanced, English Advanced.

Information Technology
Areas of study: Cloud computing and Internet of Things, cybersecurity, data science, information technology, robotics and artificial intelligence, software systems architecture, web design and programming.
Recommended studies: ACT: Mathematical Methods T (Major)/Specialist Mathematics T (Major), English T (Major) NSW: Mathematics Advanced, English Advanced.

INFORMATION TECHNOLOGY (DIP)

Areas of study: Information systems, software engineering.

JUSTICE STUDIES

Areas of study: Advocacy and communication, justice studies, law reform.

LAW

LAW (COMBINED)

The University of Canberra offers a range of combined courses with Law. For more information, visit canberra.edu.au.
Requirements: For Law: None.
For the other areas of study: Refer to the relevant entry requirements.

MEDICAL RADIATION SCIENCE*

Medical Imaging
Areas of study: Medical imaging, medical radiation science.
Recommended studies: ACT: Biology T (Major), Physics T (Major), Mathematical Methods T (Major) NSW: Biology, Physics, Mathematics Advanced.

MIDWIFERY*

Areas of study: Midwifery practice theory, midwifery professional theory, midwifery theory.
Recommended studies: ACT: Biology T (Major), Chemistry T (Major), English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Biology, Chemistry, English Advanced, Mathematics Advanced.
Additional selection criteria: Supplementary application form, CV.

NETWORK AND SOFTWARE ENGINEERING (DIP)

Areas of study: Network and software engineering.

NURSING*

Areas of study: Nursing inquiry, professional nursing practice.
Recommended studies: ACT: Biology T (Major), Chemistry T (Major), English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) NSW: Biology, Chemistry, English Advanced, Mathematics Advanced.

OCCUPATIONAL THERAPY*

Areas of study: Occupational therapy.
Recommended studies: ACT: Mathematical Methods T (Major), English T (Major) plus Biology T (Major) or Human Movement T (Major) NSW: Mathematics Advanced, English Advanced plus Biology or Personal Development, Health and Physical Education (PDHPE).

PHARMACY*

Areas of study: Pharmacotherapeutics, pharmaceutical science, pharmacy practice.
Recommended studies: ACT: Mathematical Methods T (Major) plus Biology T (Major) or Human Movement T (Major), plus Chemistry T (Major) or Physics T (Major) NSW: Mathematics Advanced plus Biology or Personal Development, Health and Physical Education (PDHPE) plus Chemistry or Physics.

PHYSIOTHERAPY*

Areas of study: Physiotherapy interventions, physiotherapy practice.
Recommended studies: ACT: Mathematical Methods T (Major) plus Biology T (Major) or Human Movement T (Major), plus Chemistry T (Major) or Physics T (Major) NSW: Mathematics Advanced plus Biology or Personal Development, Health and Physical Education (PDHPE), plus Chemistry or Physics.

POLITICS AND INTERNATIONAL RELATIONS

Areas of study: Politics and international relations.
All students must satisfy a security check for the national security internships.

PSYCHOLOGY

Areas of study: Cognition and learning, developmental psychology, motivation and emotion, personality and individual differences, physiological psychology, psychological science, psychopathology, research methods and statistics, social psychology.

SCIENCE

Biomedical Science
Areas of study: Genetics and genomics, human biology, integrated studies of disease, microbiology, pathobiology, physiology.
Recommended studies: ACT: Mathematical Methods T (Major), Biology T (Major) and/or Chemistry T (Major) NSW: Mathematics Advanced, Biology and/or Chemistry.

Environmental Science
Areas of study: Applied ecology, earth science, environmental chemistry, environmental genetics, integrated environmental management, sustainable landscapes, water science.
Recommended studies: ACT: Mathematical Methods T (Major), Biology T (Major) and/or Chemistry T (Major) NSW: Mathematics Advanced, Biology and/or Chemistry.
Forensic Science

Areas of study: Analytical chemistry, crime scene investigation, environmental and forensic genetics, forensic biology, forensic chemistry, forensic science, forensic toxicology and drug analysis, microbiology, pharmacology and toxicology.

Recommended studies: ACT: Mathematical Methods T (Major), Biology T (Major) and/or Chemistry T (Major) NSW: Mathematics Advanced, Biology and/or Chemistry.

Medical Science

Areas of study: Advanced physiology, analytical chemistry, anatomy and physiology, biological chemistry, genetics and genomics, human biology, immunology, integrated studies of disease, microbiology, pathobiology.

Recommended studies: ACT: Chemistry T (Major) and Mathematical Methods T (Major) NSW: Chemistry and Mathematics Advanced.

Science

Areas of study: Include analytical chemistry, applied ecology, applied statistics, biology, data science, earth science, genetics, genetic counselling, human biology, human nutrition, information systems, integrated environmental management, psychological science, software engineering, sustainability, water science.

Recommended studies: ACT: English T (Major), Mathematical Methods T (Major)/Specialist Mathematics T (Major) plus Chemistry T, Biology T, or Physics T (Major) NSW: English Advanced, Mathematics Advanced plus Chemistry, Biology or Physics.

Social and Economic Policy

Economic Policy

Areas of study: Behavioural science, economics.

Sociology

Areas of study: Behaviour science, political and social theory, sociology.

Sport and Exercise Science*

Areas of study: Exercise science, sports science.

Recommended studies: ACT: Biology T (Major) or Human Biology T (Major), or Exercise Science T (Major), Mathematical Methods T (Major) NSW: Biology, Mathematics Advanced.

Vision Science*

Areas of study: Optical and vision sciences.

Recommended studies: ACT: Mathematical Methods (Major), Chemistry (Major), and Physics (Major), NSW: Mathematics Advanced, Physics, and Chemistry.

Combined Degrees

If you intend to undertake combined degrees check the assumed knowledge and recommended studies for both degrees. Contact the University of Canberra for further details.

Science (DIP)

Areas of study: Biology, chemistry, physical science, science.

*All students to this course are required to undergo a National Police Check and obtain a Working with Vulnerable People registration card prior to undertaking clinical experience. All students are also required to present an immunisation history and first aid certificates, including CPR.
### ACCOUNTING
- **Areas of study:** Accounting, advanced accounting, agribusiness, business law, economics, finance, information systems, managing organisations and people, RG146 financial planning, tax practitioner.
- **Assumed knowledge:** Any 2 units of English.
- **Recommended studies:** Any 2 units of mathematics.

### AGRIBUSINESS
- **Areas of study:** Accounting, agribusiness, economics, finance, marketing and management, rural science, technology and data analytics.
- **Assumed knowledge:** Any 2 units of English.
- **Recommended studies:** Any 2 units of mathematics.

### AGRICULTURAL AND RESOURCE ECONOMICS
- **Assumed knowledge:** Any 2 units of English.
- **Recommended studies:** Any 2 units of mathematics.

### AGRICULTURE
- **Areas of study:** Agricultural technology, agriculture, agronomy, animal production, animal science, farm management, plant production, precision agriculture, primary industries, wool science.
- **Assumed knowledge:** Any 2 units of English, any 2 units of mathematics. For technology: Mathematics Advanced.
- **Recommended studies:** Agriculture, Biology and/or Chemistry.

### AGRICULTURE/BUSINESS
- **Areas of study:** Accounting, agribusiness, agriculture, animal and plant production, international business, marketing.
- **Assumed knowledge:** Any 2 units of English, any 2 units of mathematics.
- **Recommended studies:** Agriculture, Biology and/or Chemistry.

### ANIMAL SCIENCE
- **Areas of study:** Canine and equine science, livestock production, wildlife management.
- **Assumed knowledge:** Any 2 units of English, Chemistry, Mathematics Advanced.
- **Recommended studies:** Biology.

### APPLIED BUSINESS MANAGEMENT*
- **Areas of study:** Business management.
- **Assumed knowledge:** Any 2 units of English.
- **Recommended studies:** Any 2 units of mathematics.

* Subject to final approval

### ARTS
- **Areas of study:** Ancient history, ancient near east, archaeology, Australian history, Chinese (Mandarin), classical languages (Greek/Latin), criminology, English, French, German, history, human geography, Indigenous studies, Indonesian, international history, Islamic studies, Italian, Japanese, linguistics, music, peace studies, philosophy, physical geography, political and international studies, psychology, screen and media studies, sociology, Spanish, studies in religion, theatre and performance, writing.
- **Assumed knowledge:** Any 2 units of English.

### BUSINESS
- **Areas of study:** Accounting, agribusiness, business analytics and informatics, economics, finance, human resource management, international business, management, marketing.
- **Assumed knowledge:** Any 2 units of English.
- **Recommended studies:** Any 2 units of mathematics.

### BUSINESS ANALYTICS*
- **Areas of study:** Business analytics
- **Assumed knowledge:** Any 2 units of English.
- **Recommended studies:** Any 2 units of mathematics.

* Subject to final approval

### COMPUTER SCIENCE
- **Areas of study:** Data science, software development.
- **Recommended knowledge:** Mathematics Extension 1.

### CRIMINOLOGY
- **Areas of study:** Criminal justice; justice and Indigenous people; justice, politics and society; policing and corrections.
- **Assumed knowledge:** Any 2 units of English.
ECONOMICS

Areas of study: Applied econometrics, economic development, economics, environmental analysis and policy.
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of mathematics.

EDUCATION

Early Childhood and Primary
Assumed knowledge: Any 2 units of English and any 2 units of mathematics (Band 4 for primary teaching).
Recommended studies: Minimum of three Band 5 (or E3) HSC results, including one in English; Band 4 in mathematics.
See course entry requirements at my.une.edu.au/courses for full details.

K-12 Teaching
Assumed knowledge: Any 2 units of English and any 2 units of mathematics.
Recommended studies: Minimum of three Band 5 (or E3) HSC results, including one in English; Band 4 in mathematics. For Secondary Mathematics: Mathematics Extension 1.
See course entry requirements at my.une.edu.au/courses for full details.

K-6 Teaching
Special and Inclusive Education (Primary)
Assumed knowledge: Any 2 units of English, any 2 units of mathematics (Band 4 for primary teaching).

Secondary Arts
Secondary Mathematics
Secondary Science
Secondary Music (Distance only)
Additional selection criteria: Admission to B Education (Secondary Music) requires:
- a performing standard equivalent to Grade 6 of the Australian Music Examinations Board demonstrated via audition or music performance qualification, and
- a music theory standard equivalent to Grade 4 of the Australian Music Examinations Board demonstrated via music performance qualifications or successful completion of a music theory test set by the Music Discipline convenor, and
- a personal statement assessed by the discipline.
See course entry requirements at my.une.edu.au/courses for full details.

ENVIRONMENTAL SCIENCE

Areas of study: Conservation ecology, envirobusiness, natural resource management, remediation and restoration.
Assumed knowledge: Chemistry, Mathematics Advanced, any 2 units of English.
Recommended Studies: Biology.

GEOSCIENCE

Areas of study: Applied geophysics, digital geological mapping by GIS, environmental geology, geochemistry, palaeontology, petrology, resource geology, sedimentology and structural geology.
Assumed knowledge: Any 2 units of English, Chemistry, Mathematics Advanced.
Recommended studies: Biology and/or Physics.

HISTORICAL INQUIRY AND PRACTICE

Assumed knowledge: Any 2 units of English.
Recommended studies: Ancient History or Modern History.

INTERNATIONAL STUDIES

Areas of study: Global politics and peace, languages, societies.
Assumed knowledge: Any 2 units of English.

LANGUAGES

Areas of study: Chinese (Mandarin), French, German, Indonesian, Italian, Japanese, Spanish.
Assumed knowledge: Any 2 units of English.

LANGUAGES AND INTERNATIONAL BUSINESS

Areas of study: Chinese (Mandarin), French, German, Indonesian, Italian, Japanese, Spanish.
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of mathematics.

LAW

LAW (DOUBLE DEGREES)
For the other area of study: Refer to the relevant entry
- Agriculture/Law
- Arts/Law
- Business/Law
- Computer Science/Law
- Criminology/Law
- Economics/Law
- Environmental Science/Law
- Science/Law.

MEDIA AND COMMUNICATION STUDIES

Areas of study: Media and culture, writing and publishing.
Assumed knowledge: Any 2 units of English.

MEDICINE SCIENCE AND DOCTOR OF MEDICINE

Areas of study: Medicine.
Recommended studies: Any 2 units of English.
Additional selection criteria: Direct University Joint Medical Program application form, University Clinical Aptitude Test (UCAT), Multiple Skills Assessment (Interview), Personal Qualities Assessment.
The medical program is offered jointly by the University of Newcastle and the University of New England.

MUSIC (DISTANCE ONLY)

Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of music.
Additional selection criteria: Admission to B Music requires:
- a performing standard equivalent to Grade 6 of the Australian Music Examinations Board demonstrated via audition or music performance qualification, and
- a music theory standard equivalent to Grade 4 of the Australian Music Examinations Board demonstrated via music performance qualifications or successful completion of a music theory test set by the Music Discipline convenor, and
- a personal statement assessed by the discipline.

NURSING

Assumed knowledge: Any 2 units of English, any 2 units of science.

PHARMACY WITH HONOURS

Assumed knowledge: Chemistry, Mathematics Advanced.
Recommended studies: Biology, Mathematics Extension 1 or 2.
PSYCHOLOGICAL SCIENCE
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of mathematics.

PSYCHOLOGY
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of mathematics.

RURAL SCIENCE
Areas of study: Agricultural systems, animal and plant breeding, animal and plant nutrition, animal and plant physiology, biochemistry, cotton and grain production, farm management, horticultural science, meat science, pasture and crop agronomy, post-harvest technology, precision agriculture, sheep and wool science, soil science.
Assumed knowledge: Chemistry, Mathematics Advanced, any 2 units of English.
Recommended studies: Biology.

SCIENCE
Biomedical
Assumed knowledge: Mathematics Advanced.
Recommended studies: Biology plus Chemistry and/or Physics.

Science
Areas of study: Animal science and veterinary studies, applied physics, archaeology, biochemistry/biotechnology, biodiversity, botany, chemistry, computational science, forensic science, genetics, geogrophy, geoscience, mathematics, medical chemistry, microbiology, neuroscience, palaeobiology, physiology, psychology, zoology.
Assumed knowledge: Mathematics Advanced.
Recommended studies: Depending on degree subjects chosen, Biology, Chemistry and/or Physics.

SCIENTIFIC STUDIES
Assumed knowledge: Any 2 units of English.

SOCIAL SCIENCE
Areas of study: Aboriginal perspectives, criminology, health management, linguistics, organisational management, peace and developmental studies, political and international studies, psychology, social philosophy, sociology, urban and regional studies.
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of mathematics (if majoring in Psychology).

SOCIAL WORK
Recommended studies: Any 2 units of English.

SPORTS AND EXERCISE SCIENCE
Clinical Exercise Physiology
Exercise and Sports Science
Assumed knowledge: Any 2 units of mathematics, Personal Development, Health and Physical Education (PDHPE) and/or any 2 units of science.
Recommended studies: Chemistry and/or Biology.

SUSTAINABILITY
Areas of study: Community engagement and development, cultural heritage management, environmental governance, environmental resilience, governance and regulation.
Assumed knowledge: Any 2 units of English.

URBAN AND REGIONAL PLANNING
Assumed knowledge: Any 2 units of English.

ZOOLOGY
Areas of study: Animal behaviour, animal physiology, animal/freshwater/marine ecology, entomology, environmental and comparative physiology, freshwater ecology, marine ecology, parasitology.
Assumed knowledge: Chemistry, Mathematics Advanced, any 2 units of English.
Recommended studies: Biology.

COMBINED DEGREES
If you intend to undertake combined degrees, check the prerequisites, assumed knowledge and recommended studies for both degrees.
- Agriculture/Business
- Arts/Business
- Arts/Science
- Business/Economics.
Contact the University for further details.
Double degrees in Law are also offered. Refer to Law entry for details.

READ THIS FIRST

- The University of Newcastle recognises performance in relevant HSC subjects. For information about the University of Year 12 Subject Spotlight Early Offer Scheme and Year 12 Adjustment Scheme, search for 'getting in' at newcastle.edu.au.
- The University of Newcastle offers a number of refresher and preparation courses to assist students who may not have the recommended studies or assumed knowledge requirements. The preparation courses are offered before term commences and cover many areas such as mathematics, chemistry, physics and other specific academic skills. For information about preparation courses search for 'bridging courses' at newcastle.edu.au.
- Not all campuses offer all courses and areas of study. Visit the University website for course locations.
- When you read 'any 2 units of science' this can include Biology, Chemistry, Physics, Earth and Environmental Science or Investigating Science.
- All programs are subject to routine review.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

ARTS

Areas of study: Ancient history; Chinese; creative and performing arts; education; English and writing; film, media and cultural studies; French; gender and sexuality studies; German; global Indigenous studies; history; human geography and the environment; information technology; Japanese; linguistics; politics and international relations; psychology studies; sociology and anthropology; studies of religion; violence studies; and writing studies.

Note: Areas of study are subject to change and not all are available on both campuses. A suite of minors and majors are available online.

Recommended studies: For psychology studies*: Mathematics Advanced. For all other majors: English Advanced.

* Psychology studies are not accredited by the Australian Psychology Accreditation Council.

BIOMEDICAL SCIENCE

Areas of study: Anatomy, bioinformatics, cell and molecular biology, experimental design and analysis, genetics and immunology, medical biochemistry, microbiology, neuroscience, nutritional science, pathophysiology, pharmacology, physiology.

Assumed knowledge: Mathematics Advanced, Chemistry, Physics, Biology.

BUSINESS

Areas of study: Entrepreneurship and innovation, governance, human resource management, international business, leadership and management, marketing, policy and political economy, sports management and tourism management.

Assumed knowledge: Mathematics Advanced.

COASTAL AND MARINE SCIENCE

Areas of study: Animal biology, coastal and surface processes, biodiversity and conservation, geography, environmental regulation, politics and policy, coastal infrastructure.

Assumed knowledge: Mathematics Advanced.

COMMERCIAL SCIENCE

Areas of study: Accounting, economics, finance.

Assumed knowledge: Mathematics Advanced.

COMMUNICATION

Areas of study: Animation, communication, experience creation, media production, news and digital media, public relations and strategic communication, user experience (UX) design.

Assumed knowledge: Any 2 units of English.

Recommended studies: One or more of Biology, Chemistry, Earth and Environmental Science.
STEPS TO UNI FOR YEAR 10 STUDENTS

COMPUTER SCIENCE
Areas of study: Majors: Computer systems and robotics, cyber security, data science, or software development. The program also includes courses in advanced programming techniques, algorithms, artificial intelligence and machine learning, compilers, computer graphics, computer networks, data mining, data security, databases and different programming languages, experimental and theoretical aspects in computer science, fundamentals of software development, human computer interaction, object-oriented technologies, operating systems, software verification, systems, theory of computation and web engineering.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1.

CONSTRUCTION MANAGEMENT
Areas of study: Building information modelling, construction management, construction technology, environmentally sustainable development, estimating, information and communication technology, project management, quantity surveying and estimating, risk management.
Recommended studies: Any 2 units of English, Mathematics Advanced.

CREATIVE INDUSTRIES
Areas of study: Communication and media, creative and performing arts, design, imaging technologies, information technology, music, studio practices, visual art, writing and publishing.
Assumed knowledge: Any 2 units of English.

DESIGN (ARCHITECTURE)
Areas of study: Architectural design, architectural history and theory, architectural technology, professional practice.
Recommended studies: Any 2 units of English, Ancient History or Modern History, plus one or more of Visual Arts, Design and Technology, Industrial Technology.

DEVELOPMENT STUDIES
Areas of study: Cultures and citizenship, environmental sustainability, globalisation and economic development, urban and regional development.
Recommended studies: Any 2 units of English.

EDUCATION
Early Childhood and Primary
Areas of study: Aboriginal education, behaviour management, children’s learning and growth across the span of birth-12 years, ethics and professional codes of conduct, families and society, language and mathematical learning, policy and issues, programming and planning for children aged 0-5 years, psychology of learning and teaching, special education.
Assumed knowledge: HSC Band 5 results in a minimum of three subjects, one of which must be English; Band 4 in mathematics.
Recommended studies: Mathematics Advanced.

Primary
Areas of study: Primary teaching in all of the primary subjects including English; Mathematics; Science and Technology; Personal Development, Health and Physical Education; Creative Arts; and Human Society and its Environment; plus an in-depth study which can be in special education or one of the subjects listed above.
Assumed knowledge: HSC Band 5 results in a minimum of three subjects, one of which must be English; Band 4 in mathematics.

Secondary
Areas of study: Aboriginal studies, ancient history, biology, business studies, chemistry, computing information systems and software design, design and technology, drama, earth and environmental science, economics, English, food technology, geography, health and physical education, humanities, industrial technology engineering, industrial technology graphics and multimedia, information processes and technology, investigating science, languages (Chinese, French, German, Japanese), legal studies, mathematics, modern history, physics, science, society and culture, special education, STEM, studies of religion, teaching English as a second language, technology, textiles and design, visual arts.
Assumed knowledge: HSC Band 5 results in a minimum of three subjects, one of which must be English.

ENGINEERING
Aerospace
Areas of study: Aerospace design and materials, aircraft operations and performance, avionics, embedded systems engineering, principles of flight, propulsion.
Assumed knowledge: Mathematics Advanced (Band 5), any 2 units of science (Physics or Chemistry preferred).
Recommended studies: Mathematics Extension 1 plus Physics or Chemistry.

Chemical
Areas of study: Chemical engineering with specific courses in catalytic processing, coal and mineral processing, design of clean and economical processes, environmental processing and safety, fundamental process-engineering, liquids and gases, process control, project management and research, reactions and separations across solids.
Assumed knowledge: Mathematics Advanced (Band 5), any 2 units of science (Physics or Chemistry preferred).
Recommended studies: Mathematics Extension 1 plus Physics or Chemistry.

Civil
Areas of study: All of our Civil Engineering students complete courses in the three core civil specialisations of structural, water and geotechnical engineering, making them highly employable upon graduation. Areas of study include: Engineering design, fluid mechanics, geotechnical engineering, materials, pollution control, project and asset management, risk assessment, structural engineering, surveying, transportation engineering and water treatment, water resources engineering.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

Computer Systems
Areas of study: Communication networks, computer architecture, computer engineering, digital systems design, distributed systems, electronics, embedded systems, engineering management and systems, programmable logic design, software engineering, systems design, web engineering.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

Electrical and Electronic
Areas of study: Analog and digital communications, automatic control, computer engineering, electric energy systems, electric machines and power systems, electronic engineering design, electronics, engineering mathematics, physics, procedural programming, signals and systems.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

Environmental
Areas of study: Biology, chemical engineering, chemistry, environmental planning and design, fluid mechanics, geotechnical engineering, land and water management, surface and groundwater pollutant transport, waste treatment, water engineering.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.
Mechanical
Areas of study: Advanced computer-aided engineering, bulk solids handling, design of machines and processes, engineering management and advanced materials, fluid mechanics, heat transfer, properties and uses of materials, thermodynamics.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

Mechatronics
Areas of study: Advanced control design, autonomous systems, electronics design, embedded systems design, mechanical design and software design, robotics, sensors and actuators, vehicle dynamics.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

Medical
Areas of study: Majors: Medical biomechanics, medical computing, medical devices or medical signal analysis. You will also take courses in analog and digital communications, engineering design and neurobiology, human pathophysiology, pharmacology, programming and computing.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

Mining transfer program
The Mining Engineering degree is comprised of two years’ study at UON. Upon successful application through UAC the remaining two years are undertaken at UNSW Sydney or the University of Wollongong. The studies undertaken at UON are the same as the first two years of our Civil Engineering program. For areas of study, assumed knowledge and recommended studies refer to the Civil Engineering entry.

Renewable Energy
Areas of study: Bioenergy, geothermal, grid integration, hydro and hybrid systems, power system design, solar, wind, plus electives in climate change policy, law and economics, social and environmental sciences.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

Software
Areas of study: Computer and data security, computer architecture, computer networks, design and implementation, distributed processing, engineering management, fundamentals of computing, human computer interaction, object-oriented technologies, programming languages, real-time systems, software development methodology, software system analysis, system software and web engineering.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

ENVIRONMENTAL SCIENCE AND MANAGEMENT
Areas of study: Coastal and marine science and sustainability, ecosystems and biodiversity, natural resource and hazards.
Assumed knowledge: Mathematics Advanced plus Chemistry or Biology.

EXERCISE AND SPORT SCIENCE
Areas of study: Biomechanics; exercise physiology; exercise testing and prescription; growth, development and ageing; motor control and learning; sport and exercise psychology; sports nutrition.
Assumed knowledge: At least two of Biology, Chemistry, Mathematics Advanced, Physics.
Recommended studies: Personal Development, Health and Physical Education (PDHPE).

FOOD SCIENCE AND HUMAN NUTRITION
Areas of study: Biomedical science, chemistry, food analysis, food and nutrition, food product development, functional foods and health claims, macro nutrients, micronutrients, nutrition in health and disease, plant and animal food products.
Recommended studies: Biology, Chemistry, Mathematics Advanced.

GLOBAL INDIGENOUS STUDIES
Areas of study: Entrepreneurship and innovation, film, gender and sexuality studies, global indigenous studies, global Indigenous studies, governance, human geography and the environment, human resource management, human services, information technology, media and cultural studies, policy and political economy, sociology and anthropology, writing studies. Some selected majors are available fully online.

INFORMATION TECHNOLOGY
Areas of study: Major in either business technology, interactive media or systems development. The program also includes courses in advanced programming techniques, algorithms, artificial intelligence and machine learning, computer graphics and networks, databases, programming languages and data mining, data security, computer science, software development, human computer interaction, object-oriented technologies, operating systems, software verification, systems, theory of computation, web engineering.
Assumed knowledge: Any 2 units of English.

LAWS (COMBINED)
− Arts/Laws
− Business/Laws
− Commerce/Laws
− Communication/Laws
− Development Studies/Laws
− Global Indigenous Studies/Laws
− Innovation and Entrepreneurship/Laws
− Science/Laws
− Social Science/Laws
Assumed knowledge: For Laws: None. For other areas of study: Refer to the relevant entry.
Recommended studies: For Laws: None. For other area of study: Refer to the relevant entry.

MATHEMATICS
Areas of study: Applied mathematics, pure mathematics and statistics.
Assumed knowledge: Mathematics Advanced.
Recommended studies: Mathematics Extension 1.

MEDICAL RADIATION SCIENCE (DIAGNOSTIC RADIOGRAPHY)
Areas of study: Anatomy and physiology, clinical education, instrumentation, physics, radiation protection, research methodology.
Assumed knowledge: Any 2 units of English plus Mathematics Advanced or Physics.

MEDICAL RADIATION SCIENCE (NUCLEAR MEDICINE)
Areas of study: Anatomy, molecular imaging, nuclear medicine instrumentation and radiopharmacy, nuclear medicine theory, patient care, physiology, psychology, research methodology.
Assumed knowledge: Any 2 units of English plus Mathematics Advanced or Physics.

MEDICAL RADIATION SCIENCE (RADIATION THERAPY)
Areas of study: Anatomy, behavioural science, clinical methods, imaging and treatment, oncology, statistics and research methodology.
Assumed knowledge: Any 2 units of English plus Mathematics Advanced or Physics.
STEPS TO UNI FOR YEAR 10 STUDENTS

MEDICINE
The medical program is offered jointly by the University of Newcastle and the University of New England.
Areas of study: Clinical medical and surgical specialties (e.g. respiratory and cardiovascular medicine, cancer treatment, orthopaedics), community and public health, hospital based medicine, medical sciences, mental health, women’s and children’s health. Skills in research and the critical evaluation of evidence are also introduced.
Recommended studies: Any 2 units of English.
Additional selection criteria: Direct University Joint Medical Program application form, University Clinical Aptitude Test (UCAT), Multiple Skills Assessment (interview), Personal Qualities Assessment.

MIDWIFERY
Areas of study: Antenatal care, care of the newborn baby, labour and birthing care, postnatal care.
Assumed knowledge: Any 2 units of English (Band 4), Mathematics Standard 2, Biology and/or Chemistry.
Recommended studies: English Standard.
Additional selection criteria: Direct University B Midwifery Clinical Placement Preference application form.

MUSIC
Areas of study: Composition, creative production, music in the creative industries, music research and communication, performance (instrument, voice), songwriting.
Assumed knowledge: Music 1 or demonstrated musical experience or qualification equivalent to Music 1 or AMEB (Grade 6 to 8 pass).
Additional selection criteria: Audition (performance), interview (oral assessment), application (written assessment).

NURSING
Areas of study: Aged care; human bioscience; mental health; primary, secondary and tertiary nursing.
Assumed knowledge: Any 2 units of English plus Mathematics Standard 2, Chemistry and/or Biology.

NUTRITION AND DIETETICS
Areas of study: Basic and applied sciences, dietetic practice, food service and management, medical nutrition therapy, paediatric nutrition and dietetics, professional practice, public health nutrition, social sciences, statistics and research methodology.
Recommended studies: Chemistry.

OCCUPATIONAL THERAPY
Areas of study: Anatomy and physiology, behavioural and occupational therapy, biomedical, mental health, occupational sciences, psychology, sociology and community development, statistics and research methodology.
Recommended studies: Biology, Mathematics Advanced, Chemistry.

PHarmacY
Areas of study: Anatomy and physiology, chemistry, dosage formulation, drug design and discovery, epidemiology, first aid, mental health, pharmacotherapeutics.
Assumed knowledge: Mathematics Advanced (Band 5), English Advanced, Chemistry, Physics.
Recommended studies: Mathematics Extension 1.

PHYSIOTHERAPY
Areas of study: Advanced anatomy and physiology, clinical physiotherapy studies, community health, health promotion, research methodology.
Assumed knowledge: English Advanced, Chemistry plus Physics or Biology.

PODIATRY
Areas of study: Anatomy, biomechanics, physiology, podiatric medicine.
Assumed knowledge: Chemistry, Mathematics Advanced.

PSYCHOLOGICAL SCIENCE
Areas of study: Clinical and abnormal behaviour, cognition and information processing, developmental psychology, neuroscience, perceptual processes and learning theory, psychopharmacology, research methodology, social psychology and personality, statistics.
Assumed knowledge: Mathematics Advanced.
Recommended studies: Biology.

PUBLIC AND COMMUNITY HEALTH
Areas of study: Choose from eight interdisciplinary majors including: Environmental health, epidemiology and data sciences, global health, health promotion, health sociology and anthropology, integrated systems and health administration, social justice and health inequity, social marketing.
Recommended studies: Personal Development, Health and Physical Education (PDHPE), or Family and Community Studies.

SCIENCE
Areas of study: You can choose to study from the following majors:
Newcastle: Animal biology, biology; chemistry; chemistry of advanced materials; earth sciences; environmental and analytical chemistry; geography; geology; integrated geography; mathematics; medicinal and organic chemistry; physics; plant biology; psychology; statistics; sustainable resource management; water, climate and soil.
Central Coast: Biodiversity; coastal, conservation, ecological and marine sciences; conservation; environmental remediation; psychology; sustainable resource management.
Assumed knowledge: Mathematics Advanced.
Recommended studies: Biology and/or Chemistry and/or Physics depending on major area of study.

SOCIAL SCIENCE
Areas of study: Criminology, global Indigenous studies, history, human geography and the environment, human resource management and industrial relations, human services, leisure and tourism management, linguistics, politics and international relations, psychology studies, sociology, anthropology.
Recommended studies: English Advanced. Other related subjects, such as Geography, Ancient or Modern History, Community and Family Studies, Society and Culture are recommended depending on the intended major.
SELECTING YOUR HSC SUBJECTS?

UAC’s FREE ONLINE TOOL – SUBJECT COMPASS – can help you find your way to the HSC courses that are right for you. Tell us about your interests, skills and goals and we’ll make some suggestions.

My Interests
I know what I’m interested in

My Skills
I know what I’m good at

My Personality
I know the environment I’d like to work in

My Uni Course
I know what I want to study at uni

My Career
I know my intended career path

HSC subject selection made easy.
Get started at

uac.edu.au/subjectcompass

SOCIAL WORK

Areas of study: Aboriginal studies; law for social work; psychology; social policy and planning; social work ethics; sociology.
Recommended studies: English Advanced, Society and Culture, Community and Family Studies, languages.

SPEECH PATHOLOGY

Areas of study: Biomedical science; linguistics; neuroscience and head and neck anatomy; psychology; speech pathology.
Recommended studies: Biology, Chemistry, Mathematics Advanced, English Advanced.

SURVEYING

Areas of study: Cadastral engineering and construction, geodesy, geographic information systems, geomatics, hydrographic surveying, land management, laser scanning, photogrammetry, satellite positioning, spatial information systems and computing, town planning and valuation, water resources.
Assumed knowledge: Mathematics Advanced (Band 5).
Recommended studies: Mathematics Extension 1, any 2 units of science.

VISUAL COMMUNICATION

Areas of study: Animation; experience creation; graphic communication and typography; illustration; interaction and user experience design; media production; visual communication design.
Recommended studies: One or more of Visual Arts, Design and Technology, Textiles and Design, Industrial Technology.

COMBINED PROGRAMS

If you intend to undertake combined programs, check the prerequisites, assumed knowledge and recommended studies for both programs. Not all specialisations or majors within a program may be available within a combined program. Visit the University website for further details.

− Arts/Innovation and Entrepreneurship
− Arts/Science
− Business/Commerce
− Business/Innovation and Entrepreneurship
− Commerce/Innovation and Entrepreneurship
− Creative Industries/Innovation and Entrepreneurship
− Development Studies/Business
− Development Studies/Global Indigenous Studies
− Development Studies/Social Science
− Engineering/Business
− Engineering/Computer Science
− Engineering/Engineering
− Engineering/Mathematics
− Engineering/Science
− Engineering/Surveying
− Food Science/Business
− Information Technology/Business
− Mathematics/Computer Science
− Mathematics/Science
− Music/Arts
− Science/Innovation and Entrepreneurship
− Surveying/Business

Combined programs in Laws are also offered. Refer to Laws entry for details.
ADVANCED COMPUTING

**Areas of study:** Computer science, databases, information systems, mathematics, programming, systems analysis.

**Course prerequisites:** Mathematics Advanced (Band 4).

**Assumed knowledge:** Mathematics Extension 1.

ARCHITECTURE

**Architecture and Environments**

**Areas of study:** Architectural and environmental design, architectural history and theory, architectural sciences and technologies, digital architecture and communications, property and sustainability, urban design and planning.

**Assumed knowledge:** English Advanced, Mathematics Advanced.

**Design in Architecture**

**Areas of study:** Architectural communications, architectural design, architectural history and theory, architectural technologies, art workshops, environment and sustainability, professional practice.

**Assumed knowledge:** English Advanced, Mathematics Advanced.

ARTS AND SOCIAL SCIENCES

**Arts**

**Dalyell Scholars**

**International and Global Studies**

**Languages**

**Media and Communications**

**Politics and International Relations**

**Areas of study:** **Majors:** American studies; ancient Greek; ancient history; anthropology; Arabic language and cultures; archaeology; art history; Asian studies; biblical studies and classical Hebrew; Chinese studies; criminology cultural studies; digital cultures; diversity studies; econometrics; economic policy; economics; education; English; environmental, agricultural and resource economics; European studies; film studies; financial economics; French and francophone studies; gender studies; Germanic studies; Hebrew (modern); history; Indigenous studies; Indonesian studies; international comparative literary studies; international relations; Italian studies; Japanese studies; Jewish civilisation, thought and culture; Korean studies; Latin; linguistics; media studies; modern Greek studies; music; philosophy; political economy; politics; psychology; Sanskrit; social policy; socio-legal studies; sociology; Spanish and Latin American studies; studies in religion; theatre and performance studies; visual arts; writing studies.

**Assumed knowledge:** Depends on first-year subjects chosen. In most cases, where a first-year subject has a level of assumed knowledge, there is an alternative subject available with no knowledge assumed.
COMMERCE

Areas of study: Accounting, banking, business analytics, business information systems, business law, finance, industrial relations and human resource management, international business, management and marketing.
Course prerequisites: Mathematics Advanced (Band 4).
Assumed knowledge: Depends on first-year subjects chosen.

DENTISTRY

Oral Health

Areas of study: Dental hygiene, dental therapy, oral health education and promotion.
Assumed knowledge: Biology.

Science/Doctor of Dental Medicine

Areas of study: Refer to Science entry. All students undertake studies in biology. For Doctor of Dental Medicine: Clinical dentistry, life sciences, research project.
Course prerequisites: Mathematics Advanced (Band 4).
Assumed knowledge: Mathematics Extension 1. All students in Science must take some study in mathematics.

DESIGN COMPUTING

Areas of study: App design, creative technology, design thinking, digital design, graphic design, human computer experience information architecture, information visualisation design, interaction design, physical computing, sound design, user-centred design, user-experience. Other related units and majors may be taken from fields including Arts and Social Sciences, Business, Engineering, Information Technology, Science.
Assumed knowledge: Mathematics Advanced.

DIAGNOSTIC RADIOGRAPHY

Areas of study: Anatomy, biological sciences, clinical education, equipment and imaging techniques, image processing, pathology, physics, psychology, radiation biology.
Assumed knowledge: Physics.
Recommended studies: Mathematics Advanced plus Biology or Chemistry.

ECONOMICS

Areas of study: Majors: Agricultural and resource economics, econometrics, economics, financial economics. Second area of study from those offered by the Business School (see Commerce) or Arts and Social Sciences.
Course prerequisites: Mathematics Advanced (Band 4).
Assumed knowledge: Other assumed knowledge depends on first-year subjects chosen.

EDUCATION

Early Childhood

Areas of study: Child development and learning, education, learning studies (arts, health and wellbeing science, language, mathematics), professional studies.
Assumed knowledge: Depends on first-year subjects chosen.
Additional selection criteria: Personal statement.

Primary

Areas of study: Education and primary education.
Course prerequisites: Band 5 in 2 units of English (English Standard or English Advanced); Band 5 in two other HSC subjects; Band 4 in mathematics.
Assumed knowledge: For Mathematics specialisation: Mathematics Standard or Mathematics Advanced.
Additional selection criteria: Personal statement.

Secondary

Areas of study: Health and physical education, humanities and social sciences, mathematics, science.
Course prerequisites: For health and physical education: Band 5 in 2 units of English (English Standard or English Advanced), Band 5 in two other HSC subjects.
For mathematics and science: Mathematics Advanced (Band 4).
Assumed knowledge: For mathematics and science: Mathematics Extension 1.
Additional selection criteria: Personal statement.
All science students must take some study in mathematics. Graduates intending to teach science at a secondary level must complete at least one year of study in chemistry or physics during their degree.

ENGINEERING

Aeronautical
Biomedical
Chemical and Biomolecular
Civil
Dalyell Scholars
Electrical
Flexible first year
Mechanical
Mechatronic
Software
Space Engineering

Course prerequisites: Mathematics Advanced (Band 4).
Assumed knowledge: Mathematics Extension 1 plus Chemistry and/or Physics (depending on the engineering stream chosen).

EXERCISE AND SPORT SCIENCE

Exercise Physiology
Exercise and Sport Science

Areas of study: Anatomy; biochemistry; biomechanics; learning and control of human movement; nutrition; physiology/exercise physiology and the application of these fundamental sciences to sport, exercise, ageing, rehabilitation, public health and research.
Assumed knowledge: Chemistry, Mathematics Advanced.

LAW (COMBINED)

– Arts/Laws
– Commerce/Laws
– Economics/Laws
– Engineering Honours/Laws
– Science/Laws

Course prerequisites: For Law combined with Commerce, Economics, Engineering Honours or Science: Mathematics Advanced (Band 4).
Assumed knowledge: For Law: None.
**For the other area of study:** Refer to the relevant entry.

**LIBERAL ARTS AND SCIENCE**

**Areas of study:** Major from Arts and Social Sciences or a major from Science, a sequence of subjects in Science (if an Arts major is chosen) or in Arts (if a Science major is chosen) and a sequence in the Liberal Studies stream (analytical thinking, communication, culture, ethics, scientific enquiry, society and global citizenship, technological literacy). For majors, see Arts and Social Sciences or Science.

**Assumed knowledge:** Depends on first-year subjects chosen.

**PHYSIOTHERAPY**

**Areas of study:** Biomechanics, exercise physiology, human anatomy and physiology, measurement of human performance, motor performance and learning, neuroscience, psychology, research design and statistics.

**Assumed knowledge:** Chemistry, Physics.

**Recommended studies:** Mathematics Advanced.

**PROJECT MANAGEMENT**

**Areas of study:** Majors: Built environment, construction. Studies include complex project coordination, management data, organisational behaviour, people and change, project change, project control, project finance, psychology, quality management, risk management, statistics.

**Course prerequisites:** Mathematics Advanced (Band 4).

**Assumed knowledge:** Mathematics Extension 1.

**PSYCHOLOGY**

**Areas of study:** Psychology, psychological science.

**Course prerequisites:** Mathematics Advanced (Band 4).

**Assumed knowledge:** Depends on first-year subjects chosen.

**SCIENCE**

**Majors:** Agriculture; agroecosystems; anatomy and histology; animal and veterinary bioscience; animal health, disease and welfare; animal production; applied medical science; biochemistry and molecular biology; biology; cell and developmental biology; chemistry; computer science; data science; ecology and evolutionary biology; environmental science; environmental studies; financial mathematics and statistics; food and agribusiness; food science; genetics and genomics; geography; geology and geophysics; health; history and philosophy of science; human movement (Health stream only); immunology; immunology and pathology; infectious diseases; information systems; marine science; mathematical sciences; mathematics; medical science; medicinal chemistry; microbiology; nanoscience and nanotechnology; neuroscience; nutrition and dietetics; nutrition science; pathology; pharmacology; physics; physiology; plant production; plant science; psychological science; quantitative life sciences; software development; soil science and hydrology; statistics; virology.

**Majors:** Built environment, construction. Studies include complex project coordination, management data, organisational behaviour, people and change, project change, project control, project finance, psychology, quality management, risk management, statistics.

**Assumed knowledge:** Depends on first-year subjects chosen.

**Areas of study:** Agriculture, including a major in animal production, plant production or soil science and hydrology; plus a second major from those offered for Science.

**Course prerequisites:** Mathematics Advanced (Band 4).

**Assumed knowledge:** Chemistry.

**Recommended studies:** Biology.

**Animal and Veterinary Bioscience**

**Areas of study:** Animal and veterinary bioscience plus a second major from those offered for Science.

**Course prerequisites:** Mathematics Advanced (Band 4).

**Assumed knowledge:** Chemistry.

**Recommended studies:** Biology.

**Food and Agribusiness**

**Areas of study:** Food science and a second major from: Accounting, agricultural and resource economics, banking, business analytics, business information systems, business law, economic policy, economics, finance, industrial relations and human resource management, international business, management or marketing.

**Course prerequisites:** Mathematics Advanced (Band 4).

**Assumed knowledge:** Chemistry.
Health

Areas of study: Health, a second major from those offered for Science.
Course prerequisites: Mathematics Advanced (Band 4).
Assumed knowledge: For human movement major: Chemistry. For other majors: Depends on major chosen.

Medical Science

Areas of study: Medical science including a major in anatomy, biochemistry, biology, cell pathology, genetics, histology, history and philosophy of science, immunology, infectious diseases, microbiology, molecular biology, pharmacology, physiology or psychology; plus a second major from those offered for Science.
Course prerequisites: Mathematics Advanced (Band 4).
Assumed knowledge: Chemistry plus Biology or Physics.

Taronga Wildlife Conservation

Areas of study: Wildlife conservation plus a second major from those offered for Science.
Course prerequisites: Mathematics Advanced (Band 4).
Assumed knowledge: Biology.

Social Work

Areas of study: Social policy, social work, sociology.
Assumed knowledge: Depends on first-year subjects chosen.

Speech Pathology

Areas of study: Audiology, biomedical sciences, linguistics and language development, neurobiology, phonetics, psychology, research methods, sociology, specialist areas (aphasia, dysarthria, dyslexia, stuttering).
Recommended studies: English Advanced.

Veterinary Biology/Doctor of Veterinary Medicine

Areas of study: Animal diseases and pathology, animal husbandry, cell biology, chemistry, clinical and professional practice, pharmacology, veterinary anatomy and physiology, veterinary conservation biology, veterinary medicine, veterinary surgery.
Course prerequisites: Mathematics Advanced (Band 4).
Assumed knowledge: Chemistry, Physics.
Recommended studies: Biology.

Visual Arts

Areas of study: Visual arts specialisation.
Recommended studies: Design and Technology, Visual Arts.

Additional selection criteria: Portfolio.

Combined and Double Degrees

For combined degrees, see the course prerequisites, assumed knowledge and recommended studies for both degrees.
- Advanced Computing/Commerce
- Advanced Computing/Science
- Advanced Computing/Science (Health)
- Advanced Computing/Science (Medical Science)
- Arts/Laws
- Arts/Master of Nursing
- Arts/Doctor of Medicine
- Arts/Social Work
- Commerce/Laws
- Design in Architecture (Honours)/Master of Architecture
- Economics/Laws
- Education (Secondary: Humanities and Social Sciences)/Arts
- Education (Secondary: Mathematics)/Science
- Education (Secondary: Science)/Science
- Engineering Honours/Arts
- Engineering Honours/Commerce
- Engineering Honours/Laws
- Engineering Honours/Project Management
- Engineering Honours/Science
- Engineering Honours/Science (Health)
- Engineering Honours/Science (Medical Science)
- Engineering Honours (Civil)/Design in Architecture
- Science/Laws
- Science/Doctor of Dental Medicine
- Science/Doctor of Medicine
- Science/Master of Mathematical Sciences
- Science/Master of Nursing
- Science/Master of Nutrition and Dietetics
- Science (Health)/Master of Nursing
- Science (Medical Science)/Doctor of Medicine
- Veterinary Biology/Doctor of Veterinary Medicine

Advanced Studies (Combined)

This is not a standalone degree. It may be taken in conjunction with:
- Arts
- Commerce
- Design Computing
- Economics
- Exercise and Sports Science
- Music
- Science
- Visual Arts.
STEPS TO UNI FOR YEAR 10 STUDENTS

ADVANCED SCIENCE

Advanced Science – Environmental Biotechnology
Areas of study: Bioinformatics, biotechnology, cell biology and genetics, chemistry, environmental biotechnology, mathematical modelling for science, medical biotechnology, metabolic biochemistry, microbiology, molecular biology, physical aspects of nature.
Assumed knowledge: Mathematics Advanced, any 2 units of science, any 2 units of English.
Recommended studies: Biology, Mathematics Extension 1.

Advanced Science – Pharmaceutical Sciences
Areas of study: Cell biology and genetics, drug discovery, human anatomy, human anatomy and physiology, medical and applied physiology, medicinal chemistry, microbiology, pharmacology.
Assumed knowledge: Mathematics Advanced, any 2 units of science, any 2 units of English.
Recommended studies: Biology, Mathematics Extension 1.

Advanced Science – Pre-medicine
Areas of study: Biochemistry, cell biology, chemistry, genetics, human anatomy and physiology, histology, microbiology, pathophysiology, pharmacology, physics, preparing for graduate medicine.
Assumed knowledge: Mathematics Advanced, any 2 units of science, any 2 units of English.
Recommended studies: Biology, Mathematics Extension 1.

ANALYTICS

Areas of study: Consumer analytics, data analysis and analytics, database fundamentals, financial mathematics, mathematical analysis and modelling, operations analysis, probability, quantitative management, risk management.
Assumed knowledge: Mathematics Advanced, any 2 units of English.
Recommended studies: Mathematics Extension 1.

ARCHITECTURE

Areas of study: Architecture, architecture + urbanism history/theory, construction technology, design, design culture, design technology, environmental design, graphic communications, sustainability.
Assumed knowledge: Mathematics Advanced, any 2 units of English.
Recommended studies: Design and Technology, Visual Arts.

BIOMEDICAL PHYSICS

Areas of study: Advanced medical device technology, applied electronics and interfacing, biomedical physics, bionanotechnology, cell biology and genetics, chemistry, human anatomy and physiology, human pathophysiology, imaging science, mathematical modelling for science, medical imaging technology, physics in action, quantum physics, solid-state science and nanodevices.
Assumed knowledge: Mathematics Advanced, any 2 units of science, any 2 units of English.
Recommended studies: Mathematics Extension 1, Physics.

BIOMEDICAL SCIENCE

Areas of study: Allergy, anatomy, autoimmunity, biochemistry, blood banks, blood tests, blood transfusions, cell biology, clinical microbiology, diabetes, diagnosis disease, epidemiology, genetic screening, genetics, haematology, histology, histopathology, immunity, immunodeficiency, immunology, infection, laboratory, molecular biology, parasitology, pathology, physiology, proteomics, research, serology, stem cell, transplantation.
Assumed knowledge: Mathematics Advanced, any 2 units of science, any 2 units of science.
Recommended studies: Chemistry, Mathematics Extension 1.

BIOTECHNOLOGY

Biosensor Biotechnology
Areas of study: Biosensors, human anatomy and physiology, mathematics, medical devices, medical imaging, nanophotonics, nanotechnology, physical modelling.
Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

Recommended studies: Chemistry, Mathematics Extension 1.

Computational Biotechnology
Areas of study: Bioinformatics, data analysis, information systems, mathematical modelling, microbiology, molecular biology, programming fundamentals, recombinant biology.
Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

Recommended studies: Chemistry, Mathematics Extension 1.

Environmental Biotechnology
Areas of study: Environmental chemistry, environmental engineering, environmental remediation, medical biotechnology, recombinant biology, wastewater engineering.
Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

Recommended studies: Chemistry, Mathematics Extension 1.

Medical Biotechnology
Areas of study: Human anatomy and physiology, immunology, medical biotechnology, medical devices, microbiology, molecular biology, pharmacology, recombinant biology.
Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

Recommended studies: Chemistry, Mathematics Extension 1.

BUILDING

Construction Project Management
Areas of study: Building surveying, business management, contract management, construction site management, construction technology, cost planning and professional practice, design management, economics, estimating, law, project management, quantity surveying, risk and safety management, services, structures, sustainable development, time/cost/quality management.
Assumed knowledge: Mathematics Advanced, any 2 units of English.

Recommended studies: Design and Technology, Engineering Studies, Construction (Exam), Economics, Business Studies, English Standard, Mathematics Extension 1 or Mathematics Extension 2.

Property Economics
Areas of study: Economics, financial management, investment and valuation, property finance, land appraisal/land evaluation, land economics, urban economics, urban planning, legal studies, planning/land management/land science, property management, real estate management, policy, property technology.
Assumed knowledge: Mathematics Advanced, any 2 units of English.

COMMUNICATION

Communication – Creative Writing
Areas of study: Creative non-fiction writing, critical analysis, fiction writing, genre writing, narrative, poetry, screenwriting, textual theory.
Assumed knowledge: Any 2 units of English.

Communication – Digital and Social Media
Areas of study: Digital communities, digital marketing, digital technologies, programming, social media platforms, user experience design, user interface design.
Assumed knowledge: Any 2 units of English.

Communication – Journalism
Areas of study: Data journalism, digital publishing, ethical practice, investigative journalism, long-form storytelling, radio and TV journalism, reflective practice, reporting online, social media.
Assumed knowledge: Any 2 units of English.

Communication – Public Communication
Areas of study: Advertising, integrated communication, public communication, public relations.
Assumed knowledge: Any 2 units of English.

Communication – Social and Political Sciences
Areas of study: Analysing social and political change; communicating policy and producing online publications; developing policy analysis and advocacy; project research with an outside organisation; using real-world social research and research methods; using theory from politics, sociology and political economy.
Assumed knowledge: Any 2 units of English.

Music and Sound Design
Areas of study: Audio production, music business, music technology, popular music studies, screen sound, song composition, sound design.
Assumed knowledge: Any 2 units of English.

DESIGN

Animation
Areas of study: 2D animation, 3D computer animation, character design, design history, storyboarding, scriptwriting and narrative, visual effects.
Assumed knowledge: Any 2 units of English.
Recommended studies: Design and Technology, Visual Arts.

Fashion and Textiles
Areas of study: 2D and 3D pattern-making approaches, conceptual thinking, experimental design, fashion design practice, fashion history, fashion research, global fashion studies, menswear, sustainable fashion, textile design practice, womenswear.
Assumed knowledge: Any 2 units of English.
Recommended studies: Design and Technology, Textiles and Design, Visual Arts.
Product Design

Areas of study: Accessory design, advanced manufacturing technologies, contemporary and advanced concept design, contemporary and future design practice, design for 3D printing, design for advanced materials, design history, design led research, design management, design thinking, designing and making, furniture design, generative design, inclusive design, Indigenous design practice and knowledge, industrial design, innovation and commercialisation, interaction design, next generation product design, object design, product design, product engineering, professional design practice, project management, service design, social design, speculative design, sustainable design, systems design, user experience (UX) design, user-centred design.

Assumed knowledge: Any 2 units of English.

Recommended studies: Design and Technology, Visual Arts.

Visual Communication

Areas of study: Augmented reality, branding, creative code, critical practice, critical thinking, data visualisation, design fiction, design for animation, design history, design thinking, exhibition design, experiential design, illustration, inclusive design, information design, interactive design, motion graphics, participatory design, service design, speculative design, strategic design, transition design, typography, virtual reality, web design.

Assumed knowledge: Any 2 units of English.

Recommended studies: Design and Technology, Visual Arts.

EDUCATION

Primary and Secondary

Areas of study: Contextual studies of education, curriculum studies in all key learning areas taught in primary schools (creative arts, discipline studies, English, health and physical education, mathematics, personal development, professional experience, science and technology), social and environmental education, teaching method subjects for discipline areas taught in secondary schools.

Assumed knowledge: Any 2 units of English (excluding EAL/D).

Recommended studies: Mathematics Advanced is recommended for students wanting to study the Mathematics stream within the Secondary Education major. Any 2 units of science are recommended for students wanting to study the Science stream within the Secondary Education major.

Additional selection criteria: Personal statement and a minimum of three Band 5 HSC results, including one in English (not EAL/D), and Band 4 in mathematics for primary teaching, as per the NESA requirements.

ENGINEERING

Areas of study: Biomedical, civil, civil and environmental, data, electrical, electrical and electronic, electronic, mechanical, mechanical and mechatronic, mechatronic, software.

Assumed knowledge: Mathematics Extension 1, Physics, English Standard.

Recommended studies: English Advanced. For the biomedical, civil, and civil and environmental engineering majors, Chemistry is recommended. For the software engineering major, a sound knowledge of the fundamentals of programming is recommended.

Additional selection criteria: Questionnaire.

ENVIRONMENTAL BIOLOGY

Areas of study: Biodiversity; cell biology and genetics; ecology of freshwater, estuarine and marine systems; environmental chemistry; experimental design and data analysis; GIS and remote sensing; marine geoscience; plant and wildlife ecology and management; structure, behaviour and physiology of plants and animals (additional subjects are available after first year for in-depth specialisation in selected areas).

Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

FORENSIC SCIENCE

Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

Recommended studies: Chemistry, Physics, Mathematics Extension 1.

Forensic Science – Biology

Areas of study: Advanced genomics, bioinformatics, biological criminalistics, biotechnology, DNA profiling, investigation of human remains, metabolic biochemistry, microbiology, molecular biology.

Forensic Science – Chemistry

Areas of study: Analytical chemistry, chemical criminalistics, document and counterfeit drug analysis, forensic chemistry, forensic intelligence, forensic statistics, mobile networking, network security, web and monitoring investigation.

GLOBAI STUDIES

Areas of study: Business studies, communication, globalisation, health, legal studies, management studies.

Assumed knowledge: Any 2 units of English.

HEALTH SCIENCE

Health Science

Areas of study: Analytics, contemporary health issues, data analytics, digital health, epidemiology, global health, human structure and function, pharmacology, sport and exercise.

Assumed knowledge: Any 2 units of English.

INFORMATION TECHNOLOGY

Areas of study: Business information systems management, data analytics, enterprise systems development, interaction design, networking and cybersecurity, industry-based learning.

Assumed knowledge: Mathematics Advanced, any 2 units of English.

Recommended studies: English Advanced, Mathematics Extension 1.

Additional selection criteria: Questionnaire.

Computing Science

Areas of study: Artificial intelligence and data analytics, business information systems management, cybersecurity and privacy, enterprise systems development, interaction design, mathematical analysis, networking and cybersecurity, operations research, quantum information science, statistics.

Assumed knowledge: Mathematics Advanced, any 2 units of English.

Recommended studies: English Advanced

Games Development

Areas of study: Animation, computing and IT fundamentals, game design, graphics, software engineering, systems development.

Assumed knowledge: Mathematics Advanced, any 2 units of English.

Recommended studies: English Advanced, Mathematics Extension 1.

Information Systems

Areas of study: Information system management, processes and models, data analytics, planning and decision-making, knowledge management, innovation, sustainability.

Assumed knowledge: Mathematics Advanced, any 2 units of English.

Recommended studies: English Advanced, Mathematics Extension 1.
LAW
LAW (LLB)
LAW (COMBINED)
- Business/Law
- Communication (Creative Writing)/Law
- Communication (Digital and Social Media)/Law
- Communication (Journalism)/Law
- Communication (Media Arts and Production)/Law
- Communication (Public Communication)/Law
- Communication (Social and Political Sciences)/Law
- Creative Intelligence and Innovation/Law
- Economics/Law
- Engineering Science/Law
- Forensic Science/Law
- International Studies/Law
- Medical Science/Law
- Science/Law
- Science in Information Technology/Law

Areas of study: For Law: Commercial law, contracts, corporate law, criminal law, dispute resolution, employment law, environmental law, family law, finance and banking law, health and medical law, human rights, Indigenous knowledge, industrial law, intellectual property, international law, justice studies, law and technology, legal theory, media and privacy law, public international law, regulation and compliance, remedies, torts. For the other area of study: Refer to the relevant entry.

MARINE BIOLOGY

Areas of study: Animal behaviour and physiology, biological diversity, coral reef ecosystems, ecology, environmental protection and management, fisheries, GIS and remote sensing, marine communities, marine geoscience, marine primary producers.
Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

MEDICINAL CHEMISTRY

Areas of study: Analytical chemistry, cell biology and genetics, human anatomy and physiology; inorganic chemistry; mathematical modelling for science, medicinal chemistry, metabolic biochemistry, organic chemistry, pharmacology, physical chemistry, physiological systems, principles of scientific practice, spectroscopy and structure, strategies in drug synthesis.
Assumed knowledge: Mathematics Advanced, any 2 units of science, any 2 units of English.
Recommended studies: Chemistry, Mathematics Extension 1.

MEDICAL SCIENCE

Areas of study: Anatomy, cell biology, diagnostics, drugs, genetics, haematology, human diseases, immunology, medical devices, medicine, metabolic biochemistry, microbiology, molecular biology, neuroscience, pharmacology, physiology.
Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

MIDWIFERY

Areas of study: Midwifery.
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of science, any 2 units of mathematics.

NURSING

Areas of study: Nursing.
Assumed knowledge: English Standard.
Recommended studies: Any 2 units of science, any 2 units of mathematics.

SCIENCE

Assumed knowledge: For all Science courses: Mathematics Advanced, any 2 units of English, any 2 units of science unless otherwise specified. Mathematics Extension 1 is recommended for those majoring in mathematics/statistics. Refer to ‘Read this first’ at the beginning of the UTS entry.

Applied Physics
Areas of study: Advanced mechanics, computer modelling, electronics and computer interfacing, measurement analysis, nanophotonics, optics, quantum physics, scanning probe and electron microscopy, solid-state science, thermodynamics.
Recommended studies: Chemistry, Mathematics Extension 1, Physics.

Biomedical Science
Areas of study: Anatomy, animal and plant biotechnology, biobusiness, biochemistry, bioreactors and bioprocessing, cell biology and genetics, environmental biotechnology, haematology, immunology, medical devices, microbiology, molecular biology, neuroscience, parasitology, pathology, pathophysiology, pharmacology, physiology.
Recommended studies: Chemistry, Mathematics Extension 1.

Biotechnology
Areas of study: Anatomy, animal and plant biotechnology, biobusiness, biochemistry, bioreactors and bioprocessing, cell biology and genetics, environmental biotechnology, haematology, immunology, medical devices, microbiology, molecular biology, neuroscience, parasitology, pathology, pathophysiology, pharmacology, physiology.
Recommended studies: Chemistry, Mathematics Extension 1.

Chemistry
Areas of study: Analytical, inorganic, organic and physical chemistry; materials science; polymer science and surface chemistry. Students also have the opportunity to take subjects in forensic chemistry, medicinal, pharmaceutical and toxicological chemistry, nanotechnology.
Recommended studies: Chemistry, Mathematics Extension 1, Physics.

Environmental Sciences
Areas of study: Biodiversity, ecosystem protection and management; cell biology and genetics; environmental chemistry; environmental management; experimental design and analysis of ecological data; fisheries resources; freshwater ecology; estuarine and marine systems; GIS and remote sensing; marine geoscience; plant and wildlife ecology and management; pollution impacts on ecosystems; structure, behaviour and physiology of plants and animals.
Assumed knowledge: Mathematics Advanced, any 2 units of English, any 2 units of science.

Flexible
Areas of study: Analytical chemistry, organic and inorganic chemistry; applied physics; biotechnology; environmental sciences; marine biology; mathematics and statistics; medical science and biomedical science; nanomaterials and nanotechnology.
Assumed knowledge: Chemistry, Mathematics Extension 1.

Mathematics
Areas of study: Analysis of commercial and scientific data; applied statistics; design of statistical studies in commerce, industry and society; quantitative methods in management and logistics; theoretical foundations of applied mathematics and statistics. Students can choose additional studies in business, finance, law or information technology.
Assumed knowledge: Mathematics Advanced, any 2 units of English.
Recommended studies: Mathematics Extension 1.

Medical Science
Areas of study: Anatomy, animal and plant biotechnology, biobusiness, biochemistry, bioreactors and bioprocessing, cell biology and genetics, environmental biotechnology, haematology, immunology, medical devices, microbiology, molecular biology, neuroscience, parasitology, pathology, pathophysiology, pharmacology, physiology.
Recommended studies: Chemistry, Mathematics Extension 1.
Nanotechnology

**Areas of study:** Nanotechnology, materials science, nanofabrication, nanomaterials, nanoscale sensors, nanotubes.

**Recommended studies:** Chemistry, Mathematics Extension 1, Physics.

Statistics

**Areas of study:** Analysis of commercial and scientific data; applied statistics; design of statistical studies in commerce, industry and society; quantitative methods in management and logistics; theoretical foundations of applied mathematics and statistics. Students can choose additional studies in business, finance, law or information technology.

**Assumed knowledge:** Mathematics Advanced, any 2 units of English.

**Recommended studies:** Mathematics Extension 1.

**SPORT AND EXERCISE MANAGEMENT**

**Areas of study:** Financial management, anatomy, biomechanics, event management, exercise management, exercise physiology, law, managing professional sport, nutrition, strength and conditioning, sport management, sports marketing, sports psychology, sports science, strategic management, management, sport and exercise.

**Assumed knowledge:** Mathematics Advanced, any 2 units of English.

Exercise Therapy

**Areas of study:** Anatomy, biomechanics, exercise assessment, exercise delivery, exercise physiology, exercise prescription, exercise rehabilitation, health, human movement, motor learning, nutrition, sports psychology, sports science, sport and exercise, strength and conditioning.

**Assumed knowledge:** Mathematics Advanced, any 2 units of English.

**SPORT AND EXERCISE SCIENCE**

**Areas of study:** Anatomy, biomechanics, exercise assessment, exercise delivery, exercise physiology, exercise prescription, exercise rehabilitation, health, human movement, motor learning, nutrition, physiotherapy, sports psychology, sports science, sport and exercise, strength and conditioning.

**Assumed knowledge:** Mathematics Advanced, any 2 units of English.

**COMBINED DEGREES**

If you intend to undertake combined degrees check the prerequisites, assumed knowledge and recommended studies for both degrees.

Contact the University for further details.

- Biotechnology/Business
- Business/Information Technology
- Engineering/Business
- Information Systems/Business
- Medical Science/Business
- Medical Science/Engineering
- Science/Business
- Science/Engineering

Combined degrees in Law are also offered – refer to main subject entry for details.

**INTERNATIONAL STUDIES (COMBINED)**

- Analytics
- Animation
- Business
- Communication (Creative Writing)
- Communication (Digital and Social Media)
- Communication (Journalism)
- Communication (Media Arts and Production)
- Communication (Public Communication)
- Communication (Social and Political Sciences)
- Construction Project Management
- Education
- Engineering

- Fashion and Textiles
- Forensic Science
- Health Science
- Information Technology
- Interior Architecture
- Law
- Management
- Medical Science
- Music and Sound Design
- Nursing
- Photography
- Product Design
- Property Economics
- Science
- Sport and Exercise Management
- Sport and Exercise Science
- Visual Communication

**CREATIVE INTELLIGENCE AND INNOVATION (COMBINED)**

- Advanced Science
- Animation
- Architecture
- Biomedical Physics
- Business
- Communication (Creative Writing)
- Communication (Digital and Social Media)
- Communication (Journalism)
- Communication (Media Arts and Production)
- Communication (Public Communication)
- Communication (Social and Political Sciences)
- Engineering
- Fashion and Textiles
- Forensic Science
- Information Technology
- Interior Architecture
- Law
- Management
- Medicinal Chemistry
- Midwifery
- Nursing
- Product Design
- Science
- Sport and Exercise Science
- Visual Communication

**Areas of study:** For creative intelligence and innovation: Collaboration and co-creation, complexity, critical and creative thinking, entrepreneurship, future scenario building, innovation, invention.

**Assumed knowledge/Recommended studies:** Refer to the core degree to be combined with Creative Intelligence and Innovation.

**Innovation (Dip)**

A Diploma in Innovation can be undertaken alongside a UTS bachelor degree to develop creative, transdisciplinary and entrepreneurial practices that build on and extend their specialist study within their core degrees or combined with one of the bachelor degree courses listed under Creative Intelligence and Innovation (Combined) as an alternative to the Bachelor of Creative Intelligence and Innovation.
APPLIED ANALYTICS*
Areas of study: Computer science, data analytics and visualisation, database performance, financial modelling, mathematics, statistics.
Assumed knowledge: Any 2 units of mathematics, any 2 units of English.
Recommended studies: Mathematics Advanced.
* Subject to final approval

ARTS (HUMANITIES)
Areas of study: Archaeology and ancient history; Chinese (Mandarin); community, culture and environment (Shoalhaven, Batemans Bay, Bega and Southern Highlands campuses only. Completion of full major subject to availability at time of enrolment); creative writing; English literatures; environmental humanities; French; history; Indigenous studies; international relations; Japanese; legal studies; philosophy; photography; politics; sociology; Spanish; western civilisation (liberal arts); writing and English literature.
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced.
Additional selection criteria for western civilisation: Written application and interview.

ARTS (DIP)
Areas of study: Academic study, communication, computing studies, government and political systems, history and sociology.
Assumed knowledge: Any 2 units of English.

BIONANOTECHNOLOGY
Areas of study: Molecular biology and biophysics, nanotechnology, physical and biological chemistry.
Assumed knowledge: Biology, Chemistry, Mathematics Advanced, Physics.
Recommended studies: Mathematics Extension 1.

BUSINESS
Areas of study: Accounting, economics, finance, management, marketing.
Assumed knowledge: Any 2 units of English.

BUSINESS (DIP)
Areas of study: Accounting, economics, finance, management, marketing.
Assumed knowledge: Any 2 units of English.

BUSINESS INFORMATION SYSTEMS
Assumed knowledge: Any 2 units of English.
Recommended studies: Mathematics Advanced or Mathematics Standard 2.

COMMERCCE
Areas of study: Accountancy, business law, economics, finance, financial planning, human resource management, international business, management, marketing, public relations, supply chain management.
Assumed knowledge: Any 2 units of English.

COMMERCCE – TAFE Advanced Diploma of Events Management
– TAFE Advanced Diploma of Hospitality Management
– TAFE Advanced Diploma of Tourism and Travel Management
Areas of study: Human resource management, management, marketing, public relations.
Assumed knowledge: Any 2 units of English.
These degrees are studied in conjunction with the relevant TAFE Advanced Diploma.

COMMERCCE GLOBAL (HONS)
Areas of study: Accountancy, finance.
Assumed knowledge: Any 2 units of English.
Additional selection criteria: Application and/or interview.

COMMUNICATION AND MEDIA
Areas of study: Digital and social media, global screen media, journalism, marketing communication and advertising, visual communication design.
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced.

COMPUTER SCIENCE
Areas of study: Artificial intelligence*, big data, computer science, cyber security, digital systems security, game and mobile development, software engineering.
* Subject to approval.
Assumed knowledge: Mathematics Advanced, any 2 units of English.

---

READ THIS FIRST

- Mathematics Standard 2 and Investigating Science may not adequately prepare students for further studies in the areas of mathematics, engineering and science at the University of Wollongong. However, these courses can be included in the calculation of the ATAR.
- Any 2 units of science’ includes Biology, Chemistry, Earth and Environmental Science, Geography or Physics. It does not include Investigating Science.
- Any 4 units of science’ includes two courses from Biology, Chemistry, Earth and Environmental Science, Geography or Physics. It does not include Investigating Science.
STEP 2: UNI FOR YEAR 10 STUDENTS

COMPUTER SCIENCE GLOBAL (HONS)
Areas of study: Big data, computer science, cyber security, digital systems security, game and mobile development, software engineering.
Assumed knowledge: Mathematics Advanced, any 2 units of English.

CONSERVATION BIOLOGY
Areas of study: Conservation biology, landscape science, plant and animal ecology.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Biology, Chemistry.

CREATIVE ARTS
Areas of study: Creative writing, music, visual arts, visual arts and design.
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced. For visual arts: Design and Technology and/or Textiles and Design and/or Visual Arts. For music: Music 2 or Music Extension.

DATA SCIENCE AND ANALYTICS
Areas of study: Analytics, computer science and information technology, data modelling, data science, mathematics, statistics.
Course prerequisite: Mathematics Advanced.
Assumed knowledge: Any 2 units of English.
Recommended studies: Mathematics Extension 1.

ECONOMICS AND FINANCE
Areas of study: Economics, finance.
Assumed knowledge: Mathematics Advanced, any 2 units of English.

ENGINEERING
Areas of study: Architectural, biomedical, civil, computer, electrical, environmental, materials, mechanical, mechatronic, mining and telecommunications engineering.
Assumed knowledge: Mathematics Advanced, any 2 units of English.
Recommended studies: Engineering Studies, Mathematics Extension 1, Physics, Chemistry (not required for biomedical, computer, electrical, mechatronic or telecommunication engineering).

ENGINEERING - SCHOLAR
Areas of study: Architectural, biomedical, civil, computer, electrical, environmental, materials, mechanical, mechatronics, mining and telecommunications engineering.
Assumed knowledge: Mathematics Extension 1, any 2 units of English.
Recommended studies: Engineering Studies, Physics, Chemistry (not required for biomedical, computer, electrical, mechatronics or telecommunications engineering).

ENGINEERING (DIP)
Areas of study: Design, mathematics, mechanics, physics.
Assumed knowledge: Mathematics Advanced, Physics, any 2 units of English.
Recommended studies: Chemistry, Engineering Studies, Physics.

ENVIRONMENTAL SCIENCE
Areas of study: Earth sciences, environmental chemistry, land resources, life sciences.
Assumed knowledge: Mathematics Advanced plus one of Biology, Chemistry, Earth and Environmental Science or Geography.
Recommended studies: Any 4 units of science (including Biology or Chemistry).

EXERCISE SCIENCE
Areas of study: Anatomy, biomechanics, exercise physiology, exercise prescription, physiology.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Biology, Chemistry.

EXERCISE SCIENCE AND REHABILITATION
Areas of study: Anatomy, biomechanics, exercise physiology, exercise prescription, exercise rehabilitation, physiology.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Biology, Chemistry.

GEOGRAPHY
Areas of study: Human and physical geography.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Earth and Environmental Science, Geography.

INFORMATION TECHNOLOGY
Areas of study: eBusiness, network design and management, web design and development.
Assumed knowledge: Any 2 units of English, any 2 units of Mathematics.
Recommended studies: Mathematics Advanced.

INFORMATION TECHNOLOGY (DIP)
Areas of study: Data management, networks and communications, programming, system analysis, web technology.
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of mathematics.

INTERNATIONAL STUDIES
Areas of study: Global sustainable development, international relations, languages.
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced.

JOURNALISM
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced.

LANGUAGE STUDIES
Areas of study: Chinese (Mandarin), French, Japanese, Spanish.
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced, any 2 units of a language.

LAW (SINGLE DEGREE)
Areas of study: Business and financial law, commercial law, constitutional law, contracts, criminal law, environmental law, family law, human rights, intellectual property, international law, jurisprudence, legal ethics, legal skills, litigation and practice skills/internships, property law, taxation, torts.
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced.

LAW (DOUBLE DEGREES)
- Arts/Law
- Arts Western Civilisation/Law*
- Arts (Psychology)/Law
- Business/Law
- Commerce/Law
- Commerce Global/Law*
- Communication and Media/Law
- Computer Science/Law
– Creative Arts/Law
– Economics and Finance/Law
– Engineering (Honours)/Law
– Information Technology/Law
– International Studies/Law
– Journalism/Law
– Mathematics/Law
– Politics, Philosophy and Economics/Law
– Psychological Science/Law
– Science/Law

Recommended studies: For Law: English Advanced. For the other area of study: Refer to the relevant entry.
Additional selection criteria: *Written application and interview.

MARINE SCIENCE
Areas of study: Biodiversity of marine and freshwater organisms, coastal environments, conservation biology, ecology, fisheries and aquaculture, marine and terrestrial ecology, oceanography.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Any 4 units of science (including Biology and Chemistry).

MATHEMATICS
Mathematics
Areas of study: Applied statistics, mathematical analysis, pure and applied mathematics.
Course prerequisite: Mathematics Advanced.
Assumed knowledge: Any 2 units of English.
Recommended studies: Mathematics Extension 1.
Mathematics and Finance
Areas of study: Financial planning, mathematical economics, quantitative and computational trading, quantitative corporate finance and investment, risk management and insurance.
Assumed knowledge: Mathematics Advanced, any 2 units of English.
Recommended studies: Mathematics Extension 1.
Mathematics Education – see Teaching

MATHEMATICS - ADVANCED
Mathematics Advanced
Areas of study: Applied statistics, mathematical analysis, pure and applied mathematics.
Course prerequisite: Mathematics Extension 2.

MEDICAL AND HEALTH SCIENCE
Areas of study: Anatomy, chemistry, neuroscience, physiology.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Biology, Chemistry.

MEDICAL AND RADIATION PHYSICS
Areas of study: Medical imaging, nuclear medicine, radiation protection, radiation therapy, radiobiology.
Assumed knowledge: Mathematics Advanced, Physics, any 2 units of English.
Recommended studies: Biology, Chemistry, English Advanced, Mathematics Extension 1.

MEDICAL BIOTECHNOLOGY
Areas of study: Biochemistry, biotechnology, cellular and molecular biology, genetics, immunology.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Biology, Chemistry.

MEDICINAL CHEMISTRY
Areas of study: Biochemistry, pharmacology, physiology.
Assumed knowledge: Chemistry, Mathematics Advanced.
Recommended studies: Any 4 units of science.

NEUROSCIENCE*
Areas of study: Anatomy, biochemistry, chemistry, neuroscience, psychology.
Assumed knowledge: Biology, Chemistry, Mathematics Advanced.
Recommended studies: Any 4 units of science.
* Subject to approval

NURSING
Assumed knowledge: Any 2 units of English.
Recommended studies: Mathematics Advanced, any 2 units of science.

NUTRITION AND DIETETICS
Areas of study: Biochemistry, clinical dietetics, community and public health nutrition, food service management, nutrition research, physiology.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Biology, Chemistry.

NUTRITION SCIENCE
Areas of study: Biochemistry, community and public health nutrition, food composition, physiology.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Biology, Chemistry.

PERFORMANCE AND THEATRE
Areas of study: Acting, producing and directing, singing, sound design and lighting, stage management, theatre-making, technical theatre, writing.
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced, Drama.
Additional selection criteria for Acting major: Audition and/or interview.

POLITICS, PHILOSOPHY, ECONOMICS
Assumed knowledge: Any 2 units of English.
Recommended studies: English Advanced.

PRE-MEDICINE, SCIENCE AND HEALTH
Areas of study: Anatomy, chemistry, human anatomy, human physiology.
Assumed knowledge: Mathematics Advanced, any 2 units of science.
Recommended studies: Biology, Chemistry.

PSYCHOLOGY
Assumed knowledge: Any 2 units of English.
Recommended studies: Mathematics Advanced.

PUBLIC HEALTH
Areas of study: Public health.
Assumed knowledge: Any 2 units of English.

SCIENCE
Areas of study: Atmospheric science, biomolecular physics, cell and molecular biology, chemistry, ecology and conservation biology, environment, geology, human geography, land and heritage management, mathematics and physics, nuclear science and technology, physical geography, physics.
Assumed knowledge: Mathematics Advanced, any 2 units of science. For atmospheric science, biomolecular physics, mathematics and physics, nuclear science and technology, physics: Mathematics Advanced, any 2 units of English.

Recommended studies: Any 4 units of science. For materials, mathematics and physics, nuclear science and technology, physics: Chemistry, Mathematics Extension 1, Physics.

Advanced

Areas of study: Atmospheric science, biomolecular physics, human geography, land and heritage management, physics.

Assumed knowledge: Mathematics Advanced, any 2 units of science. For atmospheric science, biomolecular physics and physics: Mathematics Advanced, any 2 units of English.

Recommended studies: Any 4 units of science. For atmospheric science, biomolecular physics and physics: Chemistry, Mathematics Extension 1, Physics.

Science Education – see Teaching

SCIENCE (DIP)

Areas of study: Biodiversity and environment, biological sciences and climate change, chemistry, earth sciences, mathematics.

Assumed knowledge: Any 2 units of mathematics.

SOCIAL CHANGE AND ADVOCACY*

Areas of study: Crime, food production and distribution, politics, population geography, social advocacy, social justice and equity, social policy, social research skills, sustainability, urban studies.

Assumed knowledge: Any 2 units of English.

* Subject to final approval

SOCIAL SCIENCE

Areas of study: Community culture and environment (Shoalhaven campus only), criminology, health promotion, human geography, Indigenous studies, public health, social marketing, social policy, sociology.

Assumed knowledge: Any 2 units of English.

SOCIAL SCIENCE (DIP)

Areas of study: Academic skills for social science, economics and society, human geography.

Assumed knowledge: Any 2 units of English.

SOCIAL WORK

Areas of study: Social work.

Assumed knowledge: Any 2 units of English.

SPORT*

Areas of study: Coaching, game observation and analysis, sports education and physical movement.

Assumed knowledge: Any 2 units of English.

Recommended studies: Personal Development, Health and Physical Education (PDHPE).

* Subject to final approval

SUSTAINABLE COMMUNITIES

Areas of study: Human geography, social and environmental sustainability, social policy.

Assumed knowledge: Any 2 units of English.

Recommended studies: Geography.

TEACHING

Early Years (including Dean's Scholar)

Assumed knowledge: Any 2 units of English.

Recommended studies: Any 2 units of mathematics.

Health and Physical Education (including Dean's Scholar)

Assumed knowledge: Any 2 units of English.

Recommended studies: Any 2 units of science or Personal Development, Health and Physical Education (PDHPE).

Mathematics Education (including Dean's Scholar)

Course prerequisite: Mathematics Advanced.

Assumed knowledge: Mathematics Advanced (Band 4), any 2 units of English.

Recommended studies: Mathematics Extension 1.

Primary Education (including Dean's Scholar)

Assumed knowledge: Any 2 units of English.

Recommended studies: Any 2 units of mathematics (Band 4).

Science Education (including Dean's Scholar)

Assumed knowledge: Mathematics Advanced, any 2 units of English.

Recommended studies: Any 2 units of mathematics, any 4 units of science.

DOUBLE DEGREES

If you intend to undertake double degrees check the prerequisites, assumed knowledge and recommended studies for both degrees.

Contact the University for further details.

READ THIS FIRST

− UNSW’s HSC Plus recognises performance in relevant HSC subjects. For further information, visit unsw.edu.au/hscplus.
− For HSC courses listed as assumed knowledge, students are expected to have a level of performance at Band 4 or higher.
− Mathematics Standard 2 and Investigating Science are not regarded as adequate preparation for university studies in business, engineering and science. However, these courses can be included in the calculation of the ATAR.
− Students who do not have the level of assumed knowledge specified may find themselves ill-prepared for first-year subjects and therefore be placed at a considerable disadvantage. Chemistry and Physics bridging courses are offered at the Kensington campus before the start of semester 1 each year for students who have not included one or both in their HSC program. A mathematics bridging course is also offered for those students wishing to upgrade their HSC mathematics knowledge to the level of Mathematics Extension 1.

Main headings indicate courses generally offered as bachelor degrees unless Dip, Adv Dip or Assoc Deg is shown in brackets. Subheadings are specialisations within the course.

ACTUARIAL STUDIES

Areas of study: Accounting, actuarial risk management and analytics, actuarial studies, business economics, business law, business strategy and economic management, finance, financial economics, financial technology, human resource management, information systems, international business, management, marketing, mathematics, quantitative data science, real estate studies, statistics, taxation.

Assumed knowledge: Mathematics Extension 1.

Recommended studies: English Advanced, Mathematics Extension 2.

ADVANCED MATHEMATICS (HONS)

Areas of study: Advanced statistics, applied mathematics, pure mathematics.

Assumed knowledge: Mathematics Extension 1.

Recommended studies: Mathematics Extension 2.

ARCHITECTURAL STUDIES

Areas of study: Communications, computer modelling, design studio, history and theory, materials, professional practice, structure and construction, technical drawing and model making, technology and environment.

ARTS

Areas of study: Art history and theory, Asian studies, Australian studies, Chinese studies, creative writing, criminology, economics, English, environmental humanities, European studies, film studies, French studies, geographical studies, German studies, global development, history, human resources management, Indigenous studies, Indonesian studies, Italian studies, international business, Japanese studies, Korean studies, linguistics, media, culture and technology, modern Greek studies, music studies, philosophy, politics and international relations, psychology, sociology and anthropology, Spanish and Latin American studies, studies in psychology, theatre and performance studies, women’s and gender studies.

Recommended studies: English Advanced.

ARTS AND BUSINESS

Areas of study: Accounting, art history and theory, Asian studies, Australian studies, business, Chinese studies, creative writing, criminology, culture and technology, English, environmental humanities, European studies, film studies, French studies, geographical studies, German studies, global development, history, Indigenous studies, Indonesian studies, Italian studies, Japanese studies, Korean studies, law, linguistics, management, marketing, media, microeconomics, modern Greek studies, music studies, philosophy, politics and international relations, psychology, sociology and anthropology, Spanish and Latin American studies, theatre and performance studies, women’s and gender studies.

Assumed knowledge: Mathematics Advanced.

Recommended studies: English Advanced.
### AVIATION
**Flying**
- **Assumed knowledge:** Mathematics Advanced.
- **Recommended studies:** Physics.
- **Additional selection criteria:** Medical examination, internal application, interview.

**Management**
- **Assumed knowledge:** Mathematics Standard 2.
- **Recommended studies:** Physics.

### BIOTECHNOLOGY (HONS)
- **Assumed knowledge:** Chemistry, Mathematics Advanced.
- **Recommended studies:** Biology.

### CITY PLANNING
**Areas of study:** City economics, environmental science, heritage studies, planning history, planning law, planning theory and methodology, sociology, transport planning, urban design.
- **Recommended studies:** Design and Technology, Economics, English Advanced, Geography, Legal Studies, Society and Culture.

### COMMERCE
**Areas of study:** Accounting, business analytics, business economics, business law, business strategy and economic management, finance, financial economics, financial technology, human resource management, information systems, international business, management, marketing, real estate studies, taxation.
- **Assumed knowledge:** Mathematics Advanced.
- **Recommended studies:** English Advanced, Mathematics Extension 1.

### COMMERCE (INTERNATIONAL)
**Areas of study:** Accounting, Asian studies, business analytics, business economics, business law, business strategy and economic management, Chinese studies, development studies, European studies, finance, financial economics, financial technology, French studies, German studies, history, human resource management, information systems, international business, international relations, Japanese studies, Korean studies, management, marketing, politics, real estate studies, Spanish and Latin American studies, taxation.
- **Assumed knowledge:** Mathematics Advanced.
- **Recommended studies:** English Advanced, Mathematics Extension 1, Languages.

### COMPUTATIONAL DESIGN
**Areas of study:** Animation, building modelling, computer aided design (CAD), design studio, information technology in design, multimedia, rendering.

### COMPUTER SCIENCE
- **Assumed knowledge:** Mathematics Extension 1.
- **Recommended studies:** Engineering Studies, Mathematics Extension 2, Information Processes and Technology, Physics, Software Design and Development.

### CONSTRUCTION MANAGEMENT AND PROPERTY
**Areas of study:** Building construction, building science materials and structure, construction technology, facilities management, economics and law, management, property development, quantity surveying.
- **Recommended studies:** English Advanced, Mathematics Advanced.

### CRIMINOLOGY AND CRIMINAL JUSTICE
- **Areas of study:** Criminology, social research and policy.
- **Recommended studies:** English Advanced.

### DATA SCIENCE AND DECISIONS
- **Areas of study:** Business data science, computational data science, quantitative data science.
- **Assumed knowledge:** Mathematics Extension 1.

### DESIGN
- **Areas of study:** 3D visualisation, object, experience, graphics, interaction design, textiles.

### ECONOMICS
**Areas of study:** Accounting, business analytics, business law, econometrics, economics, finance, financial economics, financial technology, human resource management, information systems, international business, management, marketing, real estate studies, taxation.
- **Assumed knowledge:** Mathematics Advanced.
- **Recommended studies:** English Advanced, Mathematics Extension 1.

### EDUCATION
**Arts/Education (Secondary)**
- **Assumed knowledge:** Any 2 units of English (Band 5).
- **Recommended studies:** English Advanced.

**Commerce/Education (Secondary)**
- **Assumed knowledge:** Mathematics Advanced, any 2 units of English (Band 5).
- **Recommended studies:** English Advanced.

**Design/Education (Secondary)**
- **Assumed knowledge:** Any 2 units of English (Band 5).
- **Recommended studies:** English Advanced.

**Economics/Education (Secondary)**
- **Assumed knowledge:** Mathematics Advanced, any 2 units of English (Band 5).
- **Recommended studies:** English Advanced.

**Fine Arts/Education (Secondary)**
- **Assumed knowledge:** Any 2 units of English (Band 5).
- **Recommended studies:** English Advanced, Visual Arts.

**Media Arts/Education (Secondary)**
- **Assumed knowledge:** Any 2 units of English (Band 5).
- **Recommended studies:** Visual Arts, English Advanced, Design and Technology, Information Processes and Technology, Industrial Technology (Multimedia Technologies).

**Music/Education (Secondary)**
- **Assumed knowledge:** Any 2 units of English (Band 5) plus either (Grade 7 AMEB Performance (or equivalent) and Music 2) or (Grade 6 AMEB Musicianship (or equivalent) or Music Extension).
- **Recommended studies:** English Advanced.
- **Additional selection criteria:** Audition.

**Science/Education (Secondary)**
- **Assumed knowledge:** Any 2 units of English (Band 5), Mathematics Advanced and Chemistry plus one of Biology or Earth and Environmental Science, Physics or Mathematics Extension 1 (depending on chosen area of study).
- **Recommended studies:** English Advanced.

   Assumed knowledge: Mathematics Extension 1.
Renewable Energy Engineering
   Assumed knowledge: Mathematics Extension 1.
Surveying
   Assumed knowledge: Mathematics Extension 1.
Telecommunications
   Assumed knowledge: Mathematics Extension 1.

ENVIRONMENTAL MANAGEMENT
   Areas of study: Biology, earth science, ecology, environmental chemistry, geography, marine and coastal science.
   Assumed knowledge: Mathematics Advanced, Chemistry.
   Recommended studies: Biology, Earth and Environmental Science, Physics.

FOOD SCIENCE
   Assumed knowledge: Chemistry, Mathematics Extension 1, Physics.
   Recommended studies: Biology.

INDUSTRIAL DESIGN
   Areas of study: 3D digital modelling, commerce and marketing, computer aided design (CAD), design studio, materials and manufacturing, science and engineering.
   Recommended studies: Design and Technology, Visual Arts.

INFORMATION SYSTEMS
   Assumed knowledge: Mathematics Advanced.
   Recommended studies: English Advanced, Mathematics Extension 1.

INTERIOR ARCHITECTURE
   Areas of study: Communication, computer modelling, design studio, history and theory, materials, practice, technical drawing and model making, technology.

INTERNATIONAL PUBLIC HEALTH
   Areas of study: Disease transmission, epidemiology and biostatistics, health impacts of climate change, health leadership, Indigenous health, international development and policy, population and global health, prevention and control, women and children's health.
   Assumed knowledge: English Standard.
   Recommended studies: Biology, Personal Development, Health and Physical Education (PDHPE).

INTERNATIONAL STUDIES
   Areas of study: Asian studies, Chinese studies, environmental humanities, European studies, French studies, German studies, global development, international business, international studies, Japanese studies, Korean studies, politics and international relations, sociology and anthropology, Spanish and Latin American studies.
   Language study: Chinese, French, German, Greek, Indonesian, Italian, Japanese, Korean and Spanish.
   Recommended studies: English Advanced.

LANDSCAPE ARCHITECTURE
   Areas of study: Communication, design studio, ecological processes, environmental technology and practice, history and theory, landscape engineering principles, plants and design.
   Recommended studies: Design and Technology, English Advanced, Geography, Visual Arts.

EXERCISE PHYSIOLOGY
   Assumed knowledge: Chemistry, Mathematics Advanced.
   Recommended studies: Biology, Physics, Personal Development, Health and Physical Education (PDHPE).

FINE ARTS
   Areas of study: Art history, art theory, curating, drawing, moving image, painting, photography, printmaking, sculpture.
   Recommended studies: Visual Arts.
STEPS TO UNI FOR YEAR 10 STUDENTS

LAW (DOUBLE)
- Actuarial Studies/Law
- Advanced Mathematics (Hons)/Law
- Advanced Science (Hons)/Law
- Arts and Business/Law
- Arts/Law
- City Planning (Hons)/Law

Assumed knowledge: For Law: None. For the other area of study: Refer to the relevant entry.
Recommended studies: For Law: None. For the other area of study: Refer to the relevant entry.
Additional selection criteria: All students wishing to study undergraduate law at UNSW must sit the Law Admission Test (LAT).* For more information visit law.unsw.edu.au/lat.

MATERIALS SCIENCE AND ENGINEERING (HONS)
Areas of study: Ceramic engineering, functional materials, materials engineering, physical metallurgy, process metallurgy.

Assumed knowledge: Mathematics Extension 1, Physics.
Recommended studies: Mathematics Extension 2, Chemistry and Engineering Studies.

MEDIA
Communication and Journalism
Public Relations and Advertising
Screen and Sound Production
Areas of study: Advertising, communication, film studies, media, public relations, screen and sound production.
Recommended studies: English Advanced.

MEDIA ARTS
Areas of study: Animation, interactive media, moving image, sound, visual effects.
Recommended studies: Design and Technology, Industrial Technology (Multimedia Technologies), Information Processes and Technology, Visual Arts.

MEDICAL SCIENCE
Areas of study: Human anatomy, human pathology, medical microbiology, medical pharmacology, medical physiology, molecular biology, molecular genetics, neurobiology.
Assumed knowledge: Mathematics Advanced, Chemistry.

MEDICINAL CHEMISTRY (HONS)
Assumed knowledge: Mathematics Advanced, Chemistry.
Recommended studies: Biology, Physics.

MEDICINE
Assumed knowledge: English Standard.
Recommended studies: Chemistry, Biology.
Additional selection criteria: University Clinical Aptitude Test (UCAT ANZ), individual interview.

MUSIC
Areas of study: Music creative practice, musicology, music pedagogy, sonic arts.
Assumed knowledge: Either Grade 7 AMEB Performance (or equivalent) and Music 2 or Grade 6 AMEB Musicianship (or equivalent) or Music Extension.
Recommended studies: English Advanced.
Additional selection criteria: Audition.

POLITICS, PHILOSOPHY AND ECONOMICS
Areas of study: Economics, philosophy, and politics and international relations.
Assumed knowledge: Mathematics Advanced.

PSYCHOLOGICAL SCIENCE
Areas of study: Criminology, human resource management, linguistics, management, marketing, neuroscience, philosophy, psychology, vision science.
Assumed knowledge: Mathematics Standard 2 or Mathematics Advanced (depending on major).
Recommended studies: Biology, Chemistry, English Advanced.

PSYCHOLOGY (HONS)
Assumed knowledge: Mathematics Standard 2.
Recommended studies: Biology, Chemistry, English Advanced.

SCIENCE
Advanced Science (Hons)
Areas of study: Advanced physical oceanography, advanced physics, anatomy, bioinformatics, biology, biotechnology, chemistry, climate dynamics, climate systems science, earth science, ecology, genetics, geography, marine and coastal science, materials science, mathematics, microbiology, molecular and cell biology, neuroscience, pathology, pharmacology, physiology, psychology, statistics, vision science.
Assumed knowledge: Chemistry, Mathematics Advanced or Mathematics Extension 1 (depending on chosen area of study) plus one or more of Biology, Earth and Environmental Science, Physics.

Life Sciences
Areas of study: Anatomy, biological chemistry, biology, biotechnology, ecology, genetics, marine and coastal science, microbiology, molecular and cell biology, pathology, pharmacology, physiology, psychology.
Assumed knowledge: Mathematics Advanced plus Biology or Chemistry.

Science
Areas of study: Anatomy, bioinformatics, biology, biotechnology, chemistry, earth science, ecology, food science, genetics, geography, marine and coastal science, materials science, mathematics, microbiology, molecular and cell biology, neuroscience, pathology, pharmacology, physical oceanography, physics, physiology, psychology, statistics, vision science.
Assumed knowledge: Chemistry, Mathematics Advanced or Mathematics Extension 1 (depending on chosen area of study) plus one or more of Biology, Earth and Environmental Science, Physics.
Science and Business
   Areas of study: Anatomy, bioinformatics, biology, biotechnology, chemistry, earth science, ecology, food science, genetics, geography, marine and coastal science, materials science, mathematics, microbiology, molecular and cell biology, neuroscience, pathology, pharmacology, physical oceanography, physics, physiology, psychology, statistics, vision science.
   Assumed knowledge: Chemistry, Mathematics Advanced or Mathematics Extension 1 (depending on area of study) plus one or more of Biology, Earth and Environmental Science, Physics.

Science (International)
   Areas of study: Advanced Chinese studies, advanced French studies, advanced Japanese studies, advanced Korean studies, Chinese studies, French studies, German studies, Indonesian studies, Japanese studies, Korean studies, Spanish and Latin American studies.
   Assumed knowledge: Chemistry, Mathematics Advanced or Mathematics Extension 1 (depending on area of study) plus one or more of Biology, Earth and Environmental Science, Physics.

SOCIAL RESEARCH AND POLICY
   Areas of study: Economics, environmental humanities, global development, human resource management, Indigenous studies, international business, marketing, media, politics and international relations, sociology and anthropology.
   Recommended studies: English Advanced.

SOCIAL WORK
   Recommended studies: English Advanced.

VISION SCIENCE
   Areas of study: Optometry, vision science.
   Assumed knowledge: Chemistry, English Advanced, Mathematics Advanced, Physics.

DOUBBLE DEGREES
If you intend to undertake double degrees check the prerequisites, assumed knowledge and recommended studies for both degrees. Contact the University for further details.
   – Actuarial Studies/Advanced Mathematics (Hons)
   – Actuarial Studies/Commerce
   – Actuarial Studies/Computer Science
   – Actuarial Studies/Economics
   – Actuarial Studies/Information Systems
   – Actuarial Studies/Science
   – Advanced Mathematics (Hons)/Arts
   – Advanced Mathematics (Hons)/Computer Science
   – Advanced Mathematics (Hons)/Engineering (Hons)
   – Advanced Science (Hons)/Arts

Double degrees in Law and Education are also offered. Refer to the main subject area for details.
UNSW CANBERRA AT THE AUSTRALIAN DEFENCE FORCE ACADEMY (ADFA)

**ARTS**

Areas of study: Majors: Business, English and media studies, geography, history, Indonesian Studies, international and political studies.
Assumed knowledge: Any 2 units of English.
Offered to: ADFA trainee officers.

**BUSINESS**

Assumed knowledge: Any 2 units of English.
Offered to: ADFA trainee officers.

**COMPUTING AND CYBER SECURITY**

Assumed knowledge: Mathematics Advanced.
Offered to: ADFA trainee officers, DCUS students.
Additional selection criteria: ADFA trainee officers: Selection process with Defence Force Recruiting for entry to the Australian Defence Force. Defence Civilian Undergraduate Sponsorship (DCUS) students: Selection process with the Department of Defence.

**ENGINEERING**

Aeronautical Engineering
Civil Engineering
Electrical Engineering
Mechanical Engineering
Assumed knowledge: Mathematics Advanced, Physics.
Offered to: ADFA trainee officers, Non-Defence students, DCUS students.
Additional selection criteria: ADFA trainee officers: Selection process with Defence Force Recruiting for entry to the Australian Defence Force. Defence Civilian Undergraduate Sponsorship (DCUS) students: Selection process with the Department of Defence.

**SCIENCE**

Areas of study: Majors: Aviation, chemistry, computer science, geography, mathematics, oceanography, physics.
Assumed knowledge: For Aviation, Chemistry, Oceanography and Physics majors: Mathematics Advanced. For Aviation, Oceanography and Physics majors: Physics.
Offered to: ADFA trainee officers.

**TECHNOLOGY**

Aeronautical Engineering
Aviation
Assumed knowledge: Mathematics Advanced, Physics.
Offered to: ADFA trainee officers.

**DOUBLE DEGREES**

If you intend to undertake double degrees check the prerequisites, assumed knowledge and recommended studies for both degrees. Contact the University for further details. The below program is only available to Non-Defence students.

– Engineering (Hons)/Science.
ACCOUNTING
Areas of study: Accounting, taxation and financial planning.
Assumed knowledge: Any 2 units of mathematics, any 2 units of English. Students unable to demonstrate sufficient levels of achievement in mathematics will be required to use one of the elective units to increase their mathematical aptitude. This will not lengthen the period of study.

ANTHROPOLOGY
Assumed knowledge: Any 2 units of English.

APPLIED DATA SCIENCE
This degree can be taken in conjunction with any Western Sydney University bachelor degree listed in this booklet. It is not a standalone program.
Assumed knowledge: Any 2 units of mathematics, any 2 units of English, any 2 units of science.

APPLIED LEADERSHIP AND CRITICAL THINKING
This degree can be taken in conjunction with any Western Sydney University bachelor degree listed in this booklet. It is not a standalone program.
Assumed knowledge: Any 2 units of English.

ARCHITECTURE
Assumed knowledge: English Standard (or higher), and Science and/or Mathematics Advanced (Band 4 or above).

ARTS
Areas of study: Anthropology, Arabic, Chinese, creative writing, criminology and criminal justice, cultural and social analysis, economy and markets, English, geography and urban studies, global business, heritage and tourism, history and political thought, Indigenous Australian studies, Indonesian, innovation and change, international English, international relations and Asian studies, interpreting and translation, Islamic studies, Japanese, linguistics, musicology, music performance, organisations and work, peace and development studies, philosophy, psychological studies, sociology.
Assumed knowledge: Any 2 units of English (Band 4).
Recommended studies: English Standard.

Interpreting and Translation
Assumed knowledge: Any 2 units of English. Applicants should be a native or near native speaker of Arabic, Chinese, Japanese or Spanish.

Languages and Linguistics
Assumed knowledge: Any 2 units of English.

Arts (Pathway to Teaching Birth–5/Birth–12)
Assumed knowledge: Any 2 units of English (Band 5), any 2 units of mathematics (Band 4).
Recommended studies: English Standard.

Arts (Pathway to Teaching Primary)
Assumed knowledge: Any 2 units of English (Band 5), any 2 units of mathematics (Band 4).
Recommended studies: English Standard.

Arts (Pathway to Teaching Secondary)
Assumed knowledge: Any 2 units of English (Band 5), any 2 units of mathematics (Band 4).
Recommended studies: English Standard.
Requirements for teaching courses are currently under review. Check with the University for specific requirements.

ARTS (DIP)
Assumed knowledge: Any 2 units of English.

BUILDING DESIGN MANAGEMENT

BUILDING DESIGN MANAGEMENT (DIP)
Assumed knowledge: Any 2 units of English, any 2 units of mathematics, any 2 units of science.
BUSINESS
Accounting
Applied Finance
Economics
Hospitality Management
Human Resource Management
International Business
Management
Marketing
Property
Sport Management

Assumed knowledge: Any 2 units of mathematics, any 2 units of English. Students unable to demonstrate sufficient levels of achievement in mathematics will be required to use one of the elective units to increase their mathematical aptitude. This will not lengthen the period of study.

BUSINESS (ADVANCED BUSINESS LEADERSHIP)
For majors see BUSINESS.

BUSINESS (DIP)

BUSINESS (PATHWAY TO TEACHING SECONDARY)

Assumed knowledge: Mathematics Advanced, any 2 units of English.

COMMUNICATION
COMMUNICATION (DIP)

Areas of study: Advertising, journalism, media arts production, public relations.

Assumed knowledge: Any 2 units of English.

Screen Media (Arts and Production)

Assumed knowledge: Any 2 units of English.

COMPUTER SCIENCE
COMPUTER SCIENCE (ADVANCED)

Areas of study: Cyber security, networked systems, systems programming and artificial intelligence.

Assumed knowledge: Mathematics Advanced, any 2 units of English.

CONSTRUCTION MANAGEMENT (HONOURS)
CONSTRUCTION MANAGEMENT (DIP)

CONSTRUCTION TECHNOLOGY

Assumed knowledge: Any 2 units of English, any 2 units of mathematics.

CREATIVE INDUSTRIES

Areas of study: Advertising, creative writing, cultural and social analysis, digital cultures, English, enterprise innovation, graphic design, journalism, law and the creative industries, media arts production, music, public relations.

Assumed knowledge: Any 2 units of English.

Recommended studies: Design and Technology, Visual Arts.

CRIMINAL AND COMMUNITY JUSTICE
CRIMINAL AND COMMUNITY JUSTICE (DIP)

Assumed knowledge: English Standard.

CRINIOLOGY

Assumed knowledge: English Standard.

CYBER SECURITY AND BEHAVIOUR

Areas of study: Criminology, cybercrime, data informatics, psychology, systems security.

Assumed knowledge: English Standard.

Recommended studies: Mathematics Advanced, Information Processes and Technology, any 2 units of science.

DATA SCIENCE

Assumed knowledge: Any 2 units of English, any 2 units of science, Mathematics Advanced.

DESIGN
DESIGN (DIP)

Design and Technology

Assumed knowledge: Any 2 units of English plus at least two of Business Studies, Design and Technology, Engineering Studies, Physics, Visual Arts.

Visual Communication

Areas of study: Data visualisation, design history, graphic design, illustration, interactive, motion design, photomedia, research methods, visual storytelling, web- and time-based design.

Assumed knowledge: One or more of Design and Technology, Visual Arts.

EDUCATION

Education (Primary) – Aboriginal and Torres Strait Islander Education
Available only to Aboriginal and Torres Strait Islander students.

Additional selection criteria: Entry is via the Aboriginal and Torres Strait Islander Pathway Program or ATAR. If via ATAR: Band 5 in three subjects, one of which must be English and a Band 4 in mathematics. Check with the University for more details.

Education (Primary)

Assumed knowledge: Any 2 units of English (Band 5), any 2 units of mathematics (Band 4).

Arts (Pathway to Teaching Birth–5/Birth–12)

Assumed knowledge: Any 2 units of English (Band 5), any 2 units of mathematics (Band 4).

Recommended studies: English Standard.

Arts (Pathway to Teaching Primary)

Assumed knowledge: Any 2 units of English (Band 5), any 2 units of mathematics (Band 4).

Recommended studies: English Standard.

Arts (Pathway to Teaching Secondary)

Assumed knowledge: Any 2 units of English (Band 5), any 2 units of mathematics (Band 4).

Recommended studies: English Standard.

Business (Pathway to Teaching Secondary)

Assumed knowledge: Mathematics Advanced, any 2 units of English.

Graphic Design (Pathway to Teaching Secondary)

Assumed knowledge: Any 2 units of English.

Recommended studies: Design and Technology, Visual Arts, Information Processes and Technology.

Health and Physical Education (Pathway to Teaching Secondary)

Assumed knowledge: Any 2 units of English (Band 4).

Recommended studies: Personal Development, Health and Physical Education (PDHPE) or Community and Family Studies.

Science (Pathway to Teaching Primary/Secondary)

Assumed knowledge: Any 2 units of English, any 2 units of science, any 2 units of mathematics.
ENGINEERING (HONS)
ENGINEERING (ADVANCED) (HONS)
Areas of study: Civil, construction, electrical, mechanical, robotics and mechatronics.
Assumed knowledge: Mathematics Advanced (Band 5 or higher), any 2 units of science, any 2 units of English, Physics.

ENGINEERING (DIP)
Assumed knowledge: Any 2 units of English, any 2 units of mathematics and physics.

ENGINEERING SCIENCE
Assumed knowledge: Mathematics Advanced (Band 4 or higher), any 2 units of science, any 2 units of English.
Recommended studies: Physics, Mathematics Advanced.

ENTREPRENEURSHIP
This degree can be taken in conjunction with any Western Sydney University bachelor degree listed in this booklet. It is also a standalone program.
Assumed knowledge: Any 2 units of mathematics.

ENTREPRENEURSHIP (GAMES DESIGN AND SIMULATION)
Assumed knowledge: Mathematics Advanced, any 2 units of English.
Recommended studies: Information Processes and Technology or Software Design and Development.

GEOGRAPHY AND PLANNING
Pathway to Master of Urban Management and Planning
Assumed knowledge: English Standard.
Recommended studies: Any 2 units of English, Geography.

GRAPHIC DESIGN
Pathway to Teaching Secondary
Assumed knowledge: Any 2 units of English, any 2 units of mathematics.
Recommended studies: Design and Technology, Visual Arts, Industrial Technology.

HEALTH SCIENCE
Clinical Sciences
Health Promotion
Health Services Management
Public Health
Recreation Therapy
Assumed knowledge: Any 2 units of English.

Health and Physical Education
Assumed knowledge: Any 2 units of English.
Recommended studies: Personal Development; Health and Physical Education (PDHPE) or Community and Family Studies.

Health and Physical Education (Pathway to Teaching Secondary)
Assumed knowledge: Any 2 units of English (Band 4).
Recommended studies: Personal Development; Health and Physical Education (PDHPE) or Community and Family Studies plus English Standard.

Sport and Exercise Science
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 4 units of science and/or mathematics. Personal Development, Health and Physical Education (PDHPE) can be counted as a science unit for this course.

Health Science (Dip)
Areas of study: Health and physical education, health promotion, health services management, physical development, therapeutic recreation.
Assumed knowledge: Any 2 units of English.

HUMANITARIAN AND DEVELOPMENT STUDIES
Assumed knowledge: English Standard.

INDUSTRIAL DESIGN
INDUSTRIAL DESIGN (HONS)
Assumed knowledge: Design and Technology, any 2 units of English, plus at least 2 units of Business Studies, Engineering Studies, Visual Arts.

INFORMATION AND COMMUNICATIONS TECHNOLOGY
INFORMATION AND COMMUNICATIONS TECHNOLOGY (ADVANCED)
INFORMATION AND COMMUNICATIONS TECHNOLOGY (DIP)
INFORMATION AND COMMUNICATIONS TECHNOLOGY (HEALTH INFORMATION MANAGEMENT)
Areas of study: Cyber security, entertainment computing, health informatics, mathematics, mobile computing, networking.
Assumed knowledge: Mathematics Advanced, any 2 units of English.

INFORMATION SYSTEMS
INFORMATION SYSTEMS (ADVANCED)
Areas of study: Big data, entertainment computing, health informatics, interactive analytics, mathematics, mobile computing, networking, social media analytics.
Assumed knowledge: Any 2 units of mathematics, any 2 units of English.

INTERNATIONAL STUDIES
Assumed knowledge: Any 2 units of English (Band 4).
Recommended studies: English Standard.

LAWS
LAWS (COMBINED)
− Accounting/Laws
− Arts/Laws
− Business/Laws
− Business (Advanced Business Leadership)/Laws
− Communication/Laws
− Construction Management Studies/Laws
− Criminal and Community Justice/Laws
− Criminology/Laws
− Information and Communications Technology/Laws
− Information Systems (Advanced)/Laws
− Information Systems/Laws
− International Studies/Laws
− Science/Laws
− Social Science/Laws
Assumed knowledge: For Laws: Any 2 units of English or equivalent.
For the other area of study: Refer to the relevant entry.

MEDICAL SCIENCE
ADVANCED MEDICAL SCIENCE
Anatomy and Physiology
Biomedical Science
Medicinal Chemistry
Assumed knowledge: Any 2 units of English, any 2 units of science, any 2 units of mathematics.
Recommended studies: At least two of Biology, Chemistry, Physics, Mathematics Advanced.
MEDICAL SCIENCE (FORENSIC MORTUARY PRACTICE)
Assumed knowledge: Any 2 units of English, any 2 units of science, any 2 units of mathematics.
Recommended studies: At least two of Biology, Chemistry, Physics, Mathematics Advanced.

MEDICINE
Recommended studies: Chemistry.
Additional selection criteria: University Clinical Aptitude Test (UCAT ANZ) and interview performance.

MIDWIFERY
Assumed knowledge: Any 2 units of English, any 2 units of mathematics, any 2 units of science.
Additional selection criteria: Interview.

MUSIC
Assumed knowledge: Any 2 units of music (Band 4).

NURSING
NURSING (ADVANCED)
Assumed knowledge: Any 2 units of English, any 2 units of mathematics, any 2 units of science.

OCCUPATIONAL THERAPY
Assumed knowledge: Any 2 units of English.
Recommended studies: Physics, Chemistry plus Biology and/or Personal Development, Health and Physical Education (PDHPE).

PARAMEDICINE
Assumed knowledge: Any 2 units of English, Mathematics Advanced.
Recommended studies: Biology or Personal Development, Health and Physical Education (PDHPE).

PHYSIOTHERAPY
Assumed knowledge: Any 2 units of English.
Recommended studies: Biology.

PLANNING
Pathway to Master of Urban Management and Planning
Recommended studies: Any 2 units of English, Geography.

PODIATRIC MEDICINE
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of mathematics, Physics, Biology.

POLICING
POLICING (LEADERSHIP PROGRAM)
Assumed knowledge: Any 2 units of English.

PSYCHOLOGY (HONS)
Assumed knowledge: English Standard.
Recommended studies: Mathematics Advanced, any 2 units of science.

SCIENCE
ADVANCED SCIENCE
Assumed knowledge: Any 2 units of English, any 2 units of science, any 2 units of mathematics.

Animal Science
Recommended studies: At least one of Agriculture, Biology, Chemistry, Earth and Environmental Science, Geography.

Applied Physics
Recommended studies: Chemistry, Mathematics Advanced and/or Physics.

Biology
Recommended studies: At least one of Agriculture, Biology, Chemistry, Earth and Environmental Science, Geography.

Chemistry
Recommended studies: Chemistry, Mathematics Advanced and/or Physics.

Data Science
Recommended studies: Chemistry, Mathematics Advanced and/or Physics.

Ecology
Recommended studies: Biology, Chemistry, Earth and Environmental Science.

Environmental Futures
Recommended studies: Geography, any 2 units of science.

Environmental Health
Recommended studies: Any 2 units of science.

Forensic Biology
Recommended studies: Mathematics Advanced, Biology or Chemistry.

Forensic Chemistry
Recommended studies: Mathematics Advanced, Biology or Chemistry.

Forensic Science
Recommended studies: Mathematics Advanced, Biology or Chemistry.

Mathematics
Recommended studies: Mathematics Extension 1.

Microbiology
Recommended studies: Biology or Chemistry or Physics.

Nutrition and Food Science
Recommended studies: Biology or Chemistry, any 2 units of mathematics.

Science (Pathway to Teaching Primary/Secondary)
Note: There are 13 different majors attached to the Teaching pathway. Refer to the University website for more details.

Zoology
Recommended studies: At least one of Agriculture, Biology, Chemistry, Earth and Environmental Science, Geography.

SCIENCE (DIP)
Assumed knowledge: Any 2 units of English.
Recommended studies: Any 2 units of mathematics, any 2 units of science.

SOCIAL SCIENCE
SOCIAL SCIENCE (ADVANCED)
Areas of study: Anthropology, child and community studies, criminology and criminal justice, geography and urban studies, heritage and tourism, peace and development studies, sociology.
Assumed knowledge: Any 2 units of English.
Recommended studies: English Standard.
SCIENCE, CRIMINOLOGY AND PSYCHOLOGICAL STUDIES
Assumed knowledge: English Standard.

SOCIAL SCIENCE (DIP)
Assumed knowledge: Any 2 units of English.

SOCIAL SCIENCE (POLICING) (DIP)
Recommended studies: Any 2 units of English.

SOCIAL SCIENCE (PSYCHOLOGY)
Assumed knowledge: Any 2 units of English.
Recommended studies: Mathematics Advanced, any 2 units of science.

SOCIAL WORK
Assumed knowledge: Any 2 units of English.

SPEECH PATHOLOGY
Assumed knowledge: Any 2 units of English.

SPORT DEVELOPMENT
Assumed knowledge: Any 2 units of English.
Recommended studies: Personal Development, Health and Physical Education (PDHPE), Business Studies, Economics.

SUSTAINABLE AGRICULTURE AND FOOD SECURITY
Assumed knowledge: Any 2 units of science, any 2 units of mathematics.
Recommended studies: Biology, Chemistry, Agriculture, Geography.

TOURISM MANAGEMENT
Assumed knowledge: Any 2 units of English.
Recommended studies: Geography and/or Business studies.

TRADITIONAL CHINESE MEDICINE
Assumed knowledge: Any 2 units of English.
Recommended studies: Biology.

COMBINED/DUPLICATE DEGREES
For combined/duplicate degrees check the prerequisites, assumed knowledge and recommended studies for both degrees. Contact the University for further details.
- Arts/Business
- Arts/Creative Industries
- Arts/Social Science
- Communication/Business

Times indicated in this publication are Sydney time.

Your privacy

When you apply to the Universities Admissions Centre (NSW & ACT) (UAC) you provide a lot of personal information, sometimes including health information.

UAC values the privacy of your personal information and recognises the importance of protecting it. UAC is bound by the following legislation:

- Privacy and Personal Information Protection Act 1998 (NSW)
- Privacy Act 1988 (Cth)
- Health Records and Information Privacy Act 2002 (NSW).

This means that UAC must uphold the NSW State Information Protection Principles, the Australian Privacy Principles and the NSW Health Privacy Principles. UAC is committed to upholding these principles and has implemented policies and procedures to ensure they are met.

You can view UAC’s Privacy Policy and applicant declarations at uac.edu.au/privacy.

This booklet is printed by IVE Print Pty Ltd, 83 Derby Street, Silverwater, NSW 2128, under ISO 14001 Environmental Certification.

This paper is PEFC Certified. The PEFC provides an assurance mechanism to purchasers of wood and paper products that they are promoting the sustainable management of forests that meet the social, economic and ecological needs of present and future generations. This stock is made using 100% plantation softwood fibre. All fibre is sourced from well managed plantation forests and other controlled source and is elemental chlorine free.
